Slum Acts

Slum Acts

Veena Das

A leading anthropologist examines the violence of everyday life in the slums of Delhi. *Slum Acts* provides a detailed analysis of the institutions of the state, particularly of policing and law in India. It argues that catastrophic events at the national level and the techniques of governance through which they are handled secrete forms of knowing that get embedded into the nooks and crannies of everyday life, eroding trust, sowing suspicions, and leading to an exhaustion of capacity for care. Yet the paths to survival honed within these spaces generate critique that compels us to ask how punishment and torture become routinized in democracies.

THE STRANGER AS MY GUEST

A Critical Anthropology of Hospitality

MICHEL AGIER

The Stranger as My Guest

A Critical Anthropology of Hospitality

Michel Agier

A well-argued case for a new hospitality policy that welcomes foreigners as guests rather than treating them as aliens or enemies. The migration crisis of recent years has elicited a double response: on the one hand, many states have responded by tightening border controls in an attempt to restrict population movements, while on the other hand, many citizens have responded by welcoming new arrivals, offering them shelter, food and whatever help they can provide. In so doing, they have awakened an old form of anthropology that was long-thought dead – that of hospitality.

As an anthropologist, Agier starts not from the concept but from the social reality: hospitality is fundamentally a social relationship, albeit an asymmetrical one, in which each party has rights and duties. It also involves institutions and networks which often provide the link between hosts and guests. He promotes the need for a new hospitality policy for the modern era, one that will regard hospitality as a right rather than a favour and regard strangers as guests rather than treating them as aliens or enemies.

GENERAL & INTRODUCTORY ANTHROPOLOGY

Correspondences

Tim Ingold

We inhabit a world of more than humans. For life to flourish, we must listen to the calls this world makes on us, and respond with care, sensitivity and judgement. That is what it means to correspond, to join our lives with those of the beings, matters and elements with whom, and with which, we dwell upon the earth. In this book, anthropologist Tim Ingold corresponds with landscapes and forests, oceans and skies, monuments and artworks. To each he brings the same spontaneity of thought and observation, the same intimacy and lightness of touch, but also the same affection, longing and care that, in the days when we used to write letters by hand, we would bring to our correspondences with one another. At a time of environmental crisis, when words so often seem to fail us, Ingold points to how the practice of correspondence can help restore our kinship with a stricken earth.

LINGUISTIC ANTHROPOLOGY

The International Encyclopedia of Linguistic Anthropology

3 Volume Set

James Stanlaw

Wiley Blackwell's *International Encyclopedia of Linguistic Anthropology* is a key scholarly reference for researchers working in linguistic anthropology, communication studies, education, psychology, and sociology, as well as those involved in language revitalization and other community and applied linguistics programs. The only encyclopedia of its kind, this field-encompassing work serves as an essential reference on the history, development, and modern advancements of the full field of linguistic anthropology. However, the encyclopedia is not limited to coverage of the standard canon, but rather is a forward-looking account of the field, addressing the latest–sometimes even controversial–issues in the discipline. With over 400 unique entries authored by leading international scholars, these three comprehensive volumes' key areas of content include language, thought, and culture; language evolution, acquisition and socialization; language ideologies; speech communities; language, race, and ethnicity; multilingualism and globalization; performance and verbal arts; and literacy and schooling.

SOCIAL & CULTURAL ANTHROPOLOGY

Mind and Spirit

A Comparative Theory

Tanya Marie Luhmann

Does the way we think about our minds matter? Our judgements about what counts as thought are so intimate that we may not even realize that we make them. But we do – and the way we make them has consequences for our sense of the real. The authors are a team of anthropologists and psychologists who worked together for two years across sites in the United States, Ghana, Thailand, China, and Vanuatu. They examine the cultural differences in the way social worlds represent ‘the mind’ – the local theories of mind – and that these differences affect whether and how people, for instance, hear the voices of the dead or feel the presence of God. *Mind and Spirit* discusses the ways people think about thought and interiority can alter human sensory experience itself.

ART HISTORY & THEORY

A Companion to Modern and Contemporary Latin American and Latina/o Art

Alejandro Anreus, Robin Greeley & Megan Sullivan

In-depth scholarship on the central artists, movements, and themes of Latin American art, from the Mexican revolution to the present. *A Companion to Modern and Contemporary Latin American and Latina/o Art* consists of over 30 never-before-published essays on the crucial historical and theoretical issues that have framed our understanding of art in Latin America. By providing in-depth explorations of central artists and issues, alongside cross-references to illustrations in major textbooks, this volume provides an excellent complement to wider surveys of Latin American and Latinx art. Readers will engage with the latest scholarship on each of five distinct historical periods, plus broader theoretical and historical trends that continue to influence how we understand Latinx, Indigenous, and Latin American art today.

ANCIENT & CLASSICAL HISTORY

A Companion to Ancient Agriculture

David Hollander & Timothy Howe

A Companion to Ancient Agriculture is an authoritative overview of the history and development of agriculture in the ancient world. Focusing primarily on the Near East and Mediterranean regions, this unique text explores the cultivation of the soil and rearing of animals through centuries of human civilization—from the Neolithic beginnings of agriculture to Late Antiquity. Thirty-one chapters written by the leading scholars in their fields present a multidisciplinary examination of the agricultural methods and influences that have enabled humans to survive and prosper.

Chronologically-organized chapters offer in-depth discussions of agriculture in Bronze Age Egypt and Mesopotamia, Hellenistic Greece and Imperial Rome, Iran and Central Asia, and other regions. Sections on comparative agricultural history discuss agriculture in the Indian subcontinent and prehistoric China while an insightful concluding section helps readers understand ancient agriculture from a modern perspective.

Companion to Ancient Greek and Roman Music

Tosca Lynch & Eleonora Rocconi

Written in an engaging and accessible style, *A Companion to Ancient Greek and Roman Music* explores the pervasive presence of the performing arts in ancient Greek and Roman culture—ranging from musical mythology to music theory and education, as well as archaeology and the practicalities of performances in private and public contexts. This book debunks common myths about Greek and Roman music, casting light on yet unanswered questions thanks to newly discovered evidence. Each chapter includes a discussion of the tools or methodologies that are most appropriate to address different topics, as well as detailed case studies illustrating their effectiveness.

An Introduction to the Roman Military

From Marius (100 BCE) to Theodosius II (450 CE)

Conor Whately

This book introduces readers to three historical Roman soldiers—Titus Pullo from the late republic, Aurelius Polion from the high imperial era, and Flavius Aemilianus from late antiquity. The three men inspire the themes and chronological organization of the text. Drawing on a wide and diverse body of evidence, the author charts their lives from enlistment to death or retirement, allowing students to envision the life of a Roman soldier who is on duty or experiencing adventures across the Roman world.

Empire of the Romans

From Julius Caesar to Justinian: Six Hundred Years of Peace and War

John Matthews

Empire of the Romans, from Julius Caesar to Justinian provides a sweeping historical survey of the Roman empire. Uncommonly expansive in its chronological scope, this unique two-volume text explores the time period encompassing Julius Caesar's death in 44 BCE to the end of Justinian's reign six centuries later. Internationally-recognized author and scholar of Roman history John Matthews balances broad historical narrative with discussions of important occurrences in their thematic contexts. This integrative approach helps readers learn the timeline of events, understand their significance, and consider their historical sources. Discussions of the Justinianic Age, the emergence of Byzantium, and the post-Roman West help readers understand the later Roman world and its impact on the subsequent history of Europe.

ANCIENT CULTURE

A History of Roman Art

2nd Edition

Steven Tuck

A History of Roman Art, Second Edition, provides a wide-ranging survey of the subject from the founding of Rome to the rule of Rome’s first Christian emperor, Constantine, including key information on the Etruscan and early Roman period, a topic often missed in similar works. Incorporating the most up-to-date information available on the topic, this new textbook explores the creation, use, and meaning of art in the Roman world. It emphasizes cultural context and ancient literary sources, and compares with current scholarly topics to stimulate classroom discussion. Each chapter consists of chronological narrative on the art, and focuses on key examples to illustrate its cultural world. Sidebars throughout the book illustrate artistic techniques including stone carving, bronze casting, glass blowing, mosaic creation, and wall painting; all with example works.

Community and Identity at the Edges of the Classical World

Aaron Irvin

Community and Identity at the Edges of the Classical World examines the construction of personal and communal identities in the ancient world, exploring how globalism, multi-culturalism, and other macro events influenced micro identities throughout the Hellenistic and Roman empires. This innovative volume discusses where contact and the sharing of ideas was occurring in the time period, and applies modern theories based on networks and communication to historical and archaeological data. A new generation of international scholars challenge traditional views of Classical history and offer original perspectives on the impact globalizing trends had on localized areas—insights that resonate with similar issues today.

COMMUNICATION STUDIES

Communicating the Future

Solutions for Environment, Economy and Democracy

W. Lance Bennett

Lively prose, Bennett challenges readers to consider how best to approach the environmental crisis by changing how we think about the relationships between environment, economy and democracy. He introduces a framework that citizens, practitioners and scholars can use to evaluate common but unproductive communication that blocks thinking about change; develop more effective ways to define and approach problems; and design communication processes to engage diverse publics and organizations in developing understandings, goals, and political strategies. Until advocates develop economic programs with built-in environmental solutions, they will continue to lose policy fights. Putting “intersectional” communication into action requires acknowledging that communication is not only an exchange of messages, but an organizational process.

