Food Security in the Developing World

MK Bashir

Developing countries are home to about 98% of the world's undernourished people. It is time to understand the dynamics of food security in these countries. Understanding three core issues in depth – food availability, accessibility and utilization – will help us to understand the phenomenon of food security and guide the policy process in developing countries. *Food Security in the Developing World* brings together these three core food security issues in one volume. Chapters focus on food availability levels, and general policy practises to maintain food stocks in developing countries, as well as...

Developing Communication Skills for Veterinary Practice

Shaw

Developing Communication Skills for Veterinary Practice provides a thorough grounding in practical communication principles for client and team interactions, and helps veterinarians and staff take their communication skills to the next level through self-development and coaching colleagues. The book describes specific evidence-based techniques, gives examples of their use, and demonstrates how to use each skill in the clinical setting, with learning activities to put into practice. It covers every mode of communication, including face-to-face, virtual, telephone, and written communication.

Equine Bandaging, Splinting, and Casting Techniques

J. Dylan Lutter

A practical reference manual dealing with a vital component of clinical practice in equine medicine

The application of bandages, splints, and casts is an essential part of equine surgical and veterinary care. Traditionally, however, there have been few available resources wholly dedicated to application techniques. The result is that equine veterinary practitioners learn to bandage, splint, and cast on the job, with highly variable results; some practitioners are unwilling even to attempt a cast, spurning this valuable healing tool entirely rather than attempt it from an uncertain base of knowl...

Professional Reasoning in Healthcare: Navigating Uncertainty Using the Five Finger Framework

H Jeffery

A guide to decision-making and critical thinking in diverse healthcare practice contexts.

Professional reasoning is an essential component of health practice. To thrive in a world that demands constant change where there is not necessarily a right or wrong answer, strong frameworks are needed to support effective decision making. Critical to safe, ethical and culturally responsive practice decisions is the ability to integrate information from research evidence, the client, and the context/environment. Practitioners draw from
