SOCIAL & CULTURAL ANTHROPOLOGY

On the State

On the State

Lectures at the Collège de France, 1989–1992

Pierre Bourdieu

What is the nature of the modern state? How did it come into being and what are the characteristics of this distinctive field of power that has come to play such a central role in the shaping of all spheres of social, political and economic life? In this major work the great sociologist Pierre Bourdieu addresses these fundamental questions. Modifying Max Weber's famous definition, Bourdieu defines the state in terms of the monopoly of legitimate physical and symbolic violence, where the monopoly of symbolic violence is the condition for the possession and exercise of physical violence. The state can be reduced neither to an apparatus of power in the service of dominant groups nor to a neutral site where conflicting interests are played out: rather, itconstn with very real effects – is at the same time the product of all struggles between different interests, what is atstake in these struggles, and their very foundation.

ART HISTORY & THEORY

A Companion to Public Art

Cher Krause Knight, Harriet F. Senie & Dana Arnold

This is the only scholarly volume to examine the main issues, theories, and practices of public art on a comprehensive scale. It brings together established and emergent scholars ranging from art and architectural historians, critics, public art curators and administrators, as well as artists. In four sections—tradition, site, audience, and critical frameworks—*A Companion to Public Art* discusses important topics for the field, including public art in urban landscapes, the role of digital technologies, time and memory, and the intersection of public art and mass media.

GENERAL & INTRODUCTORY ART & APPLIED ARTS

The Art Teacher's Survival Guide for Elementary and Middle Schools

3rd Edition

Helen Hume & Marilyn Palmer

Authoritative and practical, this comprehensive guide offers everything a teacher needs to know for conducting an effective art instruction and appreciation program. The Third Edition of *The Art Teacher's Survival Guide for Elementary and Middle Schools* includes a complete update on public-relations guidelines, and reference material examples. The revised edition also features many new projects, an update on current projects and includes an explanation of the hot topic amongst art educators, Teaching Artistic Behavior (TAB/choice). Choice-based art education is reflected in the authors' discussion of teaching in mixed-media, ceramics, photography, sculpture, and art history.

ANCIENT & CLASSICAL HISTORY

A Companion to Greeks Across the Ancient World

Franco De Angelis

An innovative, up-to-date treatment of ancient Greek mobility and migration from 1000 BCE to 30 BCE. *A Companion to Greeks Across the Ancient World* explores the mobility and migration of Greeks who left their homelands in the ten centuries between the Early Iron Age and the Hellenistic period. While most academic literature centers on the Greeks of the Aegean basin area, this unique volume provides a systematic examination of the history of the other half of the ancient Greek world. Contributions from leading scholars and historians discuss where migrants settled, their new communities, and their connections and interactions with both Aegean Greeks and non-Greeks.

A Companion to the Achaemenid Persian Empire

Bruno Jacobs, Robert Rollinger

The Achaemenid Empire is often addressed as the first World Empire. However, its roots are in Near Eastern traditions, some of which have been the subject of recent intensive reevaluation. This book takes a unique and innovative approach to the subject, considering those predecessors to whom the Achaemenid Empire was indebted for its structure, ideology, and self-expression, by examining both written and archaeological sources. It addresses the empire's legacy, and its contemporary, later, and even modern reception. *A Companion to the Achaemenid Persian Empire* takes into account all relevant historical sources, including archaeological ones. It places particular emphasis on looking at the Achaemenid Empire from its different centers, paying just as much attention to the widely neglected eastern parts as to the commonly covered western parts of the empire. The book considers, not only its political history, but also its social, economic, and religious history, institutions, and art and science, in an effort to draw a complete picture of the empire and to foster an appreciation for its lasting reputation.

COMMUNICATION STUDIES

Killer Visual Strategies

Engage Any Audience, Improve Comprehension, and Get Amazing Results Using Visual Communication

Amy Balliett

Killer Visual Strategies traces the history of visual communication and explores why it now plays an integral role in our daily lives. As Amy Balliett tells the story of this evolving medium, she naturally incorporates visuals, such as timelines and data visualizations throughout. In addition to providing actionable rules to follow for creating high-impact visual content, Balliett also explores the latest trends, including visual search, augmented reality (AR), and virtual reality (VR). Then, she looks forward to what lies ahead in this dynamic field. The book's topics can benefit readers in a range of professions where visual content is now vital to sharing a message.

The Handbook of Applied Communication Research

H. Dan O'Hair

The Handbook of Applied Communication Research addresses a wide array of contemporary communication issues, their research implications in various contexts, and the challenges and opportunities for using communication to manage problems. This innovative work includes discussion and analysis spread across two comprehensive volumes. Volume one introduces ACR, explores what is possible in the field, and examines theoretical perspectives, organizational communication, risk and crisis communication, and media, data, design, and technology. The second volume focuses on real-world communication topics such as health and education communication, legal, ethical, and policy issues, and volunteerism, social justice, and communication activism. Each chapter addresses a specific issue or concern, and discusses the choices faced by participants in the communication process.

Media Selling

Digital, Television, Audio, Print and Cross-Platform, 5th Edition

Charles Warner, William Lederer, Brian Moroz

The revised and updated fifth edition of *Media Selling* is an essential guide to our technology-driven, programmatic, micro-targeted, mobile, multi-channel media ecosystem. Today, digital advertising has surpassed television as the number-one ad investment platform, and Google and Facebook dominate the digital advertising marketplace. The authors highlight the new sales processes and approaches that will give media salespeople a leg up on the competition in our post-Internet media era. The updated fifth edition includes insight from digital experts into how 82.5% of digital ad inventory is bought and sold programmatically; it reveals how to conduct research on Google Analytics, and identifies how media salespeople can offer cross-platform and multi-channel solutions to prospects' advertising and marketing challenge.

A Sleepwalker's Guide to Social Media

Tony D. Sampson

Positing online users as 'sleepwalkers', Tony Sampson offers an original and compelling approach for understanding how social media platforms produce subjectivities. Drawing on a wide range of theorists, including A.N. Whitehead and Gabriel Tarde, he provides tools to track his sleepwalker through the 'dark refrain of social media': a refrain that spreads through viral platform architectures with a staccato-like repetition of shock events, rumours, conspiracy, misinformation, big lies, search engine weaponization, data voids, populist strongmen, immune system failures, and far-right hate speech. Sampson's sleepwalker is not a pre-programmed smartphone junkie, but a conceptual personae intended to dodge capture by data doubles and lookalikes. Sleepwalkers are neither asleep nor wide awake; they are a liminal experimentation in collective mimicry and self-other relationality. Their purpose is to stir up a new kind of community that emerges from the potentialities of revolutionary contagion.

Digital Life

Tim Markham

Conventional wisdom suggests that the pervasiveness of digital media into our everyday lives is undermining cherished notions of politics and ethics. Is this concern unfounded? In this daring new book, Tim Markham argues that what it means to live ethically and politically is realized *through*, not in spite of, the everyday experience of digital life. Drawing on a wide range of philosophers from Hegel and Heidegger to Levinas and Butler, he investigates what is really at stake amid the constant distractions of our media-saturated world, the way we present ourselves to that world through social media, and the relentless march of data into every aspect of our lives. A provocation to think differently about digital media and what it is doing to us, *Digital Life* offers timely insights into distraction and compassion fatigue, privacy and surveillance, identity and solidarity. It is essential reading for scholars and advanced students of media and communication.

News 2.0

Journalists, Audiences and News on Social Media

Ahmed Al-Rawi

The second generation of news—News 2.0—made, distributed, and consumed on the internet, particularly social media, has forever changed the news business. *News 2.0: Journalists, Audiences and News on Social Media* examines the ways in which news production is sometimes biased and how social networking sites (SNS) have become highly personalized news platforms that reflect users' preferences and worldviews. Drawing from empirical evidence, this book provides a critical and analytical assessment of recent developments, major debates, and contemporary research on news, social media, and news organizations worldwide.

The Media Manifesto

Natalie Fenton, Des Freedman, Justin Schlosberg, Lina Dencik

Our media systems are in crisis. Run by unaccountable corporations and dominated by agendas and algorithms that are shrouded in mystery, these formerly trusted sources of information and entertainment have lost their way. As consumers, we have plenty of choice, but as citizens we have an abundance of misinformation and misrepresentation. In this incisive manifesto, four prominent media scholars and activists put forth a roadmap for radical reform of concentrated media power. They argue that we should put media justice, economic democracy and social equality at the heart of our scholarship and our campaigning. *The Media Manifesto* delivers a sharp analysis of our communications crisis and a passionate call for urgent change. It provides resources of hope for media reform movements across the globe.

