- The key is to identify and discuss how politics, culture, religion and other social issues affect crisis communication and management, and lessons that organizations that wish to operate or are operating in those cultures could use in preparing and managing crisis
- The book is divided into three sections. The first is an introduction on culture and crisis communication. The next chapters analyze case studies, the intra-cultural and trans-boundary crisis communication. Each chapter examines how cultural impacts communication and response to crisis, using a case study or two to illustrate

Will the Internet Fragment?

Milton Mueller (Previously Announced)

- The Internet has united the world as never before. But is it in danger of breaking apart? Cybersecurity, geopolitical tensions, and calls for data sovereignty have made many believe that the Internet is fragmenting
- In this incisive new book, Milton Mueller argues that the 'fragmentation' diagnosis misses the mark. The network effects and economic benefits of global compatibility are so powerful that they have consistently defeated, and will continue to defeat, any structural fracturing of the Net
- The rhetoric of 'fragmentation' camouflages the real issue: the attempt by governments to align information flows with their jurisdictional boundaries
- The fragmentation debate is really a power struggle over the future of national sovereignty. It pits global governance and open access against the traditional territorial institutions of government
- This conflict, the book argues, can only be resolved through radical institutional innovations. We need to move away from national sovereignty and towards popular sovereignty in cyberspace

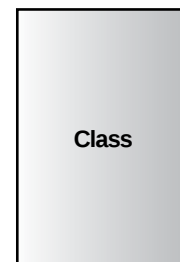

Print ISBN: 978-1-5095-0121-2 (Cloth) US\$45.00 / 978-1-5095-0122-9 (Paper) US\$12.95 • May 2017 • 140PP

American Film

Free and Easy?

A Defining History of the American Film Musical Genre

Sean Griffin

- *Free and Easy?* examines the evolution of how the film musical genre has come to be defined: what gets counted as a musical, why, and who gets to make that decision
- Surveying centuries of music history from the music and dance of Native Americans to contemporary music performance in streaming media, including the growth of American musical theater, music publishing, and the music recording industry, *Free and Easy?* examines how social factors helped invent and shape the musical, and the genre's ongoing balance between celebrating individual freedom and reaffirming the joys of community
- Expanding beyond the glory days of MGM and the classical Hollywood musical or the blockbuster Broadway adaptation to sound experiments, short subjects and cartoons, foreign-language films, "race movies," documentaries, and contemporary independent cinema, this history questions exactly how "free and easy" it is to determine what is and what is not a musical

Munich 1919

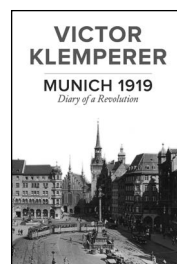

Diary of a Revolution

Victor Klemperer

Munich 1919 is a vivid portrayal of the chaos that followed World War I and the collapse of the Munich Council Republic by one of the most perceptive chroniclers of German history. Victor Klemperer provides a moving and thrilling account of what turned out to be a decisive turning point in the fate of a nation, for the revolution of 1918-9 not only produced the first German democracy, it also heralded the horrors to come.

Critical Theory

Narcocapitalism

Laurent de Sutter

- Governments throughout the world are policing and curbing excitement. From crusades against alcohol and bans on sexual deviance to ever more prohibitions on drugs, it seems that almost no avenue of stimulation is safe from the puritanical oversight of the state
- Simultaneously, the same authorities are only too keen to promote the sedation and pacification of their citizens, licensing a huge increase in anti-depressants, drugs designed to medicate hyperactive children, and other chemical aids to peace and quiet
- In this witty and thought-provoking book, Laurent de Sutter shows that this is symptomatic of a disturbing contemporary trend
- Capitalism, he argues, is trying to curb challenges to its hegemony by putting us all to sleep. Excitement is an inherently radical phenomenon: unruly, social and viral, its potential to create a collective political intelligence that could undermine the status quo is tremendous
- His bold, provocative and original argument is sure to entertain, and most importantly excite, anyone interested in contemporary philosophy, critical theory and politics

- It will be of great value to students and scholars of continental philosophy and to anyone interested in the cutting-edge debates in philosophy and critical theory today

Philosophy of Science

Facing Gaia

Eight Lectures on the New Climatic Regime

Bruno Latour

Our understanding of Nature has constantly evolved. In this new book, leading thinker Bruno Latour argues that Gaia, the fragile system through which living phenomena modify the Earth, offers the ideal way to disentangle the ethical, political, theological, and scientific aspects of Nature in an era of unprecedented climate change and upheaval.