The International Encyclopedia of Media Psychology

3 Volume Set

Jan Van den Bulck

The International Encyclopedia of Media Psychology provides a thorough guide to the foundational theories and the exciting new developments within this dynamic field—a growing area of study that investigates how and why human behavior is influenced by interacting with media and technology. Covering a wide range of interdisciplinary methodologies, this comprehensive reference work explores how media affects psychological responses, the ways these responses interact with media variables, and the various methods of empirical analysis for developing models of users' processing of their media experience. Edited by an internationally-recognized expert in the field, the Encyclopedia contains more than 300 entries written by leading figures and promising young researchers alike, exploring flow theory, media aggression, the Reinforcing Spirals Model (RSM), social identity theory, Fear of Missing Out (FOMO), Joint Media Engagement (JME), audience flow research, gender identification, and many other concepts.

JOURNALISM

The Crisis of the Institutional Press

The Crisis of the Institutional Press

Stephen D. Reese

In a time of polarized factions in society due to economic dislocation, tribalism, and fear, the institutional press is more important than ever. *The Crisis of the Institutional Press* draws upon key literature going back forty years in order to provide a new way to think about journalism's importance to democratic life. Stephen Reese considers these threats through a new conception of the 'hybrid institution': an idea that extends beyond the traditional newsroom, and distributes across multiple platforms, national boundaries, and social actors. What is it about the institutional press that we value, and around what normative standards could a hybrid institution emerge? Addressing these questions, Reese highlights how this is no time to be passive but rather to articulate and defend greater aspirations. The institutional press matters more than ever: a reality that must be communicated to a public that depends on it.

Augmented Reality

Unboxing Tech's Next Big Thing

Mark Pesce

Slated as 'the next big thing in tech', augmented reality promises to take the screen out of our hands and wrap it around the world via 'smart spectacles'. As a pervasive, invisible interface between the world and our senses, AR offers unparalleled capacity to reveal hidden digital depths, but it also comes at a cost to our privacy, our property, and our reality. In this crucial and provocative book, Mark Pesce draws on over thirty years' experience to offer the first mainstream exploration of augmented reality. He discusses the exciting and beneficial features of AR as well as the issues and risks raised by this still-emerging technology – a technology that moulds us by shaping what we see and hear.

Data Theory

Interpretive Sociology and Computational Methods

Simon Lindgren

In this experimental and provocative book, Simon Lindgren argues that a hybrid approach to data and theory must be developed in order to make sense of today's ambivalent, turbulent, and media-saturated political landscape. He pushes for the development of a critical science of data, joining the interpretive theoretical and ethical sensibilities of social science with the predictive and prognostic powers of data science and computational methods. In order for theories and research methods to be more useful and relevant, they must be dismantled and put together in new, alternative, and unexpected ways. *Data Theory* is essential reading for social scientists and data scientists, as well as students taking courses in social theory and data, digital methods, big data, and data and society.

Gender and Popular Culture

2nd Edition

Katie Milestone & Anneke Meyer

This fully updated second edition of *Gender and Popular Culture* examines the role of popular culture in the construction of gendered identities in contemporary society. It draws on a wide range of cultural forms – including popular music, social media, television and magazines – to illustrate how femininity and masculinity are produced, represented, used and consumed. Included in this revised edition is a new chapter on digital culture, examining the connection between digital platforms and gender identities, relations and activism, as well as a new chapter on cultural work in digital contexts. All chapters have been updated to acknowledge recent changes in gender images and relations as well as media culture. Additionally, there is new material on the Fourth Wave Women's Movement, audiences and prosumers, and the role of social media.

Gender and Popular Culture is the go-to textbook for students of gender studies, media and communication, and popular culture.

Media Effects

A Narrative Perspective

James Shanahan

Does exposure to media violence make us more violent? Do stereotypes in the media affect the way we see different social groups? Do media institutions play any role in social change? *Media Effects* is a concise introduction which studies the ways in which media use affects society. James Shanahan explores how researchers and society became interested in media effects, outlines the important developments in the field, and looks at how research on narrative is playing a progressively important role in revealing what we know. The book also provides a timely interweaving of different perspectives, ranging from concerned and critical voices within media studies to quantitative psychological approaches which tend to be more sceptical about powerful media effects.

Setting the Agenda

Setting the Agenda

Mass Media and Public Opinion

Maxwell McCombs & Sebastian Valenzuela

In this timely third edition, Maxwell McCombs – a pioneer of agenda-setting research – and Sebastián Valenzuela – a senior scholar of agenda-setting in Latin America – have expanded and updated the book for a new generation of students. In describing the media's influence on what we think about and how we think about it, *Setting the Agenda* also examines the sources of media agendas, the psychological explanation for their impact on the public agenda, and their consequences for attitudes, opinions and behaviors. New to this edition is a discussion of agenda-setting in the widened media landscape, including a full chapter on network agenda-setting and a lengthened presentation on agenda-melding. The book also contains expanded material on social media and the role of agenda-setting beyond the realm of public affairs.

Wi-Fi

Wi-Fi

Julian Thomas, Rowan Wilken & Ellie Rennie

There are more Wi-Fi devices than humans. From café culture to home automation, remote community networks to smart cities, Wi-Fi is an invisible but fundamental element of contemporary life. Identifying the Wi-Fi networks in our homes, cities and communities, the authors describes how Wi-Fi has changed – and continues to shape – everyday places and spaces. They discuss Wi-Fi's origins as an experimental technology at the end of the last millennium, the conflicts generated around its ownership and control, and the ideas and expectations attached to it by technologists, futurists, activists, and entrepreneurs. The authors reveal the ways in which Wi-Fi is an inherently social and political technology, animated by conflicting aspirations for local, public, and community control, and defined by private and corporate interests. Wi-Fi has extended and intensified our online lives as well as promising a more inclusive internet.

CULTURAL STUDIES GENERAL

Peak Libido

Peak Libido

Sex, Ecology, and the Collapse of Desire

Dominic Pettman

In this highly original book, Dominic Pettman examines the mutual influence and impact of human desire and ecological crisis. His account is premised on a simple but startling observation: the decline of libido among the world's population, the loss of the human sex drive, closely tracks the destruction of environments worldwide. The advent of the Anthropocene leads to the decline of eros, the weakening of the link between sexual pleasure and human reproduction, and thus, potentially, to human extinction. Our capacity to care for one another in any meaningful way is being replaced by a restless, technologically-enhanced zombie drive. The environmental crisis of our time is also, and simultaneously, a crisis of human reproduction and of interpersonal intimacy. What Freud called 'libidinal economy' has morphed into libidinal ecology.

FILM STUDIES

A Companion to Steven Spielberg

Nigel Morris

During a prodigious career spanning four decades, Steven Spielberg rose to become the most commercially successful filmmaker in Hollywood history. Reflecting his increasing importance in film scholarship, *A Companion to Steven Spielberg* provides an authoritative collection of essays exploring the achievements and legacy of one of the most influential film directors of the modern era. From in-depth analyses of Spielberg's themes, style, and filming techniques, to the commercial and cultural significance of the Spielberg 'brand', the team of international contributors span a broad range of topics, and offer a careful balance of perspectives and critical approaches.

GENDER STUDIES

Nomography

Eloy Fernández Porta

This book proposes a provocative interpretation of the dynamic relationship between the normative and the transgressive. Combining sociology, biopolitics and satire, it offers a surprising theory of normative imagination as a cognitive mode characteristic of the era of emotional capitalism. Gender, fashion, artistic creation and surveillance are analyzed from the perspective of a regulatory drive, a continuously renovated and imperative push for normalcy that no longer comes from factual powers but from citizens themselves. These, united in a spontaneous popular court, armed with smartphones and driven by juridical compulsion, become the axis of societies of control. In this way the affective ways of constructing subjectivity are replaced by the distinctive pathology of our times, the name of the globalized game: normopathy for all.

Frances E. W. Harper

A Call to Conscience

Utz McKnight

Free Black woman, poet, novelist, essayist, speaker, and activist, Francis Watkins Harper was one of the most important advocates of abolitionism, female suffrage and temperance in the 19th century. A writer of extraordinary versatility and vision, her pioneering work has profound lessons for us today. In this gripping new book, Utz McKnight shows how Harper's life work inspired her contemporaries to imagine a better America. He seeks to recover her importance as a pioneer and leader in 19th century American society by examining not only her vision of the possibilities (and challenges) of Emancipation, but also her subsequent role in challenging Jim Crow. He argues that engaging with her ideas and writings is vital in understanding not only our historical inheritance, but also contemporary issues ranging from mass incarceration, racial violence, and the role of Christianity.

W.E.B. Du Bois

The Lost and the Found

Elvira Basevich

W.E.B. Du Bois spent many decades fighting to ensure that African Americans could claim their place as full citizens and thereby fulfill the deeply compromised ideals of American democracy. Yet he died in Africa, having apparently given up on the United States. In this tour-de-force, Elvira Basevich examines this paradox by tracing the development of his life and thought and the relevance of his legacy to our troubled age. She adroitly analyses the main concepts that inform Du Bois's critique of American democracy, such as the color line and double consciousness, before examining how these concepts might inform our understanding of contemporary struggles, from Black Lives Matter to the campaign for reparations for slavery. She stresses the continuity in Du Bois's thought, from his early writings to his later embrace of self-segregation and Pan-Africanism, while not shying away from assessing the challenging implications of his later work.

Modern Languages

Why It Matters

Katrin Kohl

A rich array of languages can be encountered in most major cities, and in some parts of the world, citizens might use several different languages in the course of a normal day. Bilingual Oxford professor Katrin Kohl makes a passionate case for why we must embrace languages in all their diversity. When you study a language, you gradually open a unique doorway into the world, immerse yourself in a different way of seeing, and discover new ways of communicating with people from different cultures on their terms. Languages open our minds to the diversity of human life in its complex relationships with nature, culture and technology. They enable us to understand why cultural diversity matters, and why we should care about preserving it as much as we care about preserving the diversity of our biological world.

