Homo numericus: The coming 'civilization'

Cohen

From Amazon to Tinder, from Google to Deliveroo, there is no facet of human life which the digital revolution has not streamlined and dematerialised. Its objective was to reduce the cost of physical interactions by forgoing face-to-face interactions, a direct result of the free-market shock of the 1980s, which sought to seamlessly expand the marketplace in every possible dimension. Today, we can be algorithmically entertained, educated, cared for and courted in a way which was impossible in the old industrial society, where institutions structured the social world. Today, these institutions ha...

Know When to HODL, Know When to FODL: How to Trade Bitcoin Like a Pro

Eoghan Leahy

The buy and hold Bitcoin bull market from 2015-2018 was about access not skill. Now as financial institutions are entering the market the price action will become less volatile and more mean reverting in nature. As such the trading practices and instruments needed for success will become more sophisticated. In futures markets where other speculative commodities are traded technical analysis is widely used. The level of technical analysis knowledge amongst the cryptocurrency trading community is very basic. The group is desperate to learn advanced technical analysis trading techniques that can ...

The Intelligent Layman's Guide to Personal Investing

Roger D. Silk

For most people, intelligent, informed, confident do-it-yourself is beyond their practical grasp. It's not that the readers lack the intelligence; rather, they lack the time (both hours in the week, and years of experience required to gain confidence and a firm hand) required. This book aims to give readers the background necessary to do-it-themselves if they want to put in the effort. We also realize that for many, it will make more sense to use a professional advisor. Readers who choose not to do-it-themselves will be much more informed clients than most advisors' typical clients. And that's...

Ancestral Future

Krenak

In response to the damage caused by centuries of colonial ravaging and the current ecological, political and social crises, the leading Indigenous thinker and activist Ailton Krenak warns against the destructive powers of corporate capitalism and its irreversible impacts.

Ancestral Future draws attention to how we are constantly imagining some moment in the past or thinking about what is yet to come rather than living with what subsists around us. Unable to withstand the present, we escape into future imaginings and lose track of our here and now. If there is another kind of future to imagine, ...

Why AI Undermines Democracy and What To Do About It

Coeckelbergh

Across the world, Artificial Intelligence (AI) is being used as a tool for political manipulation and totalitarian repression. Stories about AI are often stories of polarization, discrimination, surveillance, and oppression. Is democracy in danger? And can we do anything about it?

In this compelling book, Mark Coeckelbergh offers a guide to the key risks posed by AI for democracy. He argues that AI, as it is currently used and developed, not only aids totalitarian regimes but also undermines the fundamental principles on which liberal democracies are founded such

Self-Esteem: An American History

I Miller

At the end of the last century, the idea of self-esteem became enormously influential. A staggering amount of psychological research and self-help literature was published, and before long was devoured by readers. Self-esteem initiatives permeated American schools. Self-esteem became the way of understanding ourselves, our personalities, our interactions with others. Nowadays, few people think much about the idea of self-esteem—perhaps we should.

Self-Esteem: An American History is the first historical study exploring the emotional politics of self-esteem in

Healing the Heart of Democracy: The Courage to Create a Politics Worthy of the Human Spirit (2nd Edition)

Palmer

In *Healing the Heart of Democracy*, Parker Palmer explores five “habits of the heart” that can help us restore democracy’s foundations as we nurture them in ourselves and each other:

An understanding that we are all in this together

An appreciation of the value of “otherness”

An ability to hold tension in life-giving ways

A sense of personal voice and agency

A capacity to create community

Uncertain Times

Randière

The global triumph of democracy was announced thirty years ago, promising an age of consensus in which the dispassionate consideration of objective problems would give birth to a world at peace. Today, these grand hopes have been destroyed, and the era touted as new and exceptional has turned out to be remarkably similar to the old order – but not simply due to the aggression of external forces. Instead, we must look to the nature of consensus itself, which, in the view of leading radical philosopher Jacques Randière, is revealed as a violent, absolutized capitalist machine whose output is eve...

Familiar Violence: A History of Child Abuse

Montgomery

Child abuse casts a long shadow over the history of childhood. Across the centuries there are numerous accounts of children being beaten, neglected, sexually assaulted, or even killed by those closest to them. This book explores this darker side of childhood history, looking at what constituted cruelty towards children in the past and at the social responses towards it. Focusing primarily on England, it is a history of violence against children in their own homes, covering a large timeframe which extends from medieval times to the present.

