**Ecodesign and Ecoinnovation in the Food Industries**

Gwenola Yannou-Le Bris, Hiam Serhan, Sibylle Duchaine, Jean-Marc Ferrandi &amp; Gilles Trystram

Innovations of agri-food systems during the last 50 years have been guided by a globalized agro-industrial paradigm, which has contributed to climate change, degradation of natural resources, soil depletion, social inequalities, loss of biodiversity and various food-related health problems. This book explains how to employ ecodesign in business models to address the economic, social, environmental, and nutritional problems that face the world's food systems. The lessons of the EcoTrophelia project – a unique program implemented by a group of European agricultural higher education institutions to involve students in designing and developing food ecoinnovation projects – are explored. Through an analysis of these projects, the authors describe the tools, methods and standards that were developed to institute ecodesign into the business models of 11 ecologically-friendly food products. This book provides operational good practices that can be implemented in educational programs and agri-food industries, to orient learning and practices towards greater sustainability.

## Prepare and Protect

Safer Behaviors in Laboratories and Clinical Containment Settings, 1st Edition

Sean Kaufman

Biological safety is a critical requirement when working with or around infectious disease agents. To prevent exposures and keep staff and patients safe, laboratories and health care facilities rely on personal protective equipment, standard operating procedures (SOPs), and engineering controls. In an instant, however, a single inappropriate human behavior can negate any of these safeguards. This reference provides an important call to action for anyone who relies on safety plans to consider carefully the humans who must follow those plans. Written by an expert in behavioral biosafety training, *Prepare and Protect* offers a common-sense program for addressing and reducing the risk factors of human behavior.