Essaying the Past

How to Read, Write and Think about History, 4th Edition

Jim Cullen

Jim Cullen guides the reader through the nuts and bolts of producing good historical prose, discussing key strategies such as framing questions, developing a strong introduction and topic sentences, choosing good evidence, and the important role of revision. Beginning with a survey of the field, this book offers useful insight into how to read and understand a wide variety of historical sources, as well as providing an introduction to historiography, helpful tips for conducting research, and a discussion of what it means to think and read analytically. Cullen also offers a set of appendices that cover the major issues facing students of history today, among them the dangers of plagiarism, the role of the Internet, and the need for correctly annotated and formatted footnotes and bibliographies.

Pearl Harbor

Japan's Attack and America's Entry into World War II

Takuma Melber

In this vivid and lively book, Takuma Melber breathes new life into the dramatic events that unfolded before, during and after Pearl Harbor by putting the perspective of the Japanese attackers at the centre of his account. This is the dimension commonly missing in most other histories of Pearl Harbor, and it gives Melber the opportunity to provide a fuller, more definitive and authoritative account of the battle, its background and its consequences. Melber sheds new light on the long negotiations that went on between the Japanese and Americans in 1941, and the confusion and argument among the Japanese political and military elite. He shows how US intelligence and military leaders in Washington failed to interpret correctly the information they had and to draw the necessary conclusions about the Japanese war intentions in advance of the attack. His account of the battle itself is informed by the latest research and benefits from including the planning and post-raid assessment by the Japanese commanders.

What is Medieval History?

John H. Arnold

What is it that medieval historians do? How – and why – do they do it? Arnold discusses the creation of medieval history as a field, the nature of its sources, the intellectual tools used by medievalists, and some key areas of thematic importance from the fall of the Roman Empire to the Reformation. The fascinating case studies include a magical plot against a medieval pope, a fourteenth-century insurrection, and the importance of a kiss exchanged between two tenth-century noblemen. Throughout the book, readers are shown not only what medieval history is, but the cultural and political contexts in which it has been written.

This anticipated second edition includes further exploration of the interdisciplinary techniques that can aid medieval historians, such as dialogue with scientists and archaeologists, and addresses some of the challenges – both medieval and modern – of the idea of a 'global middle ages'.

Republicanism

An Introduction

Rachel Hammersley

In this new book, leading scholar Rachel Hammersley expertly and accessibly introduces this complex but important topic. Beginning in the ancient world, she traces the history of republican government in theory and practice across the centuries in Europe and North America, concluding with an analysis of republicanism in our contemporary politics. She argues that republicanism is a dynamic political language, with each new generation of thinkers building on the ideas of their predecessors and adapting them in response to their own circumstances, concerns, and crises.

WORLD HISTORY

**Asia Past and Present****A Brief History***Thomas Reins & Peter P. Wan*

Asia Past and Present is an expansive survey of the social, political, and economic history of the continent from the Paleolithic era to the early 21st century. The book focuses on terrain that encompasses India, Pakistan, Afghanistan, Central Asia, China, Korea, Japan, Mongolia, the Russian Far East, and Southeast Asia—the area which most modern scholars identify as Asia. Offering broad chronological and topical coverage of Asia, this book examines subjects including written languages, religions and philosophies, concepts of monarchy, militarism, independence and nation building, and more. Historical dialogues of how colonies, later emerging nations, blended traditional Asian culture and Western political and economic models of modernization complement contemporary discussions of globalization, nuclear tensions, and growing demands for greater individual freedom.

TRAVEL & TOURISM INDUSTRY

**The Restaurant, A Geographical Approach****From Invention to Gourmet Tourist Destinations***Olivier Etcheverria*

This book analyzes the way in which restaurants are geographical objects that reveal locational logics and strategies, and how restaurants weave close relationships with the space in which they are located. Originating from cities, restaurants feed off the urban environment as much as they feed it – participating in the qualification, differentiation and hierarchy of cities. Indeed, restaurants in both the city and the countryside maintain a dialogical relationship with tourism. They can be vital players in the establishment of emerging types of gourmet tourism, sometimes even constituting as gourmet tourist destinations in their own right. They participate in the establishment of necessary conditions for local development. Some restaurants are even praised as historic sites, recognized as part of the local heritage, which reinforces their localization and their identity as a gourmet tourist destination.

GENERAL & INTRODUCTORY LINGUISTICS

**The Handbook of Dialectology**

Charles Boberg, John Nerbonne & Dominic Watt

The *Handbook of Dialectology* provides an authoritative, up-to-date and unusually broad account of the study of dialect, in one volume. The subjects are divided into three sections of twelve chapters; theory, method, and data. In every section, leading authorities from around the world contribute chapters on a wide range of subtopics. Each chapter reviews essential research, and offers a critical discussion of the past, present and future development of the area.

SECOND LANGUAGE ACQUISITION

**Introducing Second Language Acquisition**

Perspectives and Practices, 2nd Edition

Kirsten Hummel

Fully updated throughout to reflect the most up-to-date research in the field, *Introducing Second Language Acquisition: Perspectives and Practices*, Second Edition, represents a clear and concise introduction to the main concepts, issues, and debates in second language acquisition studies, aimed specifically at students encountering the topic for the first time. In this second edition, a new structure of the book is introduced to include separate chapters on Theoretical Perspectives: Past and Present and Theoretical Perspectives: The Learner as Language Processor. New content also includes sections on Translanguaging, L2 academic language/literacy development, and Skill Acquisition Theory. With a focus on practical applications, discussions are backed up with references to the latest and most important research.

**The Handbook of Advanced Proficiency in Second Language Acquisition**

Paul Malovrh & Alessandro G. Benati

The Handbook of Advanced Proficiency in Second Language Acquisition offers an overview of the most recent and scientific-based research concerning higher proficiency in second language acquisition (SLA). With contributions from an international team of experts in the field, the *Handbook* presents several theoretical approaches to SLA and offers an examination of advanced proficiency from the viewpoint of various contexts and dimensions of second language performance. The authors also review linguistic phenomena among advanced learners through the lens of phonology and grammar development. Comprehensive in scope, this book provides an overview of advanced proficiency grounded in socially-relevant domains of second language acquisition including discourse, reading, genre-based writing, and pragmatic competence. The authoritative volume brings together the theoretical accounts of advanced language use combined with solid empirical research.

THEORETICAL LINGUISTICS

The Wiley Blackwell Companion to Semantics

5 Volume Set

Thomas Zimmermann, Daniel Gutzmann, Lisa Matthewson, Cecile Meier & Hotze Rullmann

The Wiley Blackwell Companion to Semantics provides a thorough investigation of issues and phenomena central to the development of modern semantics and its interfaces. Presenting in-depth chapters written by leading experts in the field, this book investigates competing analyses and approaches, examines their conceptual foundations, and evaluates them as applied to various languages. This authoritative collection enables scholars and students of semantics—as well as those from associated areas of linguistics such as syntacticians—to broaden and deepen their knowledge of the subject and the developments in the field. Presenting over 100 case studies, the collection of chapters within this *Companion* is organized in alphabetical order for ease of reference.

ENGLISH LITERATURE

30 Great Myths about Jane Austen

Claudia Johnson & Clara Tuite

30 Great Myths about Jane Austen examines the accepted beliefs – both true and untrue – that have most influenced our readings of Austen. Rather than simply de-bunking, or validating, commonly-held views about Austen, authors Claudia L. Johnson and Clara Tuite explore how these myths can be used to engage with the life, work, and reception of Jane Austen. Applying the most up-to-date scholarship to better understand how myths shape our appreciation of Jane Austen, this fascinating volume examines Jane Austen's life and letters, her historical contexts, her texts, and their afterlives, and discusses Austen's influence on the development of literary criticism as a discipline.

A Book of Middle English

4th Edition

Thorlac Turville-Petre

The fourth edition of this essential Middle English textbook introduces students to the wide range of literature written in England between 1150 and 1400. Beginning with an extensive overview of middle English history, grammar, syntax, and pronunciation, the book goes on to examine key middle English texts – including a new extract from Julian of Norwich's *Revelation of Divine Love* – with helpful notes to direct students to key points within the text. Keeping in mind adopter feedback, this new edition includes a new model translation section with a student workbook and model exercise for classroom use. This new chapter will include sections on 'false friend' words, untranslatable idioms and notes on translating both poetry and prose. The text and references will be fully updated throughout and a foreword dedicated to the late J. A. Burrow will be included.

LITERARY & CULTURAL THEORY

Memory and Autobiography

Explorations in the Limits

Leonor Arfuch

This book by one of Latin America's leading cultural theorists examines the place of the subject and the role of biographical and autobiographical genres in contemporary culture. Opening up debate through juxtaposition and dialogue, Arfuch's own poetic writing moves freely from the Holocaust to Argentina's last dictatorship and its traumatic memories, and then to the troubled borderlands between Mexico and the United States to show how artists rescue shards of memory that would otherwise be relegated to the dustbin of history. In so doing, she makes us see not only how challenging it is to represent past traumas and violence but also how vitally necessary it is to do so as a political strategy for combating the tides of forgetting and for finding ways of being in common.