- Bruno Latour is one of the leading thinkers today and creator of the highly influential "Actor-Network Theory"
- In *Facing Gaia*, Latour looks at the increasingly popular Gaia hypothesis, James Lovelock's idea that the earth acts like a single organism, a self-regulating system that works to maintain the conditions of life
- Latour argues that in today's unstable world, we can no longer conceive of Gaia as a benign, Mother Earth figure, but rather a force that directly asserts itself in our lives. This reconceptualization has profound implications for ethics, politics, the sciences, and above all economics and theology
- This work by one of the key thinkers in the social sciences today should generate very broad interest amongst the many students and scholars across disciplines who follow Latour's thought

European Politics

Syriza in Power

Costas Douzinas

- Amidst the turmoil of economic crisis, Greece has become the first European experiment of Left rule in a sea of neoliberalism. What happens when a government of the Left, committed to social justice and the reversal of austerity, is blackmailed into following policies it has fought against and strongly opposes? What can the experience of the Syriza government tell us about the prospects for the Left in the 21st century?
- In this engaging and provocative book, Costas Douzinas uses his position as an 'accidental politician', unexpectedly propelled from academia into the world of Greek politics as a Syriza MP, to answer these urgent questions
- Weaving together theoretical insights as a leading radical thinker with his inside knowledge of events and personalities, he examines the challenges facing Syriza since its ascent to power in 2015 and draws out the theoretical and political lessons from one of the boldest and most difficult experiments in governing from the Left in an age of austerity
- Examining issues ranging from the coup against the Syriza government to the impact of the refugee crisis, from Grexit to Brexit and the future of Europe, this timely book will be of immense importance to anyone seeking to understand the Greek struggle and its implications for resistance, politics and culture in the contemporary world

Global Politics

Beyond Gridlock

Thomas Hale & David Held et al

- It is now conventional wisdom to see the great policy challenges of the 21st century as inherently transnational, spilling across national boundaries
- Comparing anomalies and exceptions to multilateral dysfunction across a number of spheres of world politics, *Beyond Gridlock* explores seven pathways through and even beyond gridlock
- While multilateralism continues to fall short, countries, international organizations, civil society groups, sub-national governments, businesses, and other actors are finding ways to build or defend effective international cooperation
- To be sure, gridlock persists across many realms of world politics, but *Beyond Gridlock* identifies systematic means through which, and the conditions under which, we possess the agency to avoid or resist these forces, or even turn them to the benefit of collective solutions
- Combining critical, comparative analysis across issues with forward-looking evaluation of potential strategies, this book offers a vital new perspective on world politics as well as a practical guide for positive change in global policy

International Political Economy

Bioinformation

Bronwyn Parry & Beth Greenhough

Who has the right to exploit and benefit from bioinformation? The individual or community from whom it was derived? The scientists and technicians who make its extraction both possible and meaningful or the commercial and political interests which fund this work? Who is excluded or even at risk from its commercialisation? And what threats and opportunities might the generation of 'Big Bioinformational Data' raise?

- In this groundbreaking book, authors Bronwyn Parry and Beth Greenhough explore the complex economic, social and political questions arising from the creation and use of bioinformation
- Drawing on a range of highly topical cases, including the commercialization of human sequence data; the forensic use of retained bioinformation; biobanking and genealogical research, they show how demand for this resource has grown significantly driving a burgeoning but often highly controversial global economy in bioinformation
- But, they argue, change is afoot as new models emerge that challenge the ethos of privatisation by creating instead a dynamic open source 'bioinformational commons' available for all future generations

