Game Theory: An Introduction (3rd Edition)

E. N. Barron

Authoritative and quantitative approach to modern game theory with applications from areas including economics, political science, computer science, and engineering

Game Theory acknowledges the role of mathematics in making logical and advantageous decisions in adversarial situations and provides a balanced treatment of the subject that is both conceptual and applied. This newly updated and revised Third Edition streamlines the text to introduce readers to the basic theories behind games in a less technical but still mathematically rigorous way, with many new real-world examples from various f...

The Art of Commitment Pacing: Engineering Allocations to Private Capital

Thomas Meyer

Advanced guidance for institutional investors, academics, and researchers on how to manage a portfolio of private capital funds

The Art of Commitment Pacing: Engineering Allocations to Private Capital provides a much-needed analysis of the issues that face investors as they incorporate closed ended-funds targeting illiquid private assets (such as private equity, private debt, infrastructure, real estate) into their portfolios. These private capital funds, once considered “alternative” and viewed as experimental, are becoming an increasingly standard component of

Understanding Wine Chemistry (2nd Edition)

Andrew L. Waterhouse, Gavin L. Sacks, David W. Jeffery

Understanding Wine Chemistry
Understand the reactions behind the world's most alluring beverages

The immense variety of wines on the market is the product of multiple chemical processes – whether acting on components arising in the vineyard, during fermentation, or throughout storage. Winemaking decisions alter the chemistry of finished wines, affecting the flavor, color, stability, and other aspects of the final product. Knowledge of these chemical and biochemical processes is integral to the art and science of winemaking.

Understanding Wine Chemistry has served as the

Digital Touch

Carey Jewitt, Sara Price

Touch matters. It is fundamental to how we know ourselves and each other, and it is central to how we communicate. Digital touch is embedded in many technologies, from wearable devices and gaming hardware to tactile robots and future technologies. What would it be like if we could hug or touch digitally across distance? How might this shape our sense of connection? How might we establish trust or protect our privacy and safety?

Digital Touch is a timely and original book that addresses such questions. Offering a rich account of digital touch, the book introduces the key theories and debates on

Podcasting

Jeremy Wade Morris

Podcasting burst onto the media landscape in the early 2000s. At the time, there were hopes it might usher in a new wave of amateur and professional cultural production and represent an alternate model for how to produce, share, circulate and experience new voices and perspectives. Twenty years later, podcasting is at a critical juncture in its young history: a moment where the early ideals of open standards and platform-neutral distribution are giving way to services that prioritize lean-back listening and monetizable media experiences.

This book provides an accessible and comprehensive...

David Walker: The Politics of Racial Egalitarianism

Sherrow O. Pinder

David Walker, a free (with a small f) black man, was one of the most significant African-American abolitionists of the nineteenth century. Born in a slave society before moving to Boston where, after the American Revolutionary War, slavery was abolished, Walker devoted his life to fighting slavery and antiracist racism.

In this book, Sherrow O. Pinder brings to light Walker's lived experience, activism, and the synchronizing of his Christian principles and reformist radicalism to demonstrate why and how slavery must be eliminated.

The New Antisemitism: The Resurgence of an Ancient Hatred in the Modern World

Shalom Lappin

Generations raised after the Second World War took for granted a world of stability and prosperity, and with it the waning of ancient hatreds. Recent decades have been more sobering. Instability and extremism have returned in force, and as Shalom Lappin explains in this worrying book, an upsurge of antisemitism across the political spectrum.

Lappin explores in particular the disturbing correlation between the expansion of economic globalization and the return of anti-Jewish ideas we thought had been

Behind the Wall: My Brother, My Family and Hatred in East Germany

Ines Geipel, Nick Somers

Germany, like many countries, has witnessed the rise of extremist far-right groups and parties in recent years, and no more so than in the eastern regions. Why have those parts of Germany that used to be part of the old GDR turned out to be so supportive of extremist groups and parties and such fertile ground for violence and hatred?

To try to find answers to this question, Ines Geipel, the former East German Olympic athlete, returns to her past in order to explore the matrix of fear and anxiety that shaped the lives of people in the GDR. Spurred on by

Navigating English Grammar: A Guide to Analyzing Real Language (2nd Edition)

Anne Lobeck, Kristin Denham

Navigating English Grammar presents an engaging and insightful introduction to the structure of English. Lobeck and Denham's inquiry-based approach encourages students to discover the fundamentals of English grammar by investigating their own intuitive knowledge of the language. This popular textbook equips students with a practical set of tools to analyze English in all its varieties and representations.