CONTINENTAL PHILOSOPHY

After the Apocalypse

After the Apocalypse

Srećko Horvat

While everyone is hypnotized by the dystopian siren song of Covid-19, the main eschatological threats to the future of humanity and the planet haven't disappeared. Climate crisis, nuclear age and now pandemics – these have become our 'new normal' and we must prepare ourselves for what comes after. In this post-apocalyptic rollercoaster ride through our possible futures, philosopher Srećko Horvat investigates the notion of the Apocalypse and suggests that the only way to prevent the end of the world as we know it is to engage in a close reading of various interconnected threats like climate crisis, nuclear age and the ongoing pandemic. By investigating the future of places such as Chernobyl, the Mediterranean and Marshall Islands, including many places that were affected by Covid-19, the 'revelation' according to Horvat appears simple and unprecedented: the alternative is no longer socialism or barbarism, our only choice today is a radical re-invention of the world or mass extinction.

Autonomy

An Essay on the Life Well-Lived

Beate Rössler

We assume that a life followed only according to decisions taken by other people, against our will, cannot be a well-lived life – we assume, in other words, that we are and should be autonomous. However, it is equally true that many aspects of our lives are not chosen freely: this is true of social relations and commitments but also of all those situations we simply seem to stumble into, situations which just seem to happen to us. The possibility of both the success of an autonomous life and its failure are part of our everyday experiences. In this book, Beate Rössler examines the tension between failing and succeeding to live an autonomous life and the obstacles we have to face when we try to live our life autonomously, obstacles within ourselves as well as those that stem from social and political conditions. She highlights the ambiguities we encounter, examines the roles of self-awareness and self-deception, explores the role of autonomy for the meaning of life and maps out the social and political conditions necessary for autonomy.

Doing Justice

Three Essays on Walter Benjamin

Pablo Oyarzún

Pablo Oyarzún is one of the foremost Benjamin scholars in Latin America. His writings have shaped the reception of Benjamin's work in Latin America and have been central to the effort to identify the tasks and responsibilities of the kind of critical theory that would interrupt social violence. In this book Oyarzún examines some of the key concepts in Benjamin's work – including his concepts of translation, experience, history and storytelling – and relates them to his own systematic reflection on the nature and implications of 'doing justice'. Justice, argues Oyarzún, can only be done in the active effort to do justice – or, as Benjamin would say, in the striving to turn the world into the highest good.

Existentialism

An Introduction, 2nd Edition

Kevin Aho

Existentialism: An Introduction has established itself as the most comprehensive and accessible book on the subject available. In this fully revised and expanded second edition, Kevin Aho draws on a wide range of existentialist thinkers from both the secular and religious traditions, adding a wealth of new material on existentialism's relationship with Marxist thought and its impact on feminist phenomenology and critical race theory. By tracking its many and significant influences on modern thought, Kevin Aho shows why existentialism cannot be easily dismissed as a moribund or outdated movement, but instead endures as one of the most important and vibrant areas of contemporary philosophy. Existentialism remains so influential because it forcefully deals with what it means to be human and engages with fundamental questions such as "Who am I?" and "How should I live?"

What is to be Done?

Louis Althusser

What is to be done? This was the question asked by Lenin in 1901 when he was having doubts about the revolutionary capabilities of the Russian working class. 77 years later, Louis Althusser asked the same question. Faced with the tidal wave of May – 68 and the recurrent hostility of the Communist Party towards the protests, he wanted to offer readers a succinct guide for the revolution to come. Lively, brilliant and engaged, this short text is wholly oriented towards one objective: to organise the working class struggle. Althusser provides a sharp critique of Antonio Gramsci's writings and of Eurocommunism, which seduced various Marxists at the time. But this book is above all the opportunity for Althusser to state what he had not succeeded in articulating elsewhere: what concrete conditions would need to be satisfied before the revolution could take place. Left unfinished, it is published here in English for the first time.

ETHICS

This Is Bioethics

An Introduction

Udo Schüklenk & Ruth F. Chadwick

This Is Bioethics is an ideal introductory textbook for students new to the field, exploring the fundamental questions, concepts, and issues within this dynamic area of study. Assuming no prior knowledge of the subject, this accessible volume helps students consider both traditional and cutting-edge questions, develop informed and defensible answers, and evaluate the strengths and weaknesses of a diverse range of bioethical arguments. The authors avoid complex technical terms and jargon in favor of an easy and informal writing style, offering engaging chapters designed to stimulate student interest and encourage class discussion. Students are guided through questions of research ethics, moral standing, genetics, mental health, justice and healthcare, population health, and more.

GENERAL PHILOSOPHY

A Brief Eternity

The Philosophy of Longevity

Pascal Bruckner

Written with Bruckner's characteristic verve, this book of accessible philosophy addresses a major phenomenon of the contemporary age: the fact that we are living longer than most lived in previous generations. What should we do with this extra time – with these extra years, decades even, that people in previous generations simply did not have? How does this change our understanding of what it means to live a full life? Nourished by both reflections and statistics, drawing on the sources of literature, the arts and history, this book proposes a philosophy of longevity based not on resignation but on resolution. In short, an art of living this life to the full. Is there not a profound joy in being alive at the age when our ancestors already had one foot in the grave?

Letter to D

A Love Story

André Gorz & Julie Rose (Translated by)

You're 82 years old. You've shrunk six centimetres, you only weigh 45 kilos yet you're still beautiful, graceful and desirable – so begins André Gorz's "open love letter" to the woman he has lived with for 58 years and who lies dying next to him. As one of France's leading post-war philosophers, André Gorz wrote many influential books, but nothing he wrote will be read as widely or remembered as long as this simple, passionate, beautiful letter to his dying wife. In a bittersweet postscript a year after *Letter to D* was published, a note pinned to the door for the cleaning lady marked the final chapter in an extraordinary love story. André Gorz and his terminally ill wife, Dorine, were found lying peacefully side by side, having taken their lives together. They simply could not live without one another.

An international bestseller, *Letter to D* is the ultimate love story – and all the more poignant because it's true.

Nietzsche's Dawn

Philosophy, Ethics, and the Passion of Knowledge

Keith Ansell-Pearson & Rebecca Bamford

Published in 1881, *Dawn: Thoughts on the Presumptions of Morality* represents a significant moment in the development of Nietzsche's philosophy and his break with German philosophic thought. This unique book explores Nietzsche's philosophy at the time of *Dawn's* writing and discusses the modern relevance of themes such as fear, superstition, terror, and moral and religious fanaticism. The authors highlight *Dawn's* links with key areas of philosophical inquiry, such as "the art of living well," skepticism, and naturalism. Providing a lively and imaginative engagement with Nietzsche's text, this book examines Nietzsche's campaign against customary morality, discusses Nietzsche's responsiveness to key Enlightenment ideas, and offers insights on Nietzsche's philosophical practice and influences.

Spinoza

Justin Steinberg & Valtteri Viljanen

Benedict de Spinoza is one of the most controversial and enigmatic thinkers in the history of philosophy. His greatest work, *Ethics* (1677), developed a comprehensive philosophical system and argued that God and Nature are identical. His scandalous *Theological-Political Treatise* (1670) provoked outrage during his lifetime due to its biblical criticism, anticlericalism, and defense of the freedom to philosophize. Together, these works earned Spinoza a reputation as a singularly radical thinker. In this book, Steinberg and Viljanen offer a concise and up-to-date account of Spinoza's thought and its philosophical legacy. They explore the full range of Spinoza's ideas, from politics and theology to ontology and epistemology. Drawing broadly on Spinoza's impressive oeuvre, they have crafted a lucid introduction for readers unfamiliar with this important philosopher, as well as a nuanced and enlightening study for more experienced readers.

The Meaning of Thought

MARKUS GABRIEL

The Meaning of Thought

Markus Gabriel

In this new book, bestselling philosopher Markus Gabriel steps back from the polemics to re-examine the very nature of human thought. He conceives of human thinking as a 'sixth sense', a kind of sense organ that is closely tied our biological reality as human beings. Our thinking is not a form of data processing but rather the linking together of images and imaginary ideas which we process in different sensory modalities. Our time frame expands far beyond the present moment, as our ideas and beliefs stretch far beyond the here and now. We are living beings and the whole of evolution is built into our life story. In contrast to some of the exaggerated claims made by proponents of AI, Gabriel argues that our thinking is a complex structure and organic process that is not easily replicated and very far from being superseded by computers.

HISTORICAL WESTERN PHILOSOPHY

THEODOR W. ADORNO
SIEGFRIED KRACAUER
CORRESPONDENCE 1923-1966

Correspondence: 1923-1966

Theodor Adorno & Siegfried Kracauer

Theodor W. Adorno was one of the most influential thinkers of the 20th century, and Siegfried Kracauer was also a very important thinker and fellow member of the Frankfurt School. This volume brings together for the first time the long-running correspondence between these two major figures of German intellectual culture. As left-wing German Jews who were forced into exile with the rise of Nazism, Adorno and Kracauer shared much in common, but their worldviews were in many ways markedly different. These differences become clear in a correspondence that ranges over a great diversity of topics, from the nature of criticism and the meaning of utopia to the work of their contemporaries, including Bloch, Brecht and Benjamin. This unique volume will be of great value to anyone interested in critical theory and in 20th century intellectual and cultural history.

THEODOR W. ADORNO
GERSHOM SCHOLEM
CORRESPONDENCE 1939-1969

Correspondence: 1939-1969

Theodor Adorno & Gershom Scholem

Theodor W. Adorno and Gerhard Scholem met in New York on the cusp of the 20th century's descent into the Holocaust, whose consequences and chaotic aftermath they would relentlessly submit to the analytic scrutiny borne of their prolific correspondence. Appearing in English for the first time, this complete collection of their letters lays bare a friendship and intellectual partnership upon which the scars of modernity are writ large. This volume is an extraordinary collaborative document not just because of the authors' astute appraisal of the turbulent political times in which they lived but also because they grapple with the tensions sparked off by the unprecedented converging of Jewish mysticism and contemporary philosophy. But what makes this volume particularly rewarding is that it documents the tender unfolding of a deep and enduring friendship between two of the greatest German-Jewish thinkers of the 20th century. As their 30-year correspondence attests, the nexus of their friendship was twofold: on the one hand, their respective friendships with Walter Benjamin, and on the other, their at times fraught belonging to the German-Jewish community.

