ISBN: 978-1-5095-2849-3 • Cloth • 224pp • Jul 2019 • S\$97.95 before GST | US\$69.95

ISBN: 978-1-5095-2850-9 • Paper • 224pp • Jul 2019 • S\$34.95 before GST | US\$24.95

Minsky is best known for his claim that “stability is destabilizing”—that the seeds of the bust are sown in the boom. This financial instability hypothesis received renewed attention—and substantial confirmation—in the global financial crisis of 2008. Minsky's insights are not limited to moments of crisis; they grow out of a comprehensive and critical theory of financial capitalism. This book provides a systematic overview of Minsky's thought, covering his entire body of work. It shows how financial crises arise not as exceptions, but out of the normal operation of a financial capitalist system. It explains why Minsky's theories sit uncomfortably with economics and what efforts have been made to integrate them, and shows how Minsky's work can be incorporated in other fields of social thought.

Zest

How to Squeeze the Max out of Life

Andy Cope, Gavin Oattes & Will Hussey

Grown-ups have become Groan-ups. They know they should be making the best of it, but don't actually know what their 'best' looks like anymore. Years of societal conformity have created a beige generation who have lost their identity; forgotten how they once were – buried under a stifling facade of adulthood. But underneath, those moments, memories, passions are still there. If only they could be re-ignited. *Zest* explores the pivotal, formative moments in our lives, both good and bad. It shows how they shaped us, moulded us – but they don't have to (or maybe they should) define us. It's a wake-up call that challenges the reader to reconnect with the essence of who they are, and embrace their forgotten quirks, qualities and peculiarities. It's a catalyst for glorious individuality and shaking things up. For creating the best possible havoc. Other books have light and shade but *Zest* will explore the dark and blindingly bright.

AESTHETICS

Politics and Aesthetics

Jacques Rancière & Peter Engelmann

ISBN: 978-1-5095-3501-9 • Cloth • 120pp • Jul 2019 • S\$62.95 before GST | US\$45.00
ISBN: 978-1-5095-3502-6 • Paper • 120pp • Jul 2019 • S\$17.95 before GST | US\$12.95

In this book the influential philosopher Jacques Rancière, in discussion with Peter Engelmann, explores the enduring connection between politics and aesthetics, arguing that aesthetics forms the fundamental basis for social and political upheaval. Beginning from his rejection of structuralist Marxism, Rancière outlines the development of his thought from early studies on workers' emancipation to his recent investigations of literature, film and visual art. Rather than simply discussing aesthetics within narrow terms of how we contemplate art or beauty, Rancière argues that it underpins our entire 'regime of experience'. Focussing on political relations in particular, he shows how these develop fundamentally from sensual experience, as individual feelings and perceptions become the concern of the community as a whole. Since politics emerges from the 'division of the sensual', aesthetic experience becomes a radically emancipatory and egalitarian means to disrupt this order and transform political reality.

CONTINENTAL PHILOSOPHY

The End A Conversation

Alain Badiou & Giovanbattista Tusa

ISBN: 978-1-5095-3626-9 • Cloth • 160pp • Jul 2019 • S\$62.95 before GST | US\$45.00

ISBN: 978-1-5095-3627-6 • Paper • 160pp • Jul 2019 • S\$17.95 before GST | US\$12.95

In light of the horrors of the 20th century, some writers have gone so far as to declare the end of philosophy itself, emphasising the impossibility of thinking after Auschwitz. In this book the distinguished philosopher Alain Badiou, in dialogue with Giovanbattista Tusa, argues that we must renounce the 'pathos of completion' and continue to think philosophically. To accept the atrocities of the 20th century as marking the end of philosophy is intolerable precisely because it buys into the totalising doctrines of the perpetrators. Badiou contends that philosophical thinking is needed now more than ever to counter the totalizing effects of globalised capitalism, which prescribes no objective for human life other than integration into its system, giving rise to a widespread sense of hopelessness and nihilism.

Each chapter will be written by leading experts in their particular field of study. It will cover the nature and scale of this criminality and how regulatory bodies have failed in recent years to stem the miss selling and adulteration of Halal foods. In addition to putting Halal in a religious and cultural context the book aims to provide practical standards for those working in the Halal trade.

