Applied Malting and Brewing Science: A Weiherstephan Compendium

L. Narziß

The landmark guide to malting and brewing science is available in English for the first time

Humans have been producing fermented beverages for at least ten thousand years. Chief among them is beer, which has arguably never been more popular than it is at this point in history. The United States alone boasts more than 9,500 breweries, a number which has risen steadily as the market for craft beer continues to grow in that country. Thus, maltsters and brewers there and around the world are constantly looking for ways to hone their skills to create products of the highest quality as consistently ...

The Elasticity of Life: From Tissues to Humans

Pascal Sommer, Romain Debre

Elasticity is absolutely necessary for living a normal life. This fact is cruelly revealed when respiratory, cardiac, digestive, sensory, motor, reproductive or aesthetic problems appear following the inexorable decline of our elastic capital.

The protection and maintenance of this capital is one of life's priorities since this declination begins at the age of twenty and accelerates in times of crises and pandemics. However, there are no therapies yet designed to remedy it.

The first part of the book explains the consequences

Dead Wrong: Diagnosing and Treating Healthcare's Misinformation Illness

Geeta Nayyar, Tom Castles, Jack Murtha

Dead Wrong is a map spanning the broken information ecosystem and healthcare organizations' path to progress. Readers will gain an understanding of the challenges, strategies to fight for the truth as an individual and from within a healthcare organization, and invaluable lessons from real-world stories. Unlike books that examine the problem from the ivory tower, *Dead Wrong* uses a physician's firsthand insights, interviews with healthcare leaders on the frontlines of the COVID fight, and academic research to deliver accessible information through captivating storytelling.

Decision Making in Veterinary Practice

Barry Kipperman

The first-ever guide to rational decision making in veterinary clinics and hospitals

Veterinary medicine entails crucial decisions about patient care and practice on a daily basis. Whether to admit patients displaying particular symptoms, whether to pursue diagnoses or prioritize therapeutic trials, whether to normalize overnight stays after routine surgery; the answers to questions like these can significantly shape patient outcomes and standards of care. However, clinicians are seldom trained to analyze their patterns of decision-making rationally, relying instead on the existing culture of a...