PAUL RICOEUR
PHILOSOPHY,
ETHICS, & POLITICS

Philosophy, Ethics and Politics

Paul Ricoeur

This is a new book from one of the most distinguished French philosophers of the twentieth century, taking the form of dialogues held between 1981 and 2003 on key questions of political philosophy and ethics. Ricoeur analyses themes of major relevance to the contemporary politics, such as justice, violence, war, the environmental crisis, the question of evil, ethical and political action in the polis.

This book has added topicality because Ricoeur's philosophy was the inspiration for Emmanuel Macron, who was elected President of France in 2017. This volume of interviews and dialogues with one of the most important French philosophers of the post-war period will be of interest to anyone interested in the great political and ethical questions of our time.

The Woods

Vladimir Bibikhin

In modern, urbanized societies, our engagement with the natural environment often seems controlled and distant, reduced to strolls through city parks or walks along well-trodden paths. Human life is now far removed from its prehistoric origins, when humans dwelt deep within the forests and depended on them for their survival. In this important book, Vladimir Bibikhin, one of Russia's most influential 20th-century philosophers, argues that, although most humans now live far from the proximity of woods and forests, our existence remains profoundly linked with these spaces. It was Aristotle who first appreciated their primal role, even deriving his notion of "matter" from the Greek words for wood and forest. As timber, the woods may be seen as inanimate material, but at the same time they also constitute a living ecosystem and the source of energy and life. By opening up this duality, the woods are transformed from simple matter to a living environment, serving as a reminder that we belong to the world of biological life to a far greater extent than we usually think.

PHILOSOPHY OF LAW

After Law

Laurent de Sutter

In *After Law*, Laurent de Sutter takes us on a journey to uncover the sources of our fascination with law. He shows that at a certain moment in our history a choice was made to treat law as a decisive feature of civilization, but this choice was neither obvious nor necessary. Other political, social, religious or cultural possibilities could have been chosen instead of adopting a theoretical tool aimed at governing our behaviour and even our lives by means of abstract principles. De Sutter takes us through a variety of normative landscapes that guide, and have guided, the lives of millions in a way that has nothing to do with law. From Ancient Egypt to Mesopotamia, from Medieval Japan to India and China, from Islam to Judaism, other cultures have devised sophisticated tools to help people live together – without having to deal with norms, rules and principles. This is a lesson worth reflecting on, especially at a time when the rule of law and the functioning of justice are increasingly showing their sinister side – and their impotence. Is there life beyond law?

PHILOSOPHY OF MIND

Philosophy as a Way of Life

James M. Ambury, Tushar Irani & Kathleen Wallace

In the ancient world, philosophy was understood to be a practical guide for living, or even itself a way of life. For philosophers today to ignore this dimension of philosophy is not to ignore an accidental subset of the subject that can be divorced from its essential nature – it is to ignore philosophy itself. The articulation of philosophy as a way of life and its pedagogical implementation advances the love of wisdom; it is not merely an addendum to it. But how might we convey the love of wisdom as not only a body of dogmatic principles and axiomatic truths but also a lived exercise that can be practiced? This volume of essays brings historical views about philosophy as a way of life, coupled with their modern equivalents, more prevalently into the domain of the contemporary scholarly world.

The Moral Powers

A Study of Human Nature

Peter Hacker

A milestone in the study of value in human life and thought, written by one of the world's preeminent living philosophers. *The Moral Powers: A Study of Human Nature* is a philosophical investigation of the moral potentialities and sensibilities of human beings, of the meaning of human life, and of the place of death in life. It is an essay in philosophical anthropology: the study of the conceptual framework in terms of which we think about, speak about, and investigate *homo sapiens* as a social and cultural animal. This volume examines the diversity of values in human life and the place of moral value within the varieties of values. Its subject is the nature of good and evil and our propensity to virtue and vice. *The Moral Powers: A Study of Human Nature* is required reading philosophers of mind, ethicists, psychologists, cognitive neuroscientists, and any general reader wanting to understand the nature of value and the place of ethics in human lives.

SOCIAL PHILOSOPHY

Conservatism

Conservatism

Edmund Neill

The evolution of conservative political thought from the French Revolution to today explained. Edmund Neill is a historian of ideas whose previous book on Michael Oakeshott has become the definitive work on the subject. In this book, Neill offers the first comprehensive account of conservatism as an ideology, arguing that it conceptualizes human conduct as being partially dependent on forces beyond human control, and therefore prioritises cautious management of change. After examining the history of conservative thought from the French Revolution to the present in Britain, France, and the United States, he reflects on the challenges and opportunities conservatism faces in the modern world, particularly contemporary populism.

COMPARATIVE POLITICS

Ch'ixinakax utxiwa
On Decolonising Practices and Discourses

Silvia Rivera Cusicanqui

A cutting-edge work on how colonial structures of domination affect indigenous identities and cultures. The Bolivian scholar and activist, Silvia Rivera Cusicanqui, is a pre-eminent Latin American intellectual, world renowned for her work in postcolonial and subaltern studies. Combining visual history with other instances of political resistance, *Ch'ixinakax utxiwa* offers an alternative narrative to the history of Latin American decolonisation. This narrative challenges the common conception that mestizaje (race-mixing) and hybridity are liberatory formations, offering instead a new theorisation of the complex racial configurations produced by colonialism and its afterlives.

Despised
Why the Modern Left Loathes the Working Class

Paul Embery

Paul Embery is a firefighter and trade unionist who has been fighting for better conditions and pay for firefighters for the past two decades. In this new book, *Despised*, Embery gives voice to the millions who feel that the modern Left, and particularly the Labour Party, has lost touch with its historic supporters over issues such as Brexit, immigration and identity politics. He contends that, in order to return to its roots, the Left must combine socialist economics with a return to a belief in the family, local community and nation state, and reject the ultra-radicalism of its London-centric middle class support base. No-one who wants to really understand why our politics has become so bitter and dysfunctional and what the Left can do to fix it can afford to miss this authentic, insightful and passionate book.

France

Emile Chabal

France is the most-visited country in the world. It attracts millions of tourists, most of whom come in search of beautiful architecture, good food, and fine art. But appearances can be deceptive. France is not only a place of culture and glamour; it also carries the bitter memories of violence, division and broken promises.

In this arresting book, Emile Chabal, a leading specialist of contemporary France, tells the story of a paradoxical country. From the calamitous defeat by Hitler's armies in 1940 to the spectacular gilets jaunes protests, he explores the contradictions that have shaped French history over the last eighty years. The picture that emerges is one of a nation struggling to reconcile its core political values with the realities of a diverse society.

War and Conflict in the Middle East and North Africa

Ariel I. Ahram

The first thematically-organized introduction to the causes and consequences of war in the Middle East and North Africa (MENA). In Part I, Ahram shows how MENA's conflicts evolved with the formation of its states. Violence varied from civil wars and insurgencies to traditional interstate conflicts and affected some countries more frequently than others. The strategies rulers employed to stay in power constrained how they recruited, trained, and equipped their armies. Part II explores dynamics that trap the region in conflict-oil dependence, geopolitical interference, and embedded identity cleavages. The catastrophic wars of the 2010s reflect the confounding effects of these traps, culminating in state collapse and intervention from the US and Russia, as well as regional powers like Iran, Saudi Arabia, and the UAE. Finally, Ahram considers the possibilities of peace, highlighting the disjuncture between local peacebuilding and national and internationally-backed mediation.

What Is at Stake Now

My Appeal for Peace and Freedom

Mikhail Gorbachev

In view of this dangerous and unpredictable state of affairs, Mikhail Gorbachev, the last great statesman of the 1989 revolution, has written this short book to warn us of the grave risks we now face and to urge us all, political leaders and citizens alike, to take action to address them. He focusses on the big challenges of our time, such as the renewal of the arms race and the growing risks of nuclear war, the new tension between Russia and the West, the global environmental crisis, the rise of populism and the decline of democracy. He argues that self-serving policies and narrow-minded politics aimed at the pursuit of national interests are taking the place of political principles and overshadowing the vision of a free and just world for all peoples. He offers his view of where Russia is heading and he urges political leaders in the West to recognize that re-establishing trust between Russia and the West requires the courage of true leadership and a commitment to genuine dialogue and understanding on both sides.

GENERAL & INTRODUCTORY POLITICAL SCIENCE

The Nature of Conspiracy Theories

Michael Butter

Conspiracy theories seem to be proliferating today. Long relegated to a niche existence, conspiracy theories are now pervasive, and older conspiracy theories have been joined by a constant stream of new ones – that the USA carried out the 9/11 attacks itself, that the Ukrainian crisis was orchestrated by NATO, that we are being secretly controlled by a New World Order that keep us docile via chemtrails and vaccinations. Not to mention the moon landing that never happened. In this book Michael Butter provides a clear and comprehensive introduction to the nature and development of conspiracy theories. Contrary to popular belief, he shows that conspiracy theories are less popular and influential today than they were in the past. Prior to the 1950s, conspiracy theories were seen as a legitimate form of knowledge. It's only since the 1950s that conspiracy theories have been regarded as highly dubious. Butter shows that the recent resurgence of conspiracy theories is linked to the internet which gives them greater exposure and fragments the public sphere, so that conspiracy theories can be nourished within online subcultures.