HUMAN GEOGRAPHY

Waste

Kate O'Neill

ISBN: 978-0-7456-8739-1 • Cloth • 240pp • Jul 2019 • S\$90.95 before GST | US\$64.95

ISBN: 978-0-7456-8740-7 • Paper • 240pp • Jul 2019 • S\$31.95 before GST | US\$22.95

In this unique book, Kate O'Neill traces the emergence of the global political economy of wastes over the past two decades. Using the tools and frameworks of global environmental politics, she explains how the emergence of waste governance initiatives and mechanisms can help us deal with both the risks and the opportunities associated with the hundreds of millions – possibly billions – of tons of waste we generate each year. Drawing on a range of fascinating case studies to develop her arguments, including China's role as the primary recipient of recyclable plastics and scrap paper from the western world, "Zero-Waste" initiatives, the emergence of transnational waste-pickers' alliances, and alternatives for managing growing volumes of electronic wastes, O'Neill shows how waste can be a risk, a resource and even a livelihood, with implications for governance at local, national, and global levels.

JOURNALISM

Are Filter Bubbles Real?

Axel Bruns

ISBN: 978-1-5095-3644-3 • Cloth • 160pp • Jul 2019 • S\$62.95 before GST | US\$45.00

ISBN: 978-1-5095-3645-0 • Paper • 160pp • Jul 2019 • S\$17.95 before GST | US\$12.95

In this timely book, Axel Bruns argues that the influence of echo chambers and filter bubbles has been severely overstated, and results from a broader moral panic about the role of online and social media in society. Our focus on these concepts, and the widespread tendency to blame platforms and their algorithms for political disruptions, obscures a far more critical question: what are the social and political drivers that have led to the rise of populism and hyperpolarization in many established and emerging democracies, and how can we reverse this dangerous trend? Bruns evaluates the evidence for and against echo chambers and filter bubbles, and offers a persuasive argument for why we should shift our focus to more important problems.

PHILOSOPHY OF RELIGION

**The Philosophy of Religion, 3rd Edition**
A Critical Introduction

Beverley Clack & Brian R. Clack

ISBN: 978-1-5095-1692-6 • Cloth • 300pp • Apr 2019 • S\$97.95 before GST | US\$69.95

ISBN: 978-1-5095-1693-3 • Paper • 300pp • Apr 2019 • S\$41.95 before GST | US\$29.95

For twenty years, the authors' distinctive and thought-provoking introduction to the philosophy of religion has been of enormous value to students and scholars, providing a bold and refreshing alternative to standard analytic approaches to the subject. This revised and updated edition retains the accessibility which makes the book popular, while furthering its distinctive argument regarding the human dimension of religion. The central emphasis of the philosophy of religion – the concept of God, and the arguments for and against God's existence – is reflected in thorough analyses, while alternative approaches to traditional philosophical theism are explored. The treatments of both the miraculous and immortality have been revised and expanded, and the concluding chapter investigates how philosophy of religion might be conducted in an age defined by religious terrorism.

PHILOSOPHY OF TECHNOLOGY

**The Age of Disruption****Technology and Madness in Computational Capitalism**

Bernard Stiegler

ISBN: 978-1-5095-2926-1 • Cloth • 380pp • Jul 2019 • S\$97.95 before GST | US\$69.95

ISBN: 978-1-5095-2927-8 • Paper • 380pp • Jul 2019 • S\$40.95 before GST | US\$28.95

Half a century ago Horkheimer and Adorno argued, with great prescience, that our increasingly rationalized and Westernized world was witnessing the emergence of a new kind of barbarism, thanks in part to the stultifying effects of the culture industries. What they could not foresee was that, with the digital revolution and the pervasive automation associated with it, the developments they had discerned would be greatly accentuated and strengthened, giving rise to the loss of reason and to the loss of the reason for living. Individuals are overwhelmed by the sheer quantity of digital information and the speed of digital flows, and profiling and social media satisfy needs before they have even been expressed, all in the service of the data economy.

SOCIAL THEORY

**Resonance****A Sociology of Our Relationship to the World**

Hartmut Rosa

ISBN: 978-1-5095-1989-7 • Cloth • 450pp • Jun 2019 • S\$62.95 before GST | US\$45.00

Leading sociologist Hartmut Rosa builds on his influential theory of 'acceleration', the idea that the fast pace of modern life is disrupting our relationship with one another and the world. Examining the full spectrum of human activities, Rosa shows all the great crises of modern society – the environmental crisis, the crisis of democracy, the psychological crisis – can also be understood and analyzed in terms of 'resonance' – a fundamental rethink of the way that we relate to the world. This bold renewal of critical theory for our times will be of great interest to students and scholars across the social sciences and humanities.