Understanding Disney

The Manufacture of Fantasy, 2nd Edition

Janet Wasko

Since the 1930s, the Walt Disney Company has produced characters, images, and stories that have captivated audiences around the world. How can we understand the appeal of Disney products? What is it about the Disney phenomenon that attracts so many children, as well as adults? In this updated second edition, with new examples provided throughout, Janet Wasko examines the processes by which the Disney company – one of the largest media and entertainment corporations in the world – continues to manufacture the fantasies that enthral millions. She analyses the historical expansion of the Disney empire into the twenty-first century, examines the content of Disney's classic and more recent films, cartoons and TV programs and discusses how they are produced, considering how some of the same techniques have been applied to the Disney theme parks. By looking at the Disney phenomenon from a variety of perspectives, she provides an updated and comprehensive overview of one of the most significant media and cultural institutions of our time.

FILM STUDIES

A Companion to Contemporary Documentary Film

Alexandra Juhasz & Alisa Lebow

A Companion to Contemporary Documentary Film presents a collection of original essays that explore major issues surrounding the state of current documentary films and their capacity to inspire and effect change. Featuring contributions from top documentary scholars and makers, readings are grouped around thematic strands critical to contemporary documentary filmmakers and the study of documentary film. A variety of issues relating to these topics are addressed as they are treated in a range of documentaries, including questions of form and formal traditions; the politics of documentaries and their real-world implications; the voice of the documentary filmmaker; regional, national, and international representations; and approaches to race, ethnicity, sexuality and gender in a fascinating array of films.

RACE & ETHNICITY STUDIES

Whiteness in America

Monica McDermott

When Americans think about race, “white” is often the furthest thing from their minds. Yet whiteness colors so much of social life in the United States, from the organization and maintenance of social structures to an individual's sense of self. White has long been the invisible default category against which other racial and ethnic groups are silently compared and marked out as “different.” At the same time, whiteness is itself an active marker that many bitterly fight to keep distinctive, and the shifting boundaries of whiteness reflect the nation's history of race relations, right back to the earliest period of European colonization. One thing that has remained consistent is that whiteness is a definitive mark of privilege. This book examines some of the many varieties of what it means to be white – across geography, class, and social context – and the culture, social movements, and changing demographics of whiteness in America.

THEORY OF CULTURE

**Digitalization of Society and Socio-Political Issues 1**

Digital, Communication and Culture

Eric George

Digitalization is a long and constant sociohistoric process in which all areas of society's activities are reconfigured. *Digitalization of Society and Socio-political Issues 1* examines the transformations linked to the development of digital platforms and social media, which affect the cultural and communicational industries. It analyzes the formation of Big Data, their algorithmic processing and the societal changes which result (social monitoring and control in particular). Through critical views, it equally presents the various ways in which technology participates in relations of power and domination, and contributes to possible emancipatory practices.

CURRICULUM TOOLS – GENERAL

In Praise of Forgiveness

Massimo Recalcati & Alice Kilgarrieff

Relationships fall apart, marriages fail, couples break up – it happens to us all. Time corrodes passion and the routines of daily life kill the excitement that surrounds the emotion of the first encounter. The difficulty of uniting sexual pleasure with love, which Freud considered to be the most common neurosis in any love life, has become emblematic of a truth that seems undeniable: desire is destined to die if its object is not constantly renewed, if we do not change partner, if it is closed for too long in the restrictive chamber of the same bond. And yet what happens to these bonds when one of the two partners betrays the other, when the promise fails, when there is another emotional experience cloaked in secrecy and deceit? What happens if the traitor then begs forgiveness? Are they asking to be loved again and, having declared that it is not like it used to be, now want everything to go back to how it was? Should we make fun of lovers in their attempts to make love last? Or should we try to face up to the experience of betrayal, with the offence caused by the person we love most? Should we not perhaps attempt to praise forgiveness in love?

Methods and Interdisciplinarity

Roger Waldeck

Interdisciplinarity research results from a growing need for multi-perspective methods, and knowledge on complex and multifaceted objects of study. It is not simply scientific research that involves several disciplines, but ultimately, the aim is confronting this knowledge and – if possible – articulating it coherently. Using specific examples, *Methods and Interdisciplinarity* categorizes the different modes of interdisciplinarity and discusses the mechanisms of hybridization between them. On the one hand, the book shows how the same issue can be treated according to various points of view from several disciplines, which can give rise to complementary or even contradictory knowledge. On the other hand, it illustrates how methods from some disciplines make it possible to articulate the qualitative or quantitative approaches of others.

GENERAL & INTRODUCTORY EDUCATION

The Wiley Handbook of Gender Equity in Higher Education

Nancy Niemi & Marcus B Weaver-Hightower

The handbook provides a deep and provocative collection of leading researchers' thinking on the current intersection of gender and higher education. The so-called dearth of males, gender segregation by major with women still predominant in lower-paying areas, and persistently chilly climates in the STEM fields are just several of the broad areas in which research reveals higher education's complicated relationships to, and sometimes inadequate fostering of, gender equity. The volume offers a bold picture of the research in the field of higher education and gender equity, while also projecting future paths of exploration, inquiry, and action.

HIGHER EDUCATION GENERAL

An Introduction to Social Psychology

7th Edition

Miles Hewstone & Wolfgang Stroebe

An Introduction to Social Psychology is a highly accessible and definitive guide, which engages the reader without sacrificing academic rigour – it informs and engages. This seventh edition, which has been extensively revised and updated, meets the same high standards it has set over the last 34 years. In a field that has grown enormously, the task of presenting clearly both underlying theory and the latest research across 15 substantive chapters is taken on by a series of leading psychologists, each an acknowledged expert in their field. The text contains an updated range of innovative pedagogical features, including helpful summaries of key studies and theories, which will appeal to the student reader, while managing to provide a uniform standard of coverage and clarity across the volume.

Home SOS

Gender, Violence and Survival in Crisis Ordinary Cambodia

Katherine Brickell

Home SOS argues that the home is central to the violence and gendered contingency of existence in crisis ordinary Cambodia. Based on over 300 interviews and conducted over 15 years, this book focuses on women's experiences of survival-work in (un)eventful situations of domestic violence and forced eviction. Charting the journey of Cambodia's first-ever domestic violence law, alongside women's housing activism against forced eviction, *Home SOS* explores how the political economy of the country has conspired to limit – and in some cases quash – the transformative potential that each might hold. Together, domestic violence and forced eviction are shown to be interrelated oppressions and brutalisations of domestic life that gravitate and retrain multiple subfields of geography on to the home sphere as a public-private hybrid worthy of energised study.

Natural Gas

Michael Bradshaw & Tim Boersma

Is natural gas the 'bridge' to our low carbon future? If it replaces coal in the power industry and develops as an alternative transportation fuel, natural gas has the potential to play a greater role in the current low carbon energy transition. But such a future for natural gas is by no means certain. In this timely volume, Mike Bradshaw and Tim Boersma offer a sober and balanced assessment of a global gas industry whose fortunes hang in the balance. They examine the emergence of shale gas in North America and assesses the prospects for a wider shale gas revolution. Russia's key role in global gas markets, is also explored, both in terms of the geopolitics of Russia-EU gas relations and the prospects for expanded Russian exports to the Asia-Pacific region. The exploitation of unconventional gas reserves and the expansion of liquefied natural gas (LNG) production capacity has indeed heralded a new age of plentiful and affordable natural gas. Yet, as the authors ably show, gas will not realise its potential unless it can displace coal in future energy demand growth in Asia and overcome the many geopolitical challenges that will shape its ongoing role in the global energy system.

EUROPEAN HISTORY

A Companion to The Holocaust

Simone Gigliotti & Hilary Earl

Holocaust Studies is a dynamic field that encompasses discussions on human behavior, extremity, and moral action. A diverse range of disciplines – history, philosophy, literature, social psychology, anthropology, geography, amongst others – continue to make important contributions to its scholarship. *A Companion to the Holocaust* provides exciting commentaries on current and emerging debates and identifies new connections for research. The text incorporates new language, geographies, and approaches to address the precursors of the Holocaust and examine its global consequences. A team of international contributors provides insightful and sophisticated analyses of current trends in Holocaust research that go far beyond common conceptions of the Holocaust's causes, unfolding and impact.