GLOBAL POLITICS

Gold

Michael John Bloomfield & Roy Maconachie

In this book, Bloomfield and Maconachie tell the intriguing story of the yellow metal, tracing the seismic shifts in the industry over the last few decades. They explain how huge purchases of gold reserves by BRICS countries like China and Russia mark the shifting balance of power away from the West. And how rising affluence in India has led to a surging demand for gold jewellery, undermining attempts to make supply chains more responsible. Throughout the book, the authors suggest ways we could, collectively, make practices work better for the countless workers and communities who too often suffer at the producer-end of the supply chain. Linking local to global, producer to consumer, and gold's extraction from the Earth to the financial centres that fuel it, this book offers a probing analysis that reveals who wins and who loses, and what this means for the future of gold.

Anarchism

Carissa Honeywell

Is it possible to abolish coercion and hierarchy and build a stateless, egalitarian social order based on non-domination? There is one political tradition that answers these questions with a resounding yes: anarchism.

In this book, Carissa Honeywell offers an accessible introduction to major anarchist thinkers and principles, from Proudhon to Goldman, non-domination to prefiguration. She helps students understand the nature of anarchism by examining how its core ideas shape important contemporary social movements, thereby demonstrating how anarchist principles are relevant to modern political dilemmas connected to issues of conflict, justice and care. She argues that anarchism can play a central role in tackling our major global problems by helping us rethink the essentially militarist nature of our dominant ideas about human relationships and security.

Democracy Against Liberalism

Aviezer Tucker

Aviezer Tucker is an established Harvard academic who has written extensively on historiography, political theory and the history of political ideas; he has special expertise on post-communist regimes in Europe. In this new book, Tucker reveals that what feels like an unprecedented shift towards authoritarianism is, in fact, a combination of the historically familiar and changes wrought by new technologies that has come to threaten the liberal norms that we have assumed to be immutable. However, all is not lost: Tucker argues that this slide to what he terms "neo-illiberal democracy" can still be countered, but only if we restore liberalism without its oft-adjoined nostalgia, and institute politics and institutional barriers which oppose populist impulses.

Environmental Political Theory

Steve Vanderheiden

In this essential new textbook, leading political theorist Steve Vanderheiden examines how the concept of sustainability challenges – and is challenged – by eight key social and political ideas, ranging from freedom and equality to democracy and sovereignty. He shows that environmental change will disrupt some of our most cherished ideals, requiring new indicators of progress, new forms of community, and new conceptions of agency and responsibility. He draws on canonical texts, contemporary approaches to environmental political theory, and vivid examples to illustrate how changes in our conceptualization of our social aspirations can inhibit or enable a transition to a just and sustainable society.

Justice is Steady Work

Conversations with Astrid von Busekist

Michael Walzer & Astrid von Busekist

Michael Walzer is one of the most influential political theorists and public intellectuals writing today; in this dynamic and lively conversation with Professor Astrid von Busekist, he discusses his life and work and reflects on the key political questions of our time. Covering Walzer's own biography as well as his work on topics as wide-ranging as war, justice, and Judaism, *Justice is Steady Work* provides an excellent overview of Walzer's life and work, highlighting his abiding attention to historical reality and the impact of varying social and political contexts. Reflecting on justice, war, and the key political issues of our tumultuous time, Walzer and von Busekist offer a new introduction to both the classic and the emerging work from one of the most influential political theorists of the 20th and 21st centuries.

Planetary Politics

Planetary Politics

A Manifesto

Lorenzo Marsili

In this new book, Marsili argues for the necessity of a new planetary vision if we are to reclaim and liberate our world from the global crises of our time—including climate catastrophe. This new approach would counter the provincialization of our democracies that has contributed to our increasingly disordered politics, and combines theory and activism to encourage a new generation to develop and take forward a new planetary politics that would break free from the mental and material boundaries of nations and address the great challenges of our time. Hopeful and polemical, this dynamic new text will be essential reading for students and scholars in politics, sociology and the social sciences, as well as activists everywhere.

Should Secret Voting Be Mandatory?

James Johnson & Susan Orr

Leading scholars James Johnson and Susan Orr go back to basics to analyze the fundamental issues surrounding the secret ballot, showing how secrecy works to protect voters from coercion and bribery. They argue, however, that this protection was always incomplete: faced with effective ballot secrecy, powerful actors turned to manipulating turnout – buying presence or absence at the polls – to obtain their electoral goals. They proceed to show how making both voting, and voting in secret, mandatory would foreclose both undue influence and turnout manipulation, and thereby enhance freedom for voters by liberating them from undue influence in their choice of both whether and how to vote. This thought-provoking and insightful text will be invaluable for students and scholars of democratic theory, elections and voting, and political behavior.

India

Continuity and Change in the Twenty-First Century

John Harriss, Craig Jeffrey & Trent Brown

In this book, research leaders John Harriss, Craig Jeffrey and Trent Brown explore in depth the economic, social, and political changes occurring in India today, and their implications for the people of India and the world. Each of the book's fourteen chapters seeks to answer a key question: Is India's democracy under threat? Can India's Growth be sustained? How are youth changing India? Drawing on a wealth of scholarly and popular material as well as their own experience researching the country during this period of major transformation, the authors draw the reader into key debates about economic growth, poverty, environmental justice, the character of Indian democracy, rights and social movements, gender, caste, education, and foreign policy. India, they conclude, has undergone some extraordinary and positive changes since the early 1990s but deeply worrying threats remain: increasing authoritarianism, growing inequality, entrenched poverty, and environmental vulnerability. How India responds to these crucial challenges will shape the world's largest democracy for years to come.

A Clinician's Guide to CBT for Children to Young Adults

A Clinician's Guide to CBT for Children to Young Adults

A Companion to Think Good-Feel Good and Thinking Good, Feeling Better, 2nd Edition

Paul Stallard

There is a growing recognition that Cognitive Behaviour Therapy (CBT) is an effective intervention for a range of common psychological problems experienced by children and young people, such as depression, anxiety, PTSD, and OCD. Designed for clinicians using the original workbook, *Think Good Feel Good: A Cognitive Behaviour Therapy Workbook for Children and Young People* (Wiley, 2018) in their work with children, the book builds upon the workbook materials by offering guidance on all aspects of the therapeutic process and a range of case studies highlighting therapy in action. Topics covered include parent involvement, key cognitive distortions in children, formulations, challenging thoughts, guided discovery, the use of imagery and possible problems in therapy and strategies for overcoming them.

Conducting Psychological Assessment

Conducting Psychological Assessment

A Guide for Practitioners, 2nd Edition

A. Jordan Wright

It has been about ten years since the original edition of *Conducting Psychological Assessment* came out, and since then it has been used consistently, especially within educational contexts, to train psychologists in the process of psychological assessment, especially related to integrating data and writing reports. The hypothesis testing model proposed in the original book has become the standard for ethical and rigorous comprehensive (multi-method) assessment. The second edition will take the foundational models from the first edition and add nuance and details that have been hammered out over the past ten years of running CE workshops based on the ideas in the book. Specifically, the author has developed well-received models of reconciling conflicting data from different sources, which can be incorporated into the data integration process chapter. Further, the author has begun to use several other models of personality functioning as a template for conceptualizing data (including the interpersonal circumplex model), which is used illustratively throughout the text.

Formations of the Unconscious

Formations of the Unconscious

The Seminar of Jacques Lacan, Book V

Jacques Lacan

Jacques Lacan was one of the leading thinkers of the 20th Century and the most influential psychoanalyst since Freud. His work has been hugely significant across a wide range of disciplines, from philosophy and psychology to literary theory, critical theory, gender studies and cultural studies. His Seminars were famous, and the books based on these Seminars are now published in English by Polity. In this volume, Lacan explores the formations of the unconscious i.e. the circumstances in which the laws of the unconscious are most discernible: the joke, the dream, the symptom, the lapsus (parapraxis). Lacan redefines Freud's fundamental mechanisms involved in the formations of the unconscious, as metaphor and metonymy. He also provides a new analysis of the Oedipus complex.

The Wiley Encyclopedia of Health Psychology

4-Volume Set

Lee Cohen

Organized thematically as an A to Z reference encyclopedia across 4 volumes, this comprehensive resource on health psychology provides a concise overview of the ever-expanding interdisciplinary field. The first volume of *The Wiley Encyclopedia of Health Psychology* covers the biological bases of health behavior, providing information on topics in the broad areas of neuroscience and biopsychology relevant to health behavior. Volume II addresses topics related to theories and data derived from social psychology including health or prevention related behaviors, stress and coping, and the design and evaluation of behavioral interventions. The third volume examines the applied aspects of the field of health psychology including practical topics that clinical health psychologists face in the workplace, issues related to unhealthy behaviors that individuals engage in, behavioral aspects of medical problems, and issues related to the comorbidity of psychiatric disorders and chronic health problems. Volume IV examines special issues in health psychology covering various historical, philosophical, and conceptual issues. It also considers issues related to diversity and underrepresented/underserved groups.

COGNITIVE PSYCHOLOGY

The Tool Instinct

François Osiurak

Humans use countless tools and are constantly creating new ones. We are so prone to materiality that the changes we implement in our environment could put our very survival at stake. It has therefore become necessary to question the cognitive origins of this materiality. *The Tool Instinct* examines this subject by diametrically setting aside the idea that tool use is limited to manual activity. It proposes an original perspective that surpasses a great number of false beliefs regarding the relationship between humans and tools. The author argues that the human tendency to create and use tools relies on our ability (one that may be unique to our species) to generate our own physical problems, thereby resulting in a reasoning that is directed towards our physical world.

