

Industrial Organic Pigments

Production, Properties, Application
4th Completely Revised Edition

Klaus Hunger, DECERNIS GmbH
Martin U. Schmidt, Johann-Wolfgang-Goethe-Universität

The standard reference: a versatile and complete presentation of organic pigments in context of their industrial importance.

- This completely revised and extended new edition describes several new pigments, chemical structures, applications and syntheses
- Sets the international standard for information on the synthesis, reaction mechanisms, properties, relevant test methods, and applications of organic pigments
- Contains all industrially produced pigments of the world market, even those which can no longer be found in producers' catalogs are described
- Standardized methods allow test results to be compared throughout the book
- The reader is given useful hints as to which pigment is best for a given application
- Clearly structured and concise text with up-to-date references to the pertinent literature