GENERAL & INTRODUCTORY HISTORY

A Companion to The Russian Revolution

Daniel Orlovsky

The Russian revolution of 1917 reverberated throughout an empire that covered one-sixth of the world. It altered the geo-political landscape of not only Eurasia, but of the entire globe. The impact of this immense event is still felt in the present day. *A Companion to the Russian Revolution* offers more than thirty original essays, written by a team of respected scholars and historians of 20th century Russian history. Presenting a wide range of contemporary perspectives, the *Companion* discusses topics including the dynamics of violence in war and revolution, Russian political parties, the transformation of the Orthodox church, Bolshevism, Liberalism, and more. Although primarily focused on 1917 itself, and the singular Revolutionary experience in that year, this book also explores time-periods such as the First Russian Revolution, early Soviet government, the Civil War period, and even into the 1920's.

Comrade Kerensky

Boris Kolonitskii

As one of the heroes of the 1917 February Revolution and then Prime Minister at the head of the Provisional Government, Alexander Kerensky was passionately, even fanatically, lauded as a leader during his brief political reign. But, by October, Kerensky had been unceremoniously dethroned in the Bolshevik takeover and had fled to Paris and then to the US, where he would remain exiled and removed from his former glory until his death. The breakneck trajectory of his rise and fall and the intensity of his popularity were not merely a symptom of the chaos of those times but offer a window onto a much broader historical phenomenon which did not just begin with Lenin and Stalin – the cult of the leader. This highly original portrait of a revolutionary sheds new light on the cult of Kerensky that developed around this charismatic leader during the months following the overthrow of the tsar. It will be of value to students and scholars of Russian history and to those interested in political culture.

HISTORY OF SCIENCE & MEDICINE

Chicken

A History from Farmyard to Factory

Paul R. Josephson

Why has the chicken become the meat par excellence, the most plentifully eaten and popular animal protein in the world, consumed from Beijing to Barcelona? As renowned historian Paul Josephson shows, the transformation of the chicken from backyard scratcher to hyper-efficient industrial meat-product has been achieved due to the skill of entrepreneurs who first recognized the possibilities of chicken meat and the gene scientists who bred the plumpest and most fertile birds. But it has also been forced through by ruthless capitalists and lobbyists for “big farmer”, at the expense of animal welfare and the environment. With no sign of our lust for chicken abating, we’re now reaching a crisis point: billions of birds are slaughtered every year, after having lived lives that are nasty, brutish and short. The waste from these victims is polluting rivers and poisoning animals. We’re now plunging “egg-first” into environmental disaster.

Trans America

A Counter-History

Barry Reay

Trans seems to be everywhere in American culture. Yet there is little understanding of how this came about. Are people aware that there were earlier periods of gender flexibility and contestability in American history? How well-known is it that a previous period of trans visibility in the 1960s and early 1970s faced a vehement backlash right at the time that trans, in the form of what was then termed transvestism and transsexuality, seemed to be so ascendant? Was there transness before transsexuality was named in the 1950s and transgender emerged in the 1990s? Barry Reay explores this history: from a time before trans in the nineteenth century to the transsexual moment of the 1960s and 1970s, the transgender turn of the 1990s, and the so-called tipping point of current culture.

HISTORY SPECIAL TOPICS

Smells

A Cultural History of Odours in Early Modern Times

Robert Muchembled

Why is our sense of smell so under-appreciated? We tend to think of smell as a vestigial remnant of our pre-human past, doomed to gradual extinction, and we go to great lengths to eliminate smells from our environment, suppressing body odour, bad breath and other smells. Living in a relatively odour-free environment has numbed us to the importance that smells have always had in human history and culture. In this major new book Robert Muchembled restores smell to its rightful place as one of our most important senses and examines the transformation of smells in the West from the Renaissance to the beginning of the 19th century. This rich cultural history of an under-appreciated sense will be appeal to a wide readership.

POLITICAL & DIPLOMATIC HISTORY

**China***Kerry Brown*

China is poised to become the world's largest economy in the next decade. But its great struggle to modernise has been one of tragedy, conflict, and challenge. From the first attempts to introduce Western ideas into the country two centuries ago, China's long march to global primacy has been above all an epic fight to renew an ancient country and culture. Leading Sinologist Kerry Brown traces this quest for renewal through the major moments of China's modern history. Taking the reader on a journey that includes war, revolution, famine and finally regeneration, he describes concisely and authoritatively where China has come from, and where it is heading as it achieves great power status. This is a story that is no longer just about China, but concerns the rest of the world.

SOCIAL & CULTURAL HISTORY

**A Companion to American Women's History**

2nd Edition

Nancy Hewitt

A Companion to American Women's History consists of roughly twenty-eight original essays on critical themes and topics in American women's history. The work assesses the past thirty years of scholarship when Women's History first began to take shape within American History. Part One discusses women in colonial times from 1600-1760, and addresses Europeans coming in contact with Native American, Afrikan, and colonial women for the first time; early family structures, religion and economy. Part Two (1760-1880) addresses women's participation in the American revolution, adjusting to social and political upheaval, agrarian work, participation in the new industrial/urban society and lives of slave women. Part Three (1880-present) looks at migration and immigration, women's movements at the turn of the 20th century, wage earning women, consumerism, education, women's liberation and the backlash towards feminism in the late 20th century conservative America.

**A Companion to Intellectual History***Richard Whatmore & Brian Young*

A Companion to Intellectual History provides an in-depth survey of the practice of intellectual history as a discipline. Forty newly-commissioned chapters showcase leading global research with broad coverage of every aspect of intellectual history as it is currently practiced. Written by leading researchers in the field, these chapters demonstrate the ways in which intellectual historians have contributed to the history of science and medicine to literary studies, art history and the history of political thought. Several chapters provide an expert overview of the seminal writings by contemporary intellectual historians that have caused particular historiographical controversy, and contributors pay special attention to contemporary controversies in order to provide readers with the most current overview of the field. Essays are written in a clear and accessible manner, designed for an international audience.

TRAVEL & TOURISM INDUSTRY

**The Tourist Places of the World***Philippe Violier & Benjamin Taunay*

Formerly a largely Western practice, “leisure travel” is today the most dynamic industry in the world in terms of growth. Developments in transport and communication systems mean tourism is now an integral part of our understanding of the world, and involved in the exponential increase of links between societies and different cultures.

From the Science, Society and New Technologies Series, Volume 2 in the Tourism and Mobility Systems Set, *The Tourist Places of the World* has comprehensive data on the number of international visitors annually. It also includes an original map – not dictated by country, but by major tourist areas and places. The hierarchy of destinations drawn is highlighted by the different levels of popularity and passenger flows; from the universal places where all societies meet to the still unfrequented places. Beyond the recognition of global tourism, the challenge is to understand how and why societies can achieve a better life through sustainable development, which encompasses social, economic and environmental dimensions.

APPLIED LINGUISTICS

The Phonology of Classical Latin

The Phonology of Classical Latin

András Cser

This work is a comprehensive corpus-based description of the synchronic segmental phonology of Classical Latin. The goal is not only to give a full description of the phonology of a dead language; it is to highlight how the patterns and processes described contribute to phonological theory. The author's research results include novel analyses of segmental phenomena, phonotactics, phonological processes, inflectional morphology, and certain diachronic questions. The analyses presented are informed by specific hypotheses about how phonological representations are structured and how phonological rules work, and in turn how the findings corroborate these hypotheses. Theoretically grounded, *The Phonology of Classical Latin* provides raw material for researchers of phonology, morphology and historical linguistics.

The Handbook of Language Contact

2nd Edition

Raymond Hickey

Language contact is a dynamic area of contemporary linguistic research that studies how language changes when speakers of different languages interact. Accessibly structured into three sections, *The Handbook of Language Contact* explores the role of contact studies within the field of linguistics, the value of contact studies for language change research, and the relevance of language contact for sociolinguistics. This authoritative volume presents original findings and fresh research directions from an international team of prominent experts. Thirty-seven specially-commissioned chapters cover a broad range of topics and case studies of contact from around the world. This valuable reference has been extensively updated with new chapters on topics including globalization, language acquisition, creolization, code-switching, and genetic classification. Fresh case studies examine Romance, Indo-European, African, Mayan, and many other languages in both the past and the present.