The Trace Factory

Yves Jeanneret

The collection and treatment of traces which reveal who we are and what we do naturally piques our interest when it pertains to others, and anxiety when it concerns ourselves. Do we truly know what a trace is? And if knowledge is power, how vulnerable are we in the public sphere? The demonstrability of a trace hides the complexity of the process that allows it to be produced, interpreted and used. This book proposes a reasoned approach to the analysis of the "trace" as an object and as a sign. By following such an approach, the reader will understand how the media participates in the creation and deployment of traces, and the issues raised by what can be traced on social media. *The Trace Factory* offers a historical perspective, returning to the founding theories of collecting and producing traces linked to knowledge and power in society. Observing technology and information through the prism of these theories, a large number of devices and their uses are evaluated.

The Empire of Depression

A New History

Jonathan Sadowsky

When is sorrow sickness? That is the question that this book asks, exploring how our understandings of sadness, melancholy, depression, mania and anxiety have changed over time, and how societies have tried to treat something which lies on the border between the natural and the pathological. Jonathan's book explores the various medical treatments for depression, classed as a modern illness with definite (but changing) symptoms from the 20th century onwards, in relation to a longer history of treatments for 'melancholia' and related states considered either as biological or social sicknesses or as a natural part of some people's constitution. He also compares the western history of medicalising depression with the experiences of both sadness and clinical depression in non-western cultures, such as Nigeria and Japan. The book is poetic but well-researched, written by a leading medical historian, and distinguished from the crowd of books about depression through its global focus, and its historical rigour.

Career Development and Counseling

Putting Theory and Research to Work, 3rd Edition

Steven Brown & Robert W. Lent

Career Development and Counseling focuses selectively on the theories that are empirically supported and useful in practice rather than an encyclopedic survey of every theory, regardless of relevance. The goal of the book is the promotion of scientifically-informed career practices from an interdisciplinary perspective. The editors and contributors draw on industrial/organizational psychology, personality psychology, etc. to further deepen their exploration of different career theories. The book begins with a new introductory chapter that highlights the importance of and need for career counseling in the 21st century. The first section covers the major empirically supported theories and section two looks at the roles of diversity, individual difference, and social factors in the career development process. Section three includes separate sections devoted to the assessment of important career constructs and occupational information systems. Section four explores the interventions for working with career issues across the lifespan.

Introduction to the Old Testament

Introduction to the Old Testament

Sacred Texts and Imperial Contexts of the Hebrew Bible, 2nd Edition

David M. Carr

This comprehensive textbook is unique in exploring the emergence of the Hebrew Bible in the broader context of world history. It particularly focuses on the influence of pre-Roman empires, empowering students with a richer understanding of Old Testament historiography. The book incorporates recent research on the formation of the Pentateuch and reveals how key biblical texts came to be interpreted by Jewish, Christian, and Muslim faiths. The introductory text engages students by placing the development and reception of biblical texts in their historical context – enabling them to explore the formation of the Hebrew Bible and also its subsequent interpretation. Numerous reader-friendly features are incorporated throughout, including study questions, review sections, bibliographies, timelines, and illustrations and photos.

**A Girl's Guide to Being Fearless**

Suzie Lavington & Andy Cope

Girls' Guide is the antidote to today's overwhelming world of altered photos, filters and fillers. With more than 1 in 3 teenage girls suffering from anxiety or depression as well as a huge rise in self harm and eating disorders, the need for a rock-solid wellbeing resource has never been more acute. *A Girls' Guide to Being Fearless* is a book of our time, reflecting the world as it is. There's little value in telling girls to stop doing selfies or using Instagram filters, because these habits are ingrained in teenage culture. The value lies in teaching young women how to retain control of their wellbeing, knowing how to respond, developing strategies to bounce back, and learning to be their own bestie – and this book does just that! It includes a host of practical exercises and do-able ideas to inspire young women to smash through self-limiting beliefs, lift themselves and each other up, love the skin they're in, exude confidence and be excited for their future.

Everything Will Be OK

A Story of Hope, Love and Perspective

Michael Crossland

Everything Will Be OK is the awe-inspiring story of Michael's journey from enduring life-threatening cancer as a child, to representing Australia playing baseball in the USA, to becoming an accomplished businessman and a globally in-demand inspirational speaker, starting an orphanage in Haiti and taking national ambassador roles with many organisations including Camp Quality. In this stirring memoir, Michael shares his story of hardship and challenges that many of us wouldn't even dream of facing, and reveals how a steadfast mindset, genuine compassion, tireless drive, and unwavering optimism helped him to overcome even the strongest obstacles. It is a simple and enduring belief that everything will be OK.

GENERAL SOCIOLOGY

Decolonizing Sociology

Decolonizing Sociology

A Guide to Theory and Practice

Ali Meghji

This book explores why, and how, sociology needs to be decolonized. It analyses how sociology was integral in reproducing the colonial order, as dominant sociologists constructed theories either assuming or proving the supposed barbarity and backwardness of colonized people. Ali Meghji reveals how colonialism continues to shape the discipline today, dominating both social theory and the practice of sociology, how exporting the Eurocentric sociological canon erased social theories from the Global South, and how sociologists continue to ignore the relevance of coloniality in their work.

Making the Familiar Unfamiliar

A Conversation with Peter Haffner

Zygmunt Bauman

Shortly before his death, Zygmunt Bauman spent several days in conversation with the Swiss journalist Peter Haffner. Out of these conversations emerged this book in which Bauman shows himself to be the pre-eminent social thinker for which he became world renowned, a thinker who never shied away from addressing the great issues of our time and always strove to interrogate received wisdom and common sense, to make the familiar unfamiliar. The conversations cover his personal life in Poland in the 1940s, 1950s and 1960s, before he was forced into exile in 1968. They therefore give a unique insight into Bauman's life and biography, shedding new light on his years in Poland, including his time working for the Polish secret services. The conversations also cover the central themes of Bauman's work, including his celebrated and very influential work on liquid modernity as well as his work on the Holocaust, Jewishness, identity and love.

Populism in the Civil Sphere

Jeffrey C. Alexander, Peter Kivisto & Giuseppe Sciortino

Jeffrey C. Alexander is one of the world's leading sociologists, and Peter Kivisto and Giuseppe Sciortino are distinguished international scholars who have worked and published on the civil sphere and sociology more broadly construed. This volume makes a major new contribution to our understanding of populism. Drawing on Alexander's influential theory of the civil sphere, it rejects the view that populism is a naturally occurring dimension of civil sphere dynamics, fatal to democracy only at the extremes. With examples and case studies across the world, from the US and the UK to Mexico, the Philippines, Turkey and Europe, this volume develops a comprehensive and comparative account of one of the most important political developments of our time.

POLITICAL SOCIOLOGY

Empires

A Historical and Political Sociology

Krishan Kumar

Empires have been the commonest form of political organization for most of recorded history. How should we best understand them? What are their principles and how do they differ from other political forms, such as the nation-state? What sort of relations between rulers and ruled do they express? *Empires* explores these questions through a fascinating analysis of the major empires of world history and the present. It pays attention not just to the modern overseas empires of the Europeans, but also to the ancient empires of the Middle East and Mediterranean, the Islamic empires of the Arabs, Mughals, and Ottomans, and the two-thousand-year Chinese Empire. As Kumar shows, understanding empires helps us understand better the politics of our own times.

POPULATION & DEMOGRAPHY

Asian America

2nd Edition

Pawan Dhingra

Asian Americans are the fastest growing minority population in the country. Moreover, they provide a unique lens on the wider experiences of immigrants and minorities in the United States, both historically and today. Pawan Dhingra and Robyn Magalit Rodriguez's acclaimed introduction to understanding this diverse group is here updated in a thoroughly revised new edition. Incorporating cutting-edge thinking and discussion of the latest current events, the authors critically examine key topics in the Asian American experience, including education and work, family and culture, media and politics, and social hierarchies of race, gender, and sexuality. Through vivid examples and clear discussion of a broad range of theories, the authors explore the contributions of Asian American Studies, sociology, psychology, history, and other fields to understanding Asian Americans, and vice versa. The new edition includes further pedagogical elements to help readers apply the core theoretical and analytical frameworks encountered.

Migration Studies and Colonialism

Lucy Mayblin

The history of migration is deeply entangled with colonialism. To this day, colonial logics continue to shape the dynamics of migration as well as the responses of states to those arriving at their borders. This book starts from the premise that colonial histories should be central to migration studies, and explores what it would mean to really take that seriously. To engage with this task, Lucy Mayblin and Joe Turner argue that scholars need not forge new theories, but must learn from and be inspired by the wealth of literature that already exists across the world. Providing a range of inspiring and challenging perspectives on migration, the authors' aim is to demonstrate what paying attention to colonialism through using the tools offered by postcolonial, decolonial, and related scholarship can offer those studying international migration today. Offering a vital intervention in the field, this important book asks scholars and students of migration to explore the histories and continuities of colonialism in order to better understand the present.

RESEARCH METHODOLOGIES

Problem Spaces

How and Why Methodology Matters

Celia Lury

In this innovative book, Celia Lury argues that the time has come for us to explore the world not only with new methods, but with a new approach to methodology itself. Fundamental changes are taking place in how we produce knowledge, how we communicate it and, indeed, what we consider to be knowledge. These changes demand innovative and creative responses to research questions. Lury's rethinking of the nature of social inquiry starts by reconceptualizing the 'problem space'. Problems are not static or a 'given'; rather, they are created and continually recomposed as part of the methodological process itself. Following the line of thought that methods are practices that articulate as much as capture a social problem, Lury further develops the notion of compositional methodology to think through its implications. With remarkable fluency, the book draws into conversation a range of hot-button issues, both longstanding and novel, from observation, reflexivity, recursive measurement and feminist methodologies, to participation, context, datafication and platformization.

