WILEY

THE WILEY-BLACKWELL ENCYCLOPEDIA OF HEALTH, ILLNESS, BEHAVIOR & SOCIETY

Edited by **William C. Cockerham**, **Robert Dingwall**, and **Stella R. Quah**

University of Alabama at Birmingham, USA; Nottingham Trent University, UK; Duke-NUS Graduate Medical School, Singapore

The Wiley-Blackwell Encyclopedia of Health, Illness, Behavior and Society is the first comprehensive, interdisciplinary, and international reference work on all aspects of the social scientific study of health and illness.

- Represents the most authoritative resource covering concepts, theories, and substantive topics relating to the study of health in our globalized, 21st-century world
- Brings together an experienced author team from across America, Asia, and Europe, who represent a variety of health-related disciplines
- Accessibly structured A to Z entries also benefit from brief bibliographies and cross-references for enhanced clarity
- Offers a definitive representation of each topic, combining different areas of the social scientific study of health in a way that reflects and promotes the interdisciplinary development of health research
- Publishing simultaneously online and as a five-volume print set; the online version will be regularly updated with new research and theoretical findings to ensure it remains a current and accurate resource for health researchers, academics, and students

ABOUT THE EDITORS

Editor-in-Chief

William C. Cockerham is Distinguished Professor and Chair of Sociology at the University of Alabama at Birmingham. His publications include *Social Causes of Health and Disease, 2nd Edition* (2013), *Medical Sociology, 12th Edition* (2012), and *The New Blackwell Companion to the Sociology of Medicine* (Wiley-Blackwell, 2010).

Co-Editors

Robert Dingwall is a consulting sociologist and part-time Professor at Nottingham Trent University. He has published widely on research in medicine, law, and science and technology, and is a former editor of *Sociology of Health and Illness*.

Stella R. Quah is Adjunct Professor of Sociology at the Duke-NUS Graduate Medical School. She is author and editor of several books including *Crisis Preparedness: Asia and the Global Governance of Epidemics* (2007), *Families in Asia: Home and Kin* (2009), and *International Encyclopedia of Public Health* (co-edited with Harald Kristian Heggenhougen, 2008).

Also introducing the *Blackwell Companions to Sociology* series

The *Blackwell Companions to Sociology* provide introductions to emerging topics and theoretical orientations in sociology as well as presenting the scope and quality of the discipline as it is currently configured. Each volume consists of roughly thirty chapter length essays which tackle broad themes or central puzzles within the field. The essays are authored by key scholars who have spent considerable time in reflection over the questions and controversies that have activated interest in their area of research.

Additional features include an introduction by the volume editor summarizing the essays and making a statement on the field, and suggested further reading at the conclusion of each chapter to provide a list of the most important books currently shaping the scholarly research. This state-of-the-art series is meant to be the most authoritative collection of handbooks to the field of sociology.

The volumes in the *Blackwell Companions to Sociology* series are available in print, and also digitally via **Wiley Online Library** or as part of the **Blackwell Reference Online** Sociology collection.
