

Pathy's Principles and Practice of Geriatric Medicine

6th Edition, 2-Volume Set

Edited By Alan J. Sinclair, John E. Morley,
Bruno Vellas, Matteo Cesari, and Medha Munshi

Medical Science | Geriatric Medicine

The latest edition of the gold standard in geriatric medicine references

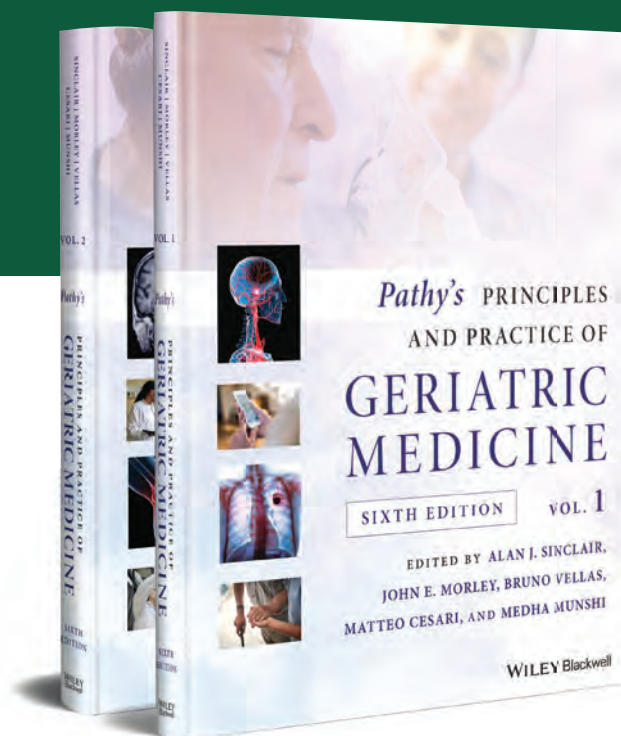

Pathy's Principles and Practice of Geriatric Medicine, Sixth Edition delivers a comprehensive overview of the subject, offering up-to-date, evidence-based, information about the many, and varied, problems suffered by ageing patients.

In this latest edition, the authors take a refreshed approach to the material, rigorously applying the latest scientific research to clinical practice and increasing the use of visual examples, algorithms, and clinical practice points. Thoroughly updated throughout, the chapters give readers a truly global perspective on geriatric medicine that reflect the most recent changes in treatment options and medical conditions.

In addition to new chapters on a range of recent and emerging topics, clinical practice points, and visual evidence—including MRI scans—the book also offers a:

- Thorough introduction to relevant biological, social, and community perspectives on caring for mature and ageing patients, as well as medicine prescribing for older patients
- Comprehensive exploration of eating disorders that commonly occur in the aged and how to maximize the nutritional health of ageing patients
- Practical discussions of haematological and cardiovascular disorders and diseases in ageing patients
- In-depth examination of special issues in elder care, including elder abuse, alcoholism and substance abuse, transportation issues, and end-of-life care

Perfect for all clinicians working with mature patients, *Pathy's Principles and Practice of Geriatric Medicine* will also continue to earn a place in the libraries of allied healthcare workers with ageing patients and clients.

About the Associate Editors

A.H. Abdelhafiz is a consultant physician and lead of the Geriatric Department at the Rotherham General Hospital-NHS Foundation Trust. He is the diabetes advisor for the British Geriatrics Society, and a member of the Foundation for Diabetes Research in Older People (FDROP).

Beatrice Arosio is the chief of the laboratory 'Laboratorio per lo Studio e la Terapia delle Malattie dell'Anziano' of the Geriatric Unit of the Department of Clinical Sciences and Community Health of the University of Milan. She is also the elected president of the board of directors of the Lombardy region of the Italian Society of Geriatrics and Gerontology.

Julien Delrieu has a significant clinical practice and research focus in the area of ageing and Alzheimer's disease, in particular the prevention of cognitive disorders. He has published more than 50 scientific papers in peer-reviewed journals and is currently involved in the Inspire Bio-resource Research Platform for Healthy Aging (INSPIRE Platform).

Milta Oyola Little is an associate professor of geriatric medicine at Duke University School of Medicine in Durham, North Carolina, USA. She serves as the medical director for a local continuing care retirement community and is a leader of health systems change, working to establish an Age-Friendly Health System in her region.

Suzanne Eva Salamon is an assistant professor of medicine at the Harvard Medical School. She is a geriatrician and practices primary care geriatrics at the Beth Israel Deaconess Medical Center, where she is the associate chief for clinical geriatrics.