Applying Phonetics

Speech Science in Everyday Life

Murray Munro

The dynamic field of phonetics, the science of the structure and function of human speech, has seen exciting technological innovations and new applications in recent years. *Applying Phonetics* introduces students to the field through a unique exploratory approach that highlights practical applications and focuses on the diverse ways in which the speech sciences influence daily life. Requiring no prior knowledge of linguistics, this accessible, student-friendly textbook introduces the key concepts in phonetics and explains their relevance to contemporary applications. Even students who have completed introductory linguistics courses will discover plenty of new material in this volume.

The Handbook of Historical Linguistics

Volume II

Richard Janda, Brian D. Joseph & Barbara S. Vance

This brand-new, second volume of *The Handbook of Historical Linguistics* is a complement to the well-established first volume first published in 2003. It includes extended content allowing uniquely comprehensive coverage of the study of language(s) over time. Though it adds fresh perspectives on several topics previously treated in the first volume, this *Handbook* focuses on extensions of diachronic linguistics beyond those key issues. Written by leading scholars in their respective fields, new chapters are offered on matters such as the origin of language, evidence from language for reconstructing human prehistory, invocations of language present in studies of language past, benefits of linguistic fieldwork for historical investigation, ways in which not only biological evolution but also field biology can serve as heuristics for research into the rise and spread of linguistic innovations, and more.

A Companion to American Literature and Culture

Paul Lauter

This expansive volume provides a set of fresh perspectives, some related, some dissonant, on the wealth of texts produced in and around what is now the United States. Written by experts in the field, the Companion embraces the many different voices that constitute American literature, from slave narratives and oral tales to regional writing and literature of the environment. It demonstrates that American literature was multicultural before Europeans arrived on the continent, and even more so thereafter. The three sections of the book offer three distinctive paradigms for thinking about American literature.

A Companion to The American Short Story

Alfred Bendixen & James Nagel

A Companion to the American Short Story traces the development of this versatile literary genre over the past two centuries. Written by leading critics in the field, and edited by two major scholars, it explores a wide range of writers, from Edgar Allen Poe and Edith Wharton, at the end of the nineteenth century to important modern writers such as Ernest Hemingway, William Faulkner, F. Scott Fitzgerald, and Richard Wright. Contributions with a broader focus address groups of multiethnic, Asian, and Jewish writers. Each chapter places the short story into context, focusing on the interaction of cultural forces and aesthetic principles.

30 Great Myths About Chaucer

Thomas Prendergast & Stephanie Trigg

This unique text offers original insights on the character of Chaucer, the nature of his works, the myths that inform our conceptions of Chaucer, and the underlying causes of these myths. Each accessible and engaging chapter focuses on a specific myth, including those surrounding Chaucer's romantic life, political leanings, religious views, personal struggles, financial challenges, ideas about chivalry, representations of social class, and many others. More than simply correcting inaccurate facts or clarifying common misconceptions about Chaucer, the text delves deeper to address how the myths have shaped the critical interpretation and enduring literary legacy of Chaucer.

A Concise Companion to the Study of Manuscripts, Printed Books, and The Production of Early Modern Texts

Edward Jones

Through a series of case studies by leading international scholars, this Concise Companion demonstrates how manuscripts and printed books collaborated to create the literary achievements of the Renaissance. The Companion is divided into three sections, covering archival and manuscript studies; the provenance of texts and the authority of editions; and studies of genre, architecture, religion and literary history. The selection of essays is exceptionally broad, with some introducing material that involves the recovery of four hundred year old archival documents

Herman Melville

A Half Known Life 2 Volume Set

John Bryant

Herman Melville: A Half Known Life, Volumes 1 and 2, follows Herman Melville's life from early childhood to his astonishing emergence as a bestselling novelist with the publication of *Typee* in 1846. These volumes comprise the first half of a comprehensive biography on Melville, grounded in archival research, new scholarship, and incisive critical readings. Author John Bryant, a distinguished Melville scholar, editor, critic, and educator, traces the events and experiences that shaped the many-stranded consciousness of one of literature's greatest writers. This in-depth and innovative biography covers Melville's family history and literary friendships, his father-longing, god-hunger, and search for the hidden nature of Being, the genesis of his liberal politics, his empathy for African Americans, Native Americans, Polynesians, South Americans, and immigrants.

LITERATURE SPECIAL TOPICS

Michel Houellebecq
In the
Presence of
Schopenhauer

In The Presence of Schopenhauer*Michel Houellebecq*

The work of Michel Houellebecq – one of the most widely read and controversial novelists of our time – is marked by the thought of Schopenhauer. Houellebecq found in Schopenhauer – the radical pessimist, the chronicler of human suffering, the lonely misanthrope – a powerful conception of the human condition and of the future that awaits us, and when Houellebecq's first writings appeared in the early 1990s, the influence of Schopenhauer was everywhere apparent. But it was only much later, in 2005, that Houellebecq began to translate and write a commentary on Schopenhauer's work. He thought of turning it into a book but soon abandoned the idea and the text remained unpublished until 2017. Now available in English for the first time, *In the Presence of Schopenhauer* is the story of a remarkable encounter between a novelist and a philosopher and a testimony to the deep and enduring impact of Schopenhauer's philosophy on one of France's greatest living writers.

AESTHETICS

**Aesthetics****A Comprehensive Anthology, 2nd Edition***Steven Cahn, Aaron Meskin & Sandra L. Shapshay*

Aesthetics: A Comprehensive Anthology offers a well-rounded and thorough introduction to the evolution of modern thought on aesthetics. In a collection of over 60 readings, focused primarily on the Western tradition, this text includes works from key figures such as Plato, Hume, Kant, Nietzsche, Danto, and others. The new second edition has been updated with contemporary essays, expanding the volume's coverage to include the value of art, artistic worth and personal taste, questions of aesthetic experience, and contemporary debates on and new theories of art. This edition also incorporates new and more standard translations of Kant's *Critique of the Power of Judgment* and Schopenhauer's *The World as Will and Representation*, as well as texts by Rousseau, Hegel, DuBois, Alain Locke, Budd, Robinson, Saito, Eaton and Levinson.

CONTINENTAL PHILOSOPHY

**Excluding The Jew Within Us***Jean-Luc Nancy*

Why does anti-Semitism seem to be so deeply engrained in our societies, our institutions and our attitudes? To answer this question we need to look beyond our current practices and see that anti-Semitism has much deeper roots – that it is woven into the very structures of Western thought. Jean-Luc Nancy argues that anti-Semitism emerged from the conflictual conjunction of two responses to the eclipse of archaic cultures. The Greek and the Jewish responses both affirmed a humanity freed from myth but put forward two very different conceptions of autonomy: on the one hand, the infinite autonomy of knowledge, of logos, and on the other, the paradoxical autonomy of a heteronomy guided by a hidden god. The first excluded the second while simultaneously absorbing and dominating it; the second withdrew into itself and its condition of exclusion and domination. How could the long and terrible history of the hatred of the Jew, masking a self-loathing, be generated by these intrinsically contradictory beginnings? That is the question to which this short book gives a compelling answer.

GENERAL PHILOSOPHY

Kracauer A Biography

Jörg Später

Siegfried Kracauer was one of the most important German thinkers of the twentieth century. His writings on Weimar culture, mass society, photography and film were groundbreaking and they anticipated many of the themes later developed members of the Frankfurt School and other cultural theorists. No less remarkable were the circumstances under which he made these contributions. After his early years as a journalist in Germany, the rise of the Nazis forced Kracauer into exile – first in Paris and then, after a protracted flight via Marseilles and Lisbon, to the United States. The existential challenges, personal losses and unrelenting hardship Kracauer faced during these years of exile formed the backdrop against which he offered his acute observations of modern life. Jörg Später provides the first comprehensive biography of this extraordinary man.

Reading Philosophy Selected Texts with A Method for Beginners, 2nd Edition

Samuel Guttenplan, Jennifer Hornsby, Christopher Janaway & John Schwenkler

Reading Philosophy: Selected Texts with a Method for Beginners, Second Edition, provides a unique approach to reading philosophy, requiring students to engage with material as they read. It contains carefully selected texts, commentaries on those texts, and questions for the reader to think about as she reads. It serves as starting points for both classroom discussion and independent study. The texts cover a wide range of topics drawn from diverse areas of philosophical investigation, ranging over ethics, metaphysics, epistemology, philosophy of mind, aesthetics, and political philosophy. This edition has been updated and expanded. New chapters discuss the moral significance of friendship and love, the subjective nature of consciousness and the ways that science might explore conscious experience.