By exploring how English varies from community to community, and how English has changed over time, students find that English, like any other language, is a

Invisible Warfare: How Does a Book Defeat an Empire?

Liao Yiwu, Michael M. Day

As a writer, poet, musician and dissident, Liao Yiwu is one of the most important chroniclers and analysts of contemporary China. In his books, he draws on his own experiences of imprisonment and mistreatment at the hands of the Chinese state to criticise abuses of power and give a voice to the downtrodden and disenfranchised.

In this powerful memoir, Liao Yiwu reflects on his own journey from imprisonment in Sichuan to his current life in Berlin, where he now works as a full-time writer. As China's presence and influence on the international stage

Wuhan: A Documentary Novel

Liao Yiwu, Michael M Day

As rumours of a strange new illness in Wuhan spread via social media in China, 25-year-old citizen reporter Kriss decides to travel to the epicentre of the disaster to try to find out what is really going on. He sees an ad for corpse carriers at a funeral home – Male or female, 16-50 years old, unafraid of ghosts – and decides to apply. He quickly realises that the official death figures bear no relation to what is happening in the local crematoria. But the brief moment when he can tell the truth to his followers on social media is soon over: he is discovered, followed and arrested by the sec...

Real Gender: A Cis Defence of Trans Realities

Danièle Moyal-Sharrock, Constantine Sandis

Societies around the world are struggling to think clearly about trans realities and understand trans identities. *Real Gender* is the first book to present a cis defence of what it means to be transgender.

Moyal-Sharrock and Sandis delve into the various factors which make many trans people's experience of their gender (or lack thereof) as natural and unquestionable as that of cis people. While recognising the undeniably social aspects of gender, they find that gender cannot be completely divorced from our biological underpinnings. Contrary to popular opinion, gender self-identification does n...

HAMAS: The Quest for Power

Beverley Milton-Edwards, Stephen Farrell

Dedared a terrorist menace yet voted into government in a free election, Hamas then used its Gaza power base to launch cross-border attacks that scorched Israel and transformed the dynamics of the Israeli-Palestinian conflict. How did a small Palestinian offshoot of the Muslim Brotherhood grow to challenge long-established rivals such as the PLO? Who supports Hamas and what is its agenda? How powerful has it become and how strong will it remain?

With decades of combined experience researching and reporting from the occupied West Bank and Gaza, Jerusalem, and around the Middle East, Beverley M...

Left Is Not Woke

Susan Neiman

If you're woke, you're left. If you're left, you're woke. We blur the terms, assuming that if you're one you must be the other. That, Susan Neiman argues, is a dangerous mistake.

The confusion arises because woke is fuelled by traditionally leftwing emotions: the wish to stand with the oppressed and marginalized, to address historic crimes. But those emotions are undermined by widespread philosophical assumptions with reactionary sources. As a result, wokeism conflicts with ideas that have guided the left for more than 200 years: a commitment to universalism, a firm distinction between justice...

You Can't Teach That!: The Battle over University Classrooms

Keith E. Whittington

Who controls what is taught in American universities – professors or politicians?

The answer is far from clear but suddenly urgent. Unprecedented efforts are now underway to restrict what ideas can be promoted and discussed in university classrooms. Professors at public universities have long assumed that their freedom to teach is unassailable and that there were firm constitutional protections shielding them from political interventions. Those assumptions might always have been more hopeful than sound. A battle over the control of the nation's classrooms is now...

Child Psychology: Pathways to Good Practice

Helen Pote, Anna Picciotto, Clare Norris

Navigate the challenging world of child and adolescent psychology with this valuable guide

Treatment of psychological distress in children is an enormously challenging and rewarding practice. Children and their psychological needs vary widely, and successful practitioners must be open to a range of treatment practices and toolkits in order to create a tailored program for each child. The field of child psychology has only recently begun to develop the body of evidence-based theories and models required to clearly direct clinical practice; as a result, a confident child psychological therapist ...

A fascinating collection of essays exploring a fresh contemporary approach to the person and doctrine of Jesus Christ

How should Christians think about the person of Jesus Christ today? In this volume, Sarah Coakley argues that this question has to be 'broken open' in new and unexpected ways: by an awareness of the deep spiritual demands of the christological task and its strikingly 'apophatic' dimensions; by a probing of the paradoxical ways in which Judaism and Christianity are drawn together in Christ, even by those who reject the claims of...