SOCIAL IDENTITY

Gender

In World Perspective, 4th Edition

Raewyn Connell

How can we understand gender in the contemporary world? What psychological differences now exist between women and men? How are masculinities and femininities made? And how is gender entwined in global politics and debates over trans issues? Raewyn Connell, one of the world's leading scholars in the field, and Rebecca Pearse answer these questions and more. The fourth edition of this influential book brings the statistical picture of gender inequalities up to date, and offers new close-focus case studies of gender research. Like previous editions it examines gender politics and global power relations, but with added discussion around contemporary issues of intersectionality, populism, gender-based violence, trans struggles and environmental change. It also speaks at the intimate level, about embodied gender and personal relationships.

The Sociology of Identity

Authenticity, Multidimensionality, and Mobility

Wayne H. Brekhuis

How do people think about their identities? How do they express themselves individually and as part of collective groups, social movements, organizations, neighborhoods, or nations? Identity has important consequences for how we organize our lives, wield social power, and produce and reproduce privilege and marginality. In this lively and engaging book, Wayne H. Brekhuis explores the sociology of identity and its social consequences through three conceptual themes: authenticity, multidimensionality, and mobility. Drawing on vivid examples from ethnography, current events, and everyday life, he offers an approach to identity that goes beyond the individual and demonstrates how social groups privilege, flag, and shape identities.

The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism

John Stone, Rutledge M. Dennis, Polly Rizova & Xiaoshuo Hou

The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism provides expert insight into the complex, interconnected factors that are influencing patterns of human relations worldwide in a time of rising populist nationalism, intensified racial and religious tensions, and mounting hostilities towards immigrants and minorities. Analyzing the underlying forces which continue to drive global trends, this volume examines contemporary patterns based on the most recent evidence spanning five continents—offering a diversity of interpretations, models and perspectives that address the challenges facing the study of race, ethnicity, and nationalism.

SOCIAL THEORY

Pandemic!

COVID-19 Shakes the World

Slavoj Žižek

As an unprecedented global pandemic sweeps the planet, who better than the supercharged Slovenian philosopher Slavoj Žižek to uncover its deeper meanings, marvel at its mind-boggling paradoxes and speculate on the profundity of its consequences? We live in a moment when the greatest act of love is to stay distant from the object of your affection. When governments renowned for ruthless cuts in public spending can suddenly conjure up trillions. When toilet paper becomes a commodity as precious as diamonds. And when, according to Žižek, a new form of communism – the outlines of which can already be seen in the very heartlands of neoliberalism – may be the only way of averting a descent into global barbarism.

Planetary Social Thought

The Anthropocene Challenge to the Social Sciences

Nigel Clark

The Anthropocene has emerged as perhaps *the* scientific concept of the new millennium. Going further than earlier conceptions of the human–environment relationship, it proposes that human activity is tipping the whole Earth system into a new state, with unpredictable consequences. How should the social sciences respond to the opportunities and challenges posed by this development? In this innovative book, Clark and Szerszynski argue that social thinkers need to revise their own presuppositions about the social: to understand it as the product of a dynamic planet, self-organizing over deep time. They outline 'planetary social thought': a transdisciplinary way of thinking social life with and through the Earth. Using a range of case studies, they show how familiar social processes can be radically recast when looked at through a planetary lens, revealing how the world-transforming powers of human social life have always depended on the forging of relations with the inhuman potentialities of our home planet.

Posthuman Feminism

Rosi Braidotti

In a context marked by the virulent return of patriarchal and white supremacist attitudes, a new generation of activists, from the Xenofeminists to Pussy Riot, are continuing the struggle, fighting alongside star feminists like Emma Watson and Scarlett Johansson: these are very feminist times. But how do these and other struggles relate to our contemporary posthuman condition? In this important new book, Rosi Braidotti examines the implications of the posthuman turn for feminist theory and practice. She defines the posthuman turn as a convergence between post-humanism on the one hand and post-anthropocentrism on the other, and she examines the double impact of these two lines of critical enquiry for contemporary feminist practice.

The Disappearance of Rituals

A Topology of the Present

Byung-Chul Han

In this short book, eminent cultural theorist Byung-Chul Han argues that, as rituals lose their significance and use in the modern day, so we have lost the stabilising, community-building force they once offered. While Han does not advocate a return to a society of rituals, he uses his analysis of rituals to demonstrate what we have lost: the social ability to create and recognise meaning by sharing symbols which ritual once provided. In the modern world, we find ourselves living increasingly in a world of 'communication without community', exemplified by the internet, where individuals are increasingly exposed to exploitation and manipulation by neoliberal psycho-politics.

The Uncontrollability of the World

Hartmut Rosa

Our lives are played out on the border between what we can control and that which lies outside our control. But because we late-modern human beings seek to make the world controllable, we tend to encounter the world as a series of objects that we have to conquer, master or exploit. And precisely because of this, 'life,' the experience of feeling alive and truly encountering the world, always seems to elude us. This in turn leads to frustration, anger and even despair, which then manifest themselves in, among other things, acts of impotent political aggression. For Rosa, to encounter the world and achieve resonance with it requires us to be open to that which extends beyond our control. The outcome of this process cannot be predicted, and this is why moments of resonance are always concomitant with moments of uncontrollability.

Theorizing Violence

Sylvia Walby

Sylvia Walby offers new ways to theorize violence, placing it at the centre of society, not the periphery, and rethinking the relationship between violence and security. Arguing for an integrated analysis of internal and external security within a theory of society, she shows how neoliberal transformations have led to the growth of violence. Understanding these changes requires gendering theories of the state, the economy and civil society. With securitization growing while welfare and the regulation of the economy shrink, Walby uses complexity science to investigate the contradictions in state responses. Crucially, this book offers a way forward, drawing on inspirational practices and cutting-edge social theory, to better understand violence and the causes of its variations.

SOCIOLOGY OF CULTURE

Sociology of the Arts

Exploring Fine and Popular Forms, 2nd Edition

Victoria Alexander

Sociology of the Arts, second edition, is a comprehensive overview of the sociology of the arts and an authoritative work of scholarship by a leading expert in the field. A thoroughly updated version of the classic, bestselling first edition, it synthesizes theoretical models of art sociology and covers empirical research as well as providing stimulating exemplars of sociological work on the fine and popular arts. Case studies focus on a range of art forms, including children's books, musicals, popular music, film, romance novels, visual arts, and classical music. These studies combined with the book's considerable theoretical breadth and insight, explore how art is created, distributed, received, and consumed. The book also discusses newly emerging questions on the art itself, including issues of materiality, embodiment, and the social construction of art and aesthetics.

SOCIOLOGY OF ECONOMICS

**Commodification and Its Discontents***Nicholas Abercrombie*

Should human organs be bought and sold? Is it right that richer people should be able to pay poorer people to wait in a queue for them? Should objects in museums ever be sold? The assumption underlying such questions is that there are things that should not be bought and sold because it would give them a financial value that would replace some other, and dearly held, human value. Those who ask questions of this kind often fear that the replacement of human by money values – a process of commodification – is sweeping all before it. However, as Nicholas Abercrombie argues, commodification can be, and has been, resisted by the development of a moral climate that defines certain things as outside a market. That resistance, however, is never complete because the two regimes of value – human and money – are both necessary for the sustainability of society.

SOCIOLOGY OF HEALTH & ILLNESS

**The Sociology of Health and Illness**

4th Edition

Sarah Nettleton

Sarah Nettleton's *The Sociology of Health and Illness* has become a cornerstone text, popular with students and academics alike for its rigorous and accessible overview of the field. It covers a diversity of topics and draws on a wide range of analytic approaches, spanning issues such as the social construction of medical knowledge, the analysis of lay health beliefs, concepts of lifestyles and risk, the experience of illness and the sociology of the body. It also explores matters which are central to health policy, such as professional-patient relationships, health inequalities and the changing nature of health care work.

The **next generation of WileyPLUS**, a new way to teach and learn.

It gives you the freedom and flexibility to tailor curated content and easily manage your course in order to keep students engaged and on track.

Starting with Wiley's quality curated content, you can customize your course by hiding or rearranging learning objectives, setting the pacing of content, and even integrating videos, files, or links to relevant material. The easy-to-use, intuitive interface saves you time getting started, managing day-to-day class activities, and helping individual students stay on track.

INTEGRATED

While the New WileyPLUS can be used on its own, Canvas users will have a seamless LMS experience by simply importing their natively built course from Canvas Commons or through a zip file. Blackboard, D2L, and Moodle users will also be able to integrate their New WileyPLUS courses soon.

MOBILE

For iOS and Android users, the student, instructor, and eTextbook apps make teaching, learning, and grading possible from anywhere. The eTextbook, videos, animation, and questions are responsive so students can study from any device.

ACCESSIBLE

You can assign and create content without fear of students falling through the cracks. All content and questions have gone through an accessibility audit—and anything that doesn't meet standards is flagged so that you're in control.

Introducing **WileyPLUS**

- 1** Do you need your students to engage with their class?
- 2** Do they appear overwhelmed by the material?
- 3** Do they want a proven way to dramatically improve their grades?

If the answer to any of these questions is yes, it's time to take a look at WileyPLUS!

WileyPLUS is a research based online environment for effective teaching and learning. WileyPLUS builds students' confidence because it takes the guesswork out of studying by providing a clear roadmap; what to do, how to do it, if they did it right. With WileyPLUS, students take more initiative so you'll have a greater positive impact.

Also available with...

WileyPLUS with ORION

A personalised, adaptive learning experience

Based on cognitive science, WileyPLUS with ORION provides students with a personal, adaptive learning experience so they can build the proficiency on topics and use their study time most effectively.

ORION helps students learn by learning about them.