The Power of Art

Markus Gabriel

We live in an era of aesthetics. Art has become both pervasive and powerful – it is displayed not only in museums and galleries but also on the walls of corporations and it is increasingly fused with design. But what makes art so powerful, and in what does its power consist? According to a widespread view, the power of art – its beauty – lies in the eye of the beholder. What counts as art appears to be a function of individual acts of evaluation supported by powerful institutions. On this account, the power of art stems from a force that is not itself aesthetic, such as the art market and the financial power of speculators. Art expresses, in a disguised form, the power of something else – like money – that lies behind it. In one word, art has lost its autonomy. In this short book, Markus Gabriel rejects this view. He argues that art is essentially uncontrollable. It is in the nature of the work of art to be autonomous to such a degree that the art world will never manage to overpower it. Ever since the cave paintings of Lascaux, art has taken hold of the human mind and implemented itself in our very being. Thanks to the emergence of art we became human beings, that is, beings who lead their lives in light of an image of the human being and its position in the world and in relation to other species. Due to its structural, ontological power, art itself is and remains radically autonomous. Yet, this power is highly ambiguous, as we cannot control its unfolding.

METAPHYSICS

A Companion to Relativism

Steven D. Hales

Relativism is one of philosophy's oldest – and most polarizing – concepts. It has captivated thinkers since the days of Protagoras (who supported the notion) and Plato (who did not). In the past decade, even its staunchest philosophical critics have come to realize that relativism is a legitimate option for explaining a variety of phenomena. Reflecting this overdue reappraisal, *A Companion to Relativism* presents the latest thinking on the role of relativism in the philosophy of language, epistemology, ethics, philosophy of science, logic, and metaphysics.

Philosophy Smackdown

Douglas Edwards

From its carnival origins to its current status as a global phenomenon, pro wrestling has a unique presence in popular culture. Part sport and part theatre, the impressive antics of its larger-than-life characters have captured the imaginations of generations of fans, and prompted endless speculation about behind-the-scenes machinations. *Philosophy Smackdown* is a study of pro wrestling as distinctive as pro wrestling itself: it is the first philosophical look at this major cultural spectacle. Philosopher and fan Douglas Edwards takes both philosophy and pro wrestling to parts unknown. With liveliness, humor and insight, he shows that pro wrestling is fertile ground for reflection on fundamental human issues, such as reality, freedom, identity, morality, justice, and meaning. He explores these through pivotal events in pro wrestling, from the eighties heyday of Hulkamania to the recent emergence of AEW. *Philosophy Smackdown* is a read that will delight philosophers and pro wrestling fans alike. It's time to ask yourself: Whatcha gonna do when *Philosophy Smackdown* runs wild on you?

PHILOSOPHY OF MIND

The Carousel of Time

Theory of Knowledge and Acceleration of Time

Bernard Ancori

Based around the image of a carousel, this book uses epistemological theory to tackle the paradoxical acceleration and deceleration of time that is experienced by many. The consequence of this paradox is the observance of the past, present and future coinciding, where acceleration is combined with perfect immobility. *The Carousel of Time* proposes a model that focuses on a complex network of individual actors, and their relation to the analysis, structure and evolution of our socio-cognitive space-time. The first part of the book, "Foundations", presents the key bases of this model, as well as the notions that must be understood and integrated. The book then analyzes the concept of "Space", defining the parameters of the network's boundaries, and finishes with an exploration of "Time". This third part links the temporality of the network to its spatial characteristics and studies its evolution.

COMPARATIVE POLITICS

China Goes Green

Coercive Environmentalism for a Troubled Planet

Yifei Li & Judith Shapiro

What does it mean for the future of the planet when one of the world's most durable authoritarian governance systems pursues "ecological civilization"? Despite its staggering pollution and colossal appetite for resources, China exemplifies a model of state-led environmentalism which concentrates decisive political, economic, and epistemic power under centralized leadership. On the face of it, China seems to embody hope for a radical new approach to environmental governance. In this thought-provoking book, Yifei Li and Judith Shapiro probe the concrete mechanisms of China's coercive environmentalism to show how 'going green' helps the state to further other agendas such as citizen surveillance and geopolitical influence. Through top-down initiatives, regulations, and campaigns to mitigate pollution and environmental degradation, the Chinese authorities also promote control over the behavior of individuals and enterprises, pacification of borderlands, and expansion of Chinese power and influence along the Belt and Road and even into the global commons.

Peers And Politics, C. 1650-1850

Essays In Honour of Clyve Jones

Richard A. Gaunt, David W. Hayton

During a long career of research and publication in 17th- and 18th-century parliamentary history Clyve Jones has made an incomparable contribution to our understanding of the history of the Westminster house of lords – its politics, procedures and business – and to the history of the English and Scottish peerage more generally. This volume of essays, written in tribute by friends and fellow historians of the Lords, examines aspects of the political activities and social lives of the peerage between c. 1650 and c. 1850, following up many of the themes reflected in Clyve's own writings. There is a particular focus on the period between the Glorious Revolution and the fall of Walpole, with several articles on the Scottish contingent in the Upper House, of which he has made a particular study, but the period covered stretches well into the 19th century and the subjects discussed include not only parliamentary management, but the electioneering activities of aristocratic magnates, and the contribution of aristocratic women to the political world of late Stuart England.

Remaking One Nation

Conservatism in an Age of Crisis

Nick Timothy

In this ground-breaking book, Nick Timothy, one of Britain's leading conservative thinkers and commentators, explores the powerful forces driving great changes in our economy, society and democracy. Drawing on his experience at the top of government, Timothy traces the crisis of Western democracy back to both the mistaken assumptions of philosophical liberalism and the rise of ideological ultra-liberalism on left, right and centre. Sparing no sacred cows, he proposes a new kind of conservatism that respects personal freedom but also demands solidarity. He argues that only by rediscovering a unifying sense of the common good and restoring a mutual web of responsibilities between all citizens and institutions can we reject the extremes of economic and cultural liberalism, overcome our divisions, and remake one nation. He goes on to outline an ambitious practical plan for change, covering issues ranging from immigration to the regulation of Big Tech.

Should Auld Acquaintance Be Forgot

The Great Mistake of Scottish Independence

John Lloyd

The Scottish nationalists seek to end the United Kingdom after 300 years of a successful union. Their drive for an independent Scotland is now nearer to success than it has ever been. Success would mean a diminished Britain and a perilously insecure Scotland. The nationalists have represented the three centuries of union with England as a malign and damaging association for Scotland. The European Union is held out as an alternative and a safeguard for Scotland's future. But the siren call of secession would lure Scotland into a state of radical instability, disrupting ties of work, commerce and kinship and impoverishing the economy. All this with no guarantee of growth in an EU now struggling with a downturn in most of its states and the increasing disaffection of many of its members. In this incisive and controversial book, journalist John Lloyd cuts through the rhetoric to show that the economic plans of the Scottish National Party are deeply unrealistic and is no more than an aspiration with little prospect of success.

The End of The Second Reconstruction

Richard Johnson

Democracy in the United States is under threat. The Trump administration's attack on the legacy of the civil rights movement is undermining America's claims to be a multi-racial democracy. This moment of peril has worrying parallels with a previous era of American history. The gains of the Reconstruction era after the civil war, which saw African Americans given full democratic rights, were totally reversed within a generation. There is a serious risk that the advances of the civil rights era – the 'Second Reconstruction' – will go the same way unless we learn from the past and appreciate that American democracy has never been a story of linear progress. Skilfully analysing the similarities – and the differences – between the 1870s and the 2010s, Johnson outlines a political strategy for avoiding a disastrous repetition of history in the twilight of the Second Reconstruction. Anyone interested in seeing the Trump presidency in wider historical context, from students of race, politics and history in the US to the interested general reader, will find this book an essential and sobering guide to our past – and, if we're not careful, our future.

