

Handbook of Composites from Renewable Materials

Vijay Kumar Thakur; Manju Kumari Thakur and Michael R. Kessler

The *Handbook of Composites from Renewable Materials* comprises a set of 8 individual volumes that brings an interdisciplinary perspective to accomplish a more detailed understanding of the interplay between the synthesis, structure, characterization, processing, applications and performance of these advanced materials. The handbook covers a multitude of natural polymers, reinforcement, fillers and biodegradable materials.

- A state-of-the-art and highly structured 8-volume handbook that has as its core audience researchers in different disciplines as well scientists and engineers in industry.
- Provides commercially valuable insights in to the potential of composites from renewable materials for advanced applications.
- Includes contributions from world renowned experts and discusses the combination of different kinds of materials procured from diverse resources.

Publication Date: Apr 13 2017
Print ISBN: 978-1-119-22436-5
Hardcover • 4400 pages
List Print Price: US\$1974.95