Money Without Boundaries

How Blockchain Will Create a New Global Currency

Thomas J. Anderson

Largely inspired by *The Denationalization of Money* by Friedrich Hayek, *Money Without Boundaries*' ideological foundation is also inspired by economists and thought leaders like Milton Friedman and Irving Fisher, advancements in capital markets over the past 50 years, and the convergence of old and new technologies. Author Thomas J. Anderson explains how blockchain acts as the filter and the glue, making it all possible. Compared with other currencies, blockchain-managed money markets are more straightforward and transparent. It is easier to monitor, understand, and assess the quality of their "full-faith and credit." It shows how not only money, but also the process of borrowing and lending, will evolve to be conducted in a 100% trusted, secure, transparent, open architecture environment. Anderson begins with a history of money and discusses the rise of cryptocurrency, concluding with a comparison of decentralized money markets to all other alternatives. It demonstrates how blockchain technology allows full transparency and explains how blockchain makes it possible for money to be fully commoditized. If you are interested in cryptocurrency, money, monetary theory, or understanding how the applied uses of blockchain technology will change your everyday life, this is essential reading.

POLITICAL PHILOSOPHY & THEORY

**Politics and the Anthropocene**

ISBN: 978-1-5095-3419-7 • Cloth • 185pp • Aug 2019 • S\$83.95 before GST | US\$59.95

ISBN: 978-1-5095-3420-3 • Paper • 185pp • Aug 2019 • S\$27.95 before GST | US\$19.95

In this cutting-edge intervention, Duncan Kelly considers how this new geological era could shape our future by engaging with the recent past of our political thinking. If politics remains a short-term affair governed by electoral cycles, could an Anthropocenic sense of time, value and prosperity be built into it, altering long-established views about abundance, energy and growth? Is the Anthropocene so disruptive that it is no more than a harbinger of ecological doom, or can modern politics adapt by rethinking older debates about states, territories, and populations? Kelly rejects both pessimistic fatalism about humanity's demise, and an optimistic fatalism that makes the Anthropocene into a problem too big for politics, best left to the market or technology to solve.

BUILDING DESIGN

Re-Imagining the Avant-Garde

Revisiting the Architecture of the 1960s and 1970s

Matthew Butcher & Luke C. Pearson

ISBN: 978-1-119-50685-0 • Paper • 144pp • Aug 2019 • S\$41.95 before GST | US\$29.99

References to the likes of Archizoom, Peter Eisenman, John Hejduk and Superstudio abound. Highly diverse, the avant-garde cannot be defined as a single strand or tendency. It was divergent geographically – reaching from Europe to North America and Japan – and in its political, formal and cultural preoccupations. It was unified, though, as a critical and experimental force, critiquing contemporary society against the backdrop of extreme social and political upheaval: the Paris riots of May 1968, the anti-Vietnam war movement in America and the looming ecological crisis. It outlines how in contemporary architectural practice, avant-garde projects retain their power as historical precedents, as barometers of a particular design ethos, as critiques of society and instigators of new formal techniques. Given the far-reaching impact of the subsequent digital revolution, which has since reshaped every aspect of practice, the issue asks why this historical period continues to retain its undeniable grip on current architecture.

BIM for Design Firms

Data Rich Architecture at Small and Medium Scales

Francois Levy

ISBN: 978-1-119-25280-1 • Cloth • 304pp • Aug 2019 • S\$104.95 before GST | US\$74.95

By advocating the use of BIM in small projects and by smaller firms from early design stage, this book overturns the current assumptions around BIM, which rest on it being used by larger commercial firms for construction delivery. Through clear explanation of the processes involved and compelling case studies of small projects, the power of BIM is revealed to be far more than an improved documentation and sharing environment. Architects' small projects that embrace BIM in the design process are fully illustrated in colour and discussed in a variety of short and long case studies throughout the book. The book not only introduces BIM and its history and how it is applicable for a small project context, but also emphasizes the full impact that a data modeling tool has on design processes, systems and the high level of collaboration required across the design team.

Starting with the character-defining work of Denny O’Neil and Neal Adams in the early 1970s, through the revolutionary era of the reimagined superhero comic in the 1980s and 1990s, to the new directions in the modern works of Grant Morrison, Ed Brubaker, Scott McDaniel, and ending with the release of the New 52, *Batman and Ethics* explores the developments of Batman’s most troubling ethical dilemmas through some of his key storylines.

BATMAN AND PHILOSOPHY: THE DARK KNIGHT OF THE SOUL