**Combatting Modern Slavery****Why Labour Governance is Failing and What We Can Do About It***Genevieve LeBaron*

Over the last decade, the world's largest corporations – from The Coca Cola Company to Amazon, Apple to Unilever – have taken up the cause of combatting modern slavery. Yet, by most measures, across many sectors and regions, severe labour exploitation continues to soar. Why? In this landmark book, Genevieve LeBaron lifts the lid on a labour governance regime that is severely flawed and limited. She takes a close-up look at the millions of corporate dollars spent on anti-slavery networks, NGO partnerships, lobbying for new transparency legislation, and investment in social auditing and ethical certification schemes, to show how such efforts serve to bolster corporate growth and legitimacy as well as government reputations, whilst failing to protect the world's most vulnerable workers.

**Food****3rd Edition***Jennifer Clapp*

We all need food to survive, and forty percent of the world's population relies on agriculture for their livelihood. Yet control over food is concentrated in relatively few hands. Turmoil in the world food economy in recent decades has highlighted a number of vulnerabilities and contradictions inherent in the way we currently organize this vital sector. Extremes of both undernourishment and overnourishment affect a significant proportion of humanity. And attempts to increase production through the spread of an industrial model of agriculture has resulted in serious ecological consequences. The fully revised and expanded third edition of this popular book explores how the rise of industrial agriculture, corporate control, inequitable agricultural trade rules, and the financialization of food have each enabled powerful actors to gain fundamental influence over the practices that dominate the world food economy and result in uneven consequences for both people and planet.

POLITICAL PHILOSOPHY & THEORY

**How Should Democracies Fight Terrorism?***Patti Tamara Lenard*

In the wake of major terrorist attacks, calls for ever more draconian policies to prevent further outrages are common. Such responses raise the pressing question: is it possible to effectively fight terrorism while respecting democratic values of equality and trust? Examining recent examples of terrorist atrocities – from the murder of Muslims in New Zealand and Jews in Pittsburgh to the Charlie Hebdo attacks – Patti Tamara Lenard considers how democracies should tackle terrorism within the constraints imposed by democratic principles. For many, the tension between liberty and security necessarily means that the only way to protect security is to sacrifice liberty – but Lenard rejects this claim, and instead argues that security's goal should be to keep all citizens equally secure in the face of terrorist threats. Critiquing existing policies, from exile to racial profiling, she outlines what ethical counter-terrorism policies should look like, arguing for strategies that respect equality and thereby maintain trust among diverse communities in democratic states. This erudite guide to how states might ethically fight terrorism will be essential reading for any student or scholar of public affairs, security, counter-terrorism, and democratic governance.

Marranos

The Other of The Other

Donatella Di Cesare

Marranos were Spanish or Portuguese Jews living in the Iberian Peninsula who converted to Christianity to avoid being massacred or forced to flee following the expulsion of Jews and Muslims from Spain in 1391 but they continued to practice Judaism in secret. They outwardly embraced Catholicism but preserved Judaism in their hearts. While the Marranos are commonly associated with the persecution of Jews at the time of the Spanish Inquisition, Donatella Di Cesare sees the Marranos as the quintessential figure of the modern condition: the Marranos were not just those that modernity has cast out as the 'other', but were those 'others' who were forced to disavow their beliefs and conceal themselves. But this double life of the Marrano turned out also to be a secret source of strength. Doubly estranged, with no possibility of redemption, the Marrano was the protagonist not only of an external emigration but also of an internal migration: the exploration of the inner territory of the self and a predisposition towards radical thinking that would become hallmarks of modernity.

Migrants and Militants

Alain Badiou

The question of migration has come to dominate the news agenda in many countries, but what does the word 'migrant' really mean today and how should we respond to those who are labelled 'migrants'? In this short book Alain Badiou argues that our way of thinking about migration should be governed both by an ethical duty to welcome the migrant in the name of hospitality and also by the urgent need to put an end to the global capitalist oligarchy that has produced the migrant as a figure of contemporary crisis. For the 'migrant,' argues Badiou, is in fact a nomadic proletarian. Today, our homeland is the world, and any meaningful politics must include those who come to us and who represent the universal nomadic proletariat. Writing with the rigor, clarity, and polemical flair that have made him one of the world's most influential philosophers, and drawing on a rich body of material including contemporary poetry and the words of an anonymous migrant, Badiou develops a powerful riposte to those who have stoked the fear of migrants and exploited the migration question for political ends.

Property

Robert Lamb

Few political ideas are as divisive and controversial for some – and yet taken for granted by others – as the ownership of private property. For critics, property is institutionalised theft, responsible for lamentable levels of inequality and poverty; for its defenders, private ownership is a fundamental right that protects individual freedom and ensures wider economic benefits for the community. In this book, Robert Lamb explores philosophical arguments deployed to conceptualise, justify, and criticize private property ownership. After explaining what the right to ownership means, he introduces the radical case against property, as put by anarchist and socialist writers like Proudhon and Marx. He goes on to outline possible responses to this radical critique – through discussions and assessments of the various defences of property advanced by Locke, Hume, Hegel, J.S. Mill, and Nozick – before considering how more recent theorists, such as John Rawls and Elinor Ostrom, push us to rethink the nature of ownership in a democratic society.

What Do We Owe to Refugees?

David Owen

Who are refugees? Who, if anyone, is responsible for protecting them? What forms should this protection take? In a world of people fleeing from civil wars, state failure, and environmental disasters, these are ethically and politically pressing questions. In this book, David Owen reveals how the contemporary politics of refuge is structured by two rival historical pictures of refugees. In reconstructing this history, he advocates an understanding of refugeehood that moves us beyond our current impasse by distinguishing between what is owed to refugees in general and what is owed to different types of refugee. He provides an account of refugee protection and the forms of international cooperation required to implement it that is responsive to the claims of both refugees and states.

What Times Are We Living In?

A Conversation With Eric Hazan

Jacques Rancière

In this short book, Jacques Rancière takes stock of the state of contemporary politics and examines current developments in the light of his writings. Rancière takes issue with what he sees as the consolidation in recent years of an increasingly oligarchic class of professional politicians within the system of representative democracy, while simultaneously objecting to leftist animosity towards electoral politics. He discusses a wide range of contemporary political movements and figures, from Nuit debout and Marine le Pen to Occupy, Trump, Syriza and Podemos, and he offers a trenchant critique of a variety of ideas and thinkers associated with radical politics, such as the ideas of immaterial labour and cognitive capitalism and the concept of insurrection put forward by the Invisible Committee. But above all he talks about the time in which it makes sense to talk about all this, a time for which history has made no promises and the past has left no lessons, only moments to be extended as far as possible.

Handbook of What Works With Sexual Offenders

Jean Proulx, Franca Cortoni, Leam A. Craig & Elizabeth J. Letourneau

This new title in the *What Works in Offender Rehabilitation* series of handbooks reviews and brings up to date the 'What Works' literature in sexual offender theory, assessment, rehabilitation, risk management, prevention and policy. By evaluating current assessment frameworks and intervention programmes, it not only discusses theory and treatment efficacy but provides professionals with an evidence-based approach to the management and rehabilitation of individuals who have sexually offended, and the prevention of sexual abuse perpetration. Empirical findings of treatment effectiveness are presented and discussed by renowned international researchers and clinicians from around the world. The conceptual and theoretical material is presented with a strong emphasis on how it should be translated into real-world policy and practice in order to reduce re-offending effectively.

Psycho-Criminological Approaches to Stalking Behavior

An International Perspective

Lorraine Sheridan & Oliver Chan

The goal of this edited volume is to offer a comprehensive and up-to-date discussion of relevant topics in the area of stalking perpetration and victimization. We see this text as an important piece of work covering two major aspects. First and most importantly, the chapters are contributed by scholars and practitioners from many countries, encompassing different regions of the world (e.g., Asia, Australasia, North America, Europe, and Africa). To our knowledge, this is the first work to offer an international (or global) approach to exploring different topics on stalking perpetration and victimization. A second major highlight is an examination of stalking from both theoretical (i.e., empirical research) and practical (i.e., practice and policy) perspectives. Hence, it will be a useful text and reference source for academics, students and a range of field practitioners.

The Object Relation

The Seminar of Jacques Lacan, Book IV

Jacques Lacan & Jacques-Alain Miller

An examination of phobia and fetishism by the greatest psychoanalyst since Freud. 'It's no accident that what has been perceived but dimly, yet perceived nevertheless, is that castration bears just as much relation to the mother as to the father. We can see in the description of the primordial situation how maternal castration implies for the child the possibility of devoration and biting. In relation to this anteriority of maternal castration, paternal castration is a substitute.' Extract from Chapter XXI.