The Ascendancy of Finance

Joseph Vogl

- This is a highly topical work which looks at the disturbing way in which finance and economic institutions are gaining ever-increasing control over politics and government
- Joseph Vogl goes back to the seventeenth century to trace the development of the rise of finance, showing how this culminated in the dramatic transfer of power from states to markets in the past fifty years, and what now amounts to a 'regime of finance'
- Vogl looks in detail at the aftermath of the 2008 financial crisis, arguing that ultimately the market now decides the fate of our private savings, currencies, social systems and even national economies
- *The Ascendancy of Finance* will appeal to the broad general readership concerned by the enormous influence financial institutions exert over our lives and the ways in which they infringe on our democracy

Military / Security / Intelligence

Russia's Military Revival

Bettina Renz & Hanna Smith

- Russian annexation of Crimea and the subsequent air campaign over Syria took the world by surprise. The capabilities and efficiency of Putin's armed forces during both operations signalled to the world that Russia was back in business as a significant military actor on the international stage
- In this cutting-edge study, Bettina Renz and Hanna Smith combine their respective expertise in strategic studies and foreign policy to offer an in-depth and comprehensive analysis of Russia's military revival under Putin's leadership
- Whilst the West must adjust to the reality of a modernised and increasingly powerful Russian military, they argue that the renaissance of Russian military might and its implications for the balance of global power can only be fully understood within a wider historical context
- Assessing developments in Russian Great Power thinking, military capabilities, Russian strategic thought and views on the use of force throughout the post-Soviet era, the book shows that rather than signifying a sudden Russian military resurgence, recent developments are consistent with longstanding trends in Russian military strategy and foreign policy

Social Theory

The Invention of Creativity

Andreas Reckwitz

- Contemporary society has seen an unprecedented rise in both the demand and desire to be creative, to bring something new into the world. Once the reserve of artistic subcultures, creativity has now become a universal model for culture. More than that, it has increasingly become an imperative in many parts of society
- In this new book, cultural sociologist Andreas Reckwitz investigates how the ideal of creativity has grown into a major social force, from the art of the avant-garde and postmodernism to the 'creative industries' and the innovation economy, the psychology of creativity and self-growth, the media representation of creative stars and the urban design of 'creative cities'
- Where creativity is often assumed to be a force for good, Reckwitz looks critically at how this imperative has developed from the 1970s to the present day. Though we may well perceive creativity as the realisation of some natural and innate potential within us, it has rather to be understood within the structures of a very specific culture of the new in late-modern society
- *The Invention of Creativity* is a bold and refreshing counter to conventional wisdom that shows how our age is defined by radical and restrictive processes of social aestheticisation. As such it will be a valuable contribution to those working across disciplines, from cultural and social theory to art history and aesthetics

Sociology of Science & Technology

Science and Religion

An Impossible Dialogue

Yves Gingras

- In this book, leading French-Canadian historian and sociologist Yves Gingras re-evaluates the long and troubled relationship between science and religion
- Outlining the gradual process of separation between science and theology in the eighteenth and nineteenth centuries, he discusses the renewed interest today in promoting dialogue between the two
- In a counter to the current trend of thought, Gingras argues that science and religion are simply incompatible, built on different methodologies and forms of knowledge, making genuine dialogue impossible
- This fresh perspective on a very topical subject matter will appeal to both scholars and students of science and religion as well as a more general readership

Will Robots Take Your Job?

Nigel M. de S. Cameron

- The trend that began with ATMs and do-it-yourself checkouts is moving at lightning speed. Everything from driving to teaching to the care of the elderly and, indeed, code-writing can now be done by smart machines. Conventional wisdom says there will be new jobs to replace those we lose — but is it so simple? And are we ready?
- Technology writer and think tank director Nigel Cameron argues it's naïve to believe we face a smooth transition. Whether or not there are "new" jobs, we face massive disruption as the jobs millions of us are doing get outsourced to machines
- A twenty-first-century "rust belt" will rapidly corrode the labor market and affect literally hundreds of different kinds of job simultaneously
- Robots won't design our future — we will. Yet shockingly, political leaders and policy makers do not seem to have this in their line of sight. So how should we assess and prepare for the risks of this unknown future?