Undeniably, the experience of children in the past was ...

If we lose the Earth, we lose our souls

Bruno Latour, Catherine Porter, Sam Ferguson

In this book Bruno Latour calls upon Christians to join the struggle to avert a climate catastrophe. First and foremost, Christians need to overcome their lack of interest in 'earthly things' and pay attention to the Earth at a time when it is being neglected. He also urges Christians to renew their understanding of their faith in the context of the new image of the world that has emerged from Earth system science – that of a world in which the myriad of beings that inhabit the world are interdependent and living in close proximity on a slender, fragile membrane on the surface of the planet....

Superyachts: Luxury, Tranquillity and Ecocide

Salle

A superyacht is a boat that exceeds 30 metres in length, with some surpassing even 100 metres — more than a football field. At the beginning of the 21st century, there were about 2,000 of these vessels in the world; two decades and a financial crisis later, there are three times as many.

Grégory Salle argues that these are not whimsical fads: on the contrary, luxury yachting highlights the social exclusivity of the wealthiest and the environmental waste they emit. Rather than being simply the plaything of billionaires with extravagant lifestyles, the superyacht offers a disconcerting reflectio...

Patterns: Theory of the Digital Society

Nassehi

We're inclined to assume that digital technologies have suddenly revolutionized everything in just a few years, including our relationships, our forms of work and leisure and even our democracies. Armin Nassehi puts forward a new theory of digital society which turns this assumption on its head. Rather than treating digital technologies as an independent causal force that is transforming social life, he asks: for which problem is digitization a solution?

When we pose the question in this way, we can see, argues Nassehi, that digitization helps societies deal with, and reduce, complexity by usi...

For the past eight decades, we have lived in “the American Century” – a period during which the US has enjoyed unrivalled power – be it political, economic or military - on the global stage. Born on the cusp of this new era, Joseph S. Nye Jr. has spent a lifetime illuminating our understanding of the changing contours of America power and world affairs. His many books on the nature of power and political leadership have rightly earned him his reputation as one of the most influential international relations scholars in the world today.

In this deeply personal book, Joseph Nye shares his own...

Democracy Needs Religion

Hartmut Rosa, Valentine A. Pakis

What role does religion play in modern societies? Is it merely an anachronism that hinders our economic growth? Is it a kind of superstition that people should be left to enjoy in private but should refrain from discussing in public? It is no secret that the Christian churches in Western societies have massive problems – quite apart from the recent scandals. Shrinking congregations are just one sign of their diminishing relevance. But what would happen to democracy if the resonance of religion were to fade entirely?

Leading sociologist Hartmut Rosa addresses this

How Nietzsche Came in From the Cold: Tale of a Redemption

Felsch

Nietzsche's reputation, like much of Europe, lay in ruins in 1945. Giving a platform to a philosopher venerated by the Nazis was not an attractive prospect for Germans eager to cast off Hitler's shadow. It was only when two ambitious anti-fascist Italians, Giorgio Colli and Mazzino Montinari, began to comb through the archives that anyone warned to the idea of rehabilitating Nietzsche as a major European philosopher.

Their goal was to interpret Nietzsche's writings in a new way and free them from the posthumous falsification of his work. The problem was that 10,000 hours of their work

Sad Planets

Pettman

"Everything is sad," wrote the Ancient poets. But is this sadness merely a human experience, projected onto the world, or is there a gloom attributable to the world itself? Could the universe be forever weeping the "tears of things"?

In this series of meditations, Dominic Pettman and Eugene Thacker explore some of the key "negative affects" - both eternal and emergent - associated with climate change, environmental destruction, and cosmic solitude. In so doing they unearth something so obvious that it has gone largely unnoticed: the question of how we should feel about climate change. *Between*

The Triumph of the Slippers: On the Withdrawal from the World

Bruckner

Since the beginning of the 21st century, global warming, terrorism, the pandemic and now the war in Ukraine have created a widespread feeling that the world is an increasingly dangerous place. In response to this situation, it is understandable that many people are inclined to retreat to the safety of their home - the last refuge and safeguard against the savagery of the outside world. But the home is not just a shelter: it is a space that supplants and replaces the world, a wired cocoon that gradually renders any journey to the outside world superfluous.