The Sociological Interpretation of Dreams

Bernard Lahire & Helen Morrison

For Freud, dreams were the royal road to the unconscious: through the process of interpretation, the manifest and sometimes bewildering content of dreams can be traced back to the unconscious representations underlying it. But can we understand dreams in another way by considering how the unconscious is structured by our social experiences? This is hypothesis that underlies this highly original book by Bernard Lahire, who argues that dreams can be interpreted sociologically by seeing the dream as a nocturnal form of self-to-self communication. Lahire rejects Freud's view that the manifest dream content is the result of a process of censorship: as a form of self-to-self communication, the dream is the symbolic arena most completely freed from all forms of censorship. In Lahire's view, the dream is a message which can be understood only by relating it to the social world of the dreamer, and in particular to the problems that concern him or her during waking life.

The Wiley Encyclopedia of Personality and Individual Differences, 4-Vol Set

The Wiley Encyclopedia of Personality and Individual Differences, 4-Vol Set

Bernardo Carducci

The Encyclopedia of Personality and Individual Differences (EPID) is organized into four volumes that look at the many likenesses and differences between individuals. Each of these four volumes focuses on a major content area in the study of personality psychology and individuals' differences. The first volume, *Models and Theories*, surveys the significant classic and contemporary viewpoints, perspectives, models, and theoretical approaches to the study of personality and individuals' differences (PID). The second volume on *Measurement and Assessment* examines key classic and modern methods and techniques of assessment in the study of PID. Volume III, titled *Personality Processes and Individuals Differences*, covers the important traditional and current dimensions, constructs, and traits in the study of PID. The final volume discusses three major categories: clinical contributions, applied research, and cross-cultural considerations, and touches on topics such as culture and identity, multicultural identities, cross-cultural examinations of trait structures and personality processes, and more.

PSYCHOTHERAPY & COUNSELING

Introducing Cognitive Analytic Therapy

Principles and Practice of A Relational Approach to Mental Health, 2nd Edition

Anthony Ryle & Ian B. Kerr

Introducing Cognitive Analytic Therapy: Principles and Practice of a Relational Approach to Mental Health, 2nd Edition starts with a brief account of the scope and focus of CAT and how it evolved and explains the main features of its practice. It next offers a brief account of a relatively straightforward therapy to give readers a sense of the unfolding structure and style of a time-limited CAT. Following that are chapters that consider the normal and abnormal development of the Self and that introduce influential concepts from Vygotskian, Bakhtinian and developmental psychology. Subsequent chapters describe selection and assessment; reformulation; the course of therapy; the 'ideal model' of therapist activity and its relation to the supervision of therapists; applications of CAT in various patient groups and settings and in treating personality type disorders; use in 'reflective practice'; a CAT perspective on the 'difficult' patient; and systemic and 'contextual' approaches.

BIBLICAL STUDIES

1, 2 Peter and Jude Through The Centuries

Rebecca Skaggs

1, 2 Peter and Jude Through the Centuries considers three small epistles which are often overlooked in controversial discussions of theology, culture, art, music, politics, and literature. This book offers fresh perspectives on the epistles' effects in numerous theological and cultural contexts such as slavery, the role of women in marriage, the nature of Christology, and how believers should relate to the government. Author Rebecca Skaggs traces the reception history of 1 Peter, Jude, and 2 Peter and investigates the texts' effects on diverse doctrinal, social and political issues. Their influence on artists, musicians, dramatists and literary writers is explored, especially the Doctrine of the Descent of Christ into Hades. Each chapter includes an overview of central issues and topics, a selection of ancient readings with interpretations and a brief survey of modern scholarship on the subject.

The Acts of the Apostles Through the Centuries

Heidi Hornik & Mikeal C. Parsons

Profoundly scholarly and compellingly revealing, this new addition to the Blackwell Bible Commentaries series shows how the reception of *Acts of the Apostles*, Luke's second volume, acts as a bifurcated lens illuminating not just the biblical text itself but also the attitudes of those interpreting it. The authors journey far beyond their analysis of the exegesis of Acts, tracing its influence on art and music, and charting the ways in which Luke's volume has guided the evangelism, worship practices, and institutions of ecclesiastical communities across the centuries.

RELIGIOUS STUDIES

Religious Ethics

Meaning and Method

William Schweiker & David A. Clairmont

Rather than merely applying existing forms of philosophical ethics, *Religious Ethics* defines the meaning of the field and presents a distinct and original method for ethical reflection through comparisons of world religious traditions. Written by leading scholars and educators in the field, this unique volume offers an innovative approach that reveals how religions concur and differ on moral matters, and provides practical guidance on thinking and living ethically. First introducing the task of religious ethics, the book moves through each of the five dimensions of reflection to compare concepts such as good and evil, perplexity and wisdom, truth and illusion, and freedom and bondage in various theological contexts.

GENERAL SELF-HELP

Adding Value

Mark Carter

Take a moment to listen and you will hear the word ‘value’ at the core of many of the conversations around you – whether this applies to yourself, others, the community or in business. We should all be ‘adding value’, ‘being authentic’, ‘connecting with people’, however, often when you look up close, the opposite is often true. When we bias one set of values, we alienate others; and winning-at-all-costs will no longer cut it – as seen in the Banking Royal Commission, or Belle Gibson saga. Value is at the heart of all decision-making and personal choices and as such, determines our impact. Without a complete sense of our value, we are unprepared and unskilled to manage the challenges of today and tomorrow. This book provides readers with a framework to integrate their values across all their dimensions of their lives, to achieve unprecedented satisfaction, success, impact and legacy.

Useful Belief

Because It's Better Than Positive Thinking

Chris Helder

Useful Belief turns the «be positive» industry upside down with a fresh and modern approach to achievement. Sometimes things in life are not positive. Sometimes bad things happen to good people. If you've had a nightmare of a year, the last thing you want to hear is «Be positive!» Instead, you need an actual strategy to dig yourself out, and a truly useful guidebook to show you where to go next. This is that guidebook.

Through the engaging tale of a business traveller and the three significant encounters on his journey, this book takes you on a journey of your own - to self awareness, and an improved approach to business, parenting and relationships. You'll learn how thinking "useful" is better than thinking "positive", and you'll uncover the utility of your past, present and future challenges. You'll undergo a major shift in the way you solve your problems, and you'll learn how to navigate your way out of ambiguity and toward success.

GENERAL SOCIOLOGY

Bauman

Bauman

A Biography

Izabela Wagner

Global thinker, public intellectual and world-famous theorist of 'liquid modernity', Zygmunt Bauman (1925–2017) was a scholar who, despite forced migration, built a very successful academic career and, after retirement, became a prolific and popular writer and an intellectual talisman for young people everywhere. This is the first comprehensive biography of Zygmunt Bauman. It chronicles Bauman's entire life and career, from early life and young adulthood in Poland, his exile in Israel and the UK, to his successful academic career and prolific retirement. Drawing on archival material in Poland, on numerous interviews with those who knew and worked with Bauman and on a private and never-published memoir that Bauman wrote for his daughters, this careful and thorough account will be the standard biography of his life and work for years to come.

POLITICAL SOCIOLOGY

Public Opinion

David L. Weakliem

Is political polarization on the rise? Do various "populist" movements have anything in common? Is the opposition between left and right becoming obsolete and, if so, what might replace it? Many of the most pressing questions about contemporary politics involve public opinion. This incisive sociological introduction considers the formation of opinions as not just a matter of individual responses to external conditions, but as a social process in which people influence and are in turn influenced by others. David L. Weakliem illustrates how changes in economic and social conditions affect public opinion and how the distribution of opinions is shaped by the structure of interaction among people. Combining theory with up-to-date information on public opinion, the book will be of interest to researchers and students alike in sociology, political science, and communication studies.

The New Latin America

Fernando Calderón & Manuel Castells

The transformation of Latin America has been shaped by social movements and political conflicts. The neoliberal model that dominated the first stage of the transformation induced widespread inequality and poverty, and triggered social explosions that led to its own collapse. A new model, neo-developmentalism, emerged from these crises as national populist movements were elected to government in several countries. The more the state intervened in the economy, the more it became vulnerable to corruption, until the rampant criminal economy came to penetrate state institutions. Upper middle classes defending their privileges and citizens indignant because of corruption of the political elites revolted against the new regimes, undermining the model of neo-developmentalism. This book, written by two leading scholars of Latin America, provides a comprehensive and up-to-date account of the new Latin America that is in the process of taking shape today.

POPULATION & DEMOGRAPHY

Is Free Speech Racist?

Gavan Titley

The question of free speech is never far from the headlines and frequently declared to be in crisis. Starting from the observation that such debates so often focus on what can and cannot be said in relation to *race*, Gavan Titley asks why racism has become so central to intense disputes about the status and remit of freedom of speech. *Is Free Speech Racist?* moves away from recurring debates about the limits of speech to instead examine how the principle of free speech is marshalled in today's multicultural and intensively mediated societies. This involves tracing the ways in which free speech has been mobilized in far-right politics, in the recycling of 'race realism' and other discredited forms of knowledge, and in the politics of immigration and integration. Where there is intense political contestation and public confusion as to what constitutes racism and who gets to define it, 'free speech' has been adopted as a primary mechanism for amplifying and re-animating racist ideas and racializing claims. As such, contemporary free speech discourse reveals much about the ongoing life of race and racism in contemporary society.

The Colonialism of Human Rights

Ongoing Hypocrisies of Western Liberalism

Colin Samson

This trenchant book brings human rights into conversation with the histories and afterlives of Western colonialism and slavery. Colin Samson examines the paradox that the nations that credit themselves with formulating universal human rights were colonial powers, settler colonists and sponsors of enslavement. Vivid illustrations and case studies of racial exceptions to human rights are drawn from the afterlives of the enslaved and colonized, as well as recent events such as American police killings of black people, the treatment of Algerian *harkis* in France, the Windrush scandal in Britain and the militarized suppression of the Standing Rock Water Protectors movement. Advocating for reparative justice and indigenizing law, Samson argues that such events are not a failure of liberalism so much as an inbuilt racial dynamic of it.

Concepts of The Self

4th Edition

Anthony Elliott

This new, updated edition provides a lively, lucid and compelling introduction to contemporary controversies over the self and self-identity in the social sciences and humanities. In an accessible and concise format, the book ranges from classical intellectual traditions of symbolic interactionism, psychoanalysis and Foucauldian theory, through feminism and postfeminism, to postmodernism and the mobilities paradigm. With characteristic verve and clarity, Anthony Elliott explores the relationship between power, identity and personhood, connecting varied theoretical debates directly to matters of contemporary relevance and urgency, such as identity politics, the sociology of personal relationships and intimacy, and the politics of sexuality. This edition also includes a new chapter on the digital revolution, which situates the self and work/life transformations within the context of AI, Industry 4.0, advanced robotics and accelerating automation.

SOCIAL THEORY

**Cryptocommunism***Mark Alizart*

Cryptocurrencies are often associated with right-wing political movements, or even with the alt-right. They are the preserve of libertarians and fans of Ayn Rand and Friedrich Hayek. With their promotion of anonymity and individualism, there's no doubt that they seamlessly slot into the prevailing anti-State ideology. But in this book Mark Alizart argues that the significance of cryptocurrencies goes well beyond cryptoanarchism. In so far as they allow us 'to appropriate collectively the means of monetary production', to paraphrase Marx, and to replace 'the government of persons by the administration of things', as Engels advocated, they form the basis for a political regime that begins to look like a communism which has at last come to fruition – a cryptocommunism.

**Society of Singularities***Andreas Reckwitz*

In this major new book, Andreas Reckwitz examines the causes, structures and consequences of the society of singularities in which we now live. The transformation from industrial to cultural capitalism, the rise of digital technologies and their 'culture machine' and the emergence of an educated, urban new middle class form a powerful engine for the singularization of the social. In late modernity, what is singular is valorized and stirs the emotions, while what is general has to remain in the background, and this has profound social consequences. The society of singularities systematically produces devaluation and inequality: winner-takes-all markets, job polarization, the neglect of rural regions and the alienation of the traditional middle class. The emergence of populism and the rise of aggressive forms of nationalism which emphasize the cultural authenticity of one's own people thus turn out to be the other side of singularization.

SOCIOLOGY OF ECONOMICS

**Wealth***Yuval Elmelech*

In accessible prose, Yuval Elmelech explains how, both conceptually and empirically, wealth differs fundamentally from other conventional measures of socioeconomic status and why it has become increasingly important, in recent years especially, to our understanding of inequality and social mobility. Crucially, Elmelech presents a dynamic sociological framework that illuminates the extent to which cumulative advantages and disadvantages of the family life course are shaped by a complex interplay of multiple markets, changing demographic landscapes, and social contexts associated with group membership (for instance race, ethnicity, gender, and religious affiliations). Blending theoretical approaches with empirical studies, and macro-level contexts with meso-level processes, this book offers an astute guide for thinking about and interrogating wealth as a social fact and the scope of its role in inequality, as well as other social and demographic trends.

SOCIOLOGY OF HEALTH & ILLNESS

**Digital Health
Sociological Perspectives***Flis Henwood & Benjamin Marent*

Including contributions from international scholars, papers in this collection explore diverse fields of healthcare (reproductive health, primary care, diabetes management, mental health) within which heterogenous technologies (health apps, mobile platforms, smart textiles, time-lapse imaging) are becoming increasingly embedded. They offer insights into the promissory discourses that constitute digital health and the ways in which knowledge, connectivity and power are re-configured in a range of situated health and care practices

Immigrant Labor and The New Precariat

Immigrant Labor and The New Precariat

Ruth Milkman

Immigration has been a contentious issue for decades, but in the twenty-first century it has moved to center stage, propelled by an immigrant threat narrative that blames foreign-born workers, and especially the undocumented, for the collapsing living standards of American workers. In this book, Ruth Milkman demonstrates that immigration is not the *cause* of economic precarity and growing inequality, as Trump and other promoters of the immigrant threat narrative claim. Rather, the influx of low-wage immigrants since the 1970s was a *consequence* of concerted employer efforts to weaken labor unions, along with neoliberal policies fostering outsourcing, deregulation, and skyrocketing inequality. These dynamics have remained largely invisible to the public. The justifiable anger of US-born workers whose jobs have been eliminated or degraded has been tragically misdirected, with even some liberal voices recently advocating immigration restriction. This provocative book argues that progressives should instead challenge right-wing populism, redirecting workers' anger toward employers and political elites, demanding upgraded jobs for foreign-born and US-born workers alike, along with public policies to reduce inequality.

Image Beyond the Screen

Projection Mapping

Daniel Schmitt, Marine Thébault & Ludovic Burczykowski

Videomapping with its use of digital images is an audiovisual format that has gained traction with the creative industries. It consists of projecting images onto diverse surfaces, according to their geometric characteristics. It is also synonymous with spatial augmented reality, projection mapping and spatial correspondence. *Image Beyond the Screen* lays the foundations for a field of interdisciplinary study, encompassing the audiovisual, humanities, and digital creation and technologies. It brings together contributions from researchers, and testimonials from some of the creators, technicians and organizers who now make up the many-faceted community of videomapping.

Prospective Philosophy of Software

A Simondonian Study

Coline Ferrarato

Computer software (operating systems, web browsers, word processors, etc.) structure our daily lives. Comprising both a user interface and the electronic circuits of the machine it is printed to, software represents a hybrid object at the crossroads of materiality and immateriality. But is it, strictly speaking, a "technical object"? By examining the status of software against the criteria of philosophy of classic techniques, in particular that of Gilbert Simondon, this book lays the groundwork of a philosophical reflection on this subject. Further, in order to help introduce readers to problematics, lines of code and explanatory schemas have been provided.

The World's Construction Mechanism

Trajectories, Imbalances and The Future of Societies

Jacques Barnouin

The interdisciplinarity between the biological and human sciences is here to serve a daring objective: to decipher, by means of a logical chain, the explanatory factors of human trajectories and imbalances between societies and nations. To do this, *The World's Construction Mechanism* is based on an unprecedented analysis of the dynamics of the human species, combining the contributions of anthropology, archeology, biology, climatology, economics, geography, history and sociology. This book analyzes the roots of societal disharmony and presents ways of realizing a clear-sighted human project that is in step with the general interest of humanity.