What is Political Sociology? (2nd Edition)

Elisabeth S. Clemens

With an entire discipline devoted to political science, what is distinctive about political sociology? This concise book explains what a sociological perspective brings to our understanding of the emergence, reproduction, and transformation of different forms of political order. Crucially, political sociology expands the field of view to the politics that happen in other social settings – in the family, at work, in civic associations – as well as the ways in which social attributes such as class, religion, age, race, and gender shape patterns of political participation and the distribution of ...

Subjectified: Becoming a Sexual Subject

Suzannah Weiss

Subjectified is a book about subjects, objects, and verbs. It is also a book about clothing-optional resorts, group masturbation circles, and sex parties.

Suzannah Weiss takes the reader through her adventures as a sex and relationship writer to explore how we can create a world with less objectification and more subjectification — placing women and other marginalized groups in the subject role of sentences and actions. Offering a deeply personal account and powerful critique of sexual empowerment movements, Suzannah Weiss presents a way forward that focuses more on what

The Privileged Few

Clive Hamilton, Myra Hamilton

Male and white privilege are on the decline, yet elite privilege has gone from strength to strength. The privileges enjoyed by the rich and powerful are not only unfair but cause widespread harm, from the everyday slights and humiliations visited on those lower down to the distortions in the labour market when elites use their networks to secure plum jobs, not least in new domains like professional sports.

In this book, Clive Hamilton and Myra Hamilton show that elite privilege is not a mere by-product of wealth but an organising principle for society as a whole. They explore the practices and...

Democracy Needs Religion

Hartmut Rosa, Valentine A. Pakis

What role does religion play in modern societies? Is it merely an anachronism that hinders our economic growth? Is it a kind of superstition that people should be left to enjoy in private but should refrain from discussing in public? It is no secret that the Christian churches in Western societies have massive problems – quite apart from the recent scandals. Shrinking congregations are just one sign of their diminishing relevance. But what would happen to democracy if the resonance of religion were to fade entirely?

Leading sociologist Hartmut Rosa addresses this

Artificial Intelligence in Architecture

Matias del Campo

Artificial intelligence (AI) applications in architectural design have achieved a critical mass and exploded into the mainstream of architectural imaginations. From practical applications in design and construction to the implications for architectural theory to a plethora of novel tools for accelerated morphological studies, what has become clear is that the discipline is passing a threshold that fundamentally changes architecture as a whole. However, the most radical change is the interrogation and novel discussion of authorship and agency in design ecologies driven by synthetic imaginations...

The Code of Honor: Embracing Ethics in Cybersecurity

Paul Maurer, Ed Skoudis

A comprehensive and practical framework for ethical practices in contemporary cybersecurity

While some professions – including medicine, law, and engineering – have wholeheartedly embraced wide-ranging codes of ethics and conduct, the field of cybersecurity continues to lack an overarching ethical standard. This vacuum constitutes a significant threat to the safety of consumers and businesses around the world, slows commerce, and delays innovation.

The Code of Honor: Embracing Ethics in Cybersecurity delivers a first of its kind comprehensive discussion of the

Visualize This: The FlowingData Guide to Design, Visualization, and Statistics (2nd Edition)

Nathan Yau

One of the most influential data visualization books—updated with new techniques, technologies, and examples

Visualize This demonstrates how to explain data visually, so that you can present and communicate information in a way that is appealing and easy to understand. Today, there is a continuous flow of data available to answer almost any question. Thoughtful charts, maps, and analysis can help us make sense of this data. But the data does not speak for itself. As leading data expert Nathan Yau explains in this book, graphics provide little value

Planet Aqua: Rethinking Our Home in the Universe

Jeremy Rifkin

What would happen if we were to awaken one day and suddenly realize that the world we live in appeared eerily alien, as if we'd been teleported to some other distant world? That frightening prospect is now. Our planetary hydrosphere, which animates all of life on Earth, is rebelling in the wake of a global warming climate, spurring biblical spring floods, devastating summer droughts, heatwaves, and wildfires and powerful autumn hurricanes and typhoons, wreaking havoc on ecosystems and society.

For too long we have misjudged the very nature of our existence and the relationship between our planet and the universe.

Feminisms-Museums-Surveys: An Anthology

Hilary Robinson, Lara Perry

The first anthology of feminist art exhibition essays and museum publications, providing an exciting and valuable overview of recent developments in feminist curation

Feminisms-Museums-Surveys: Exhibition Curating 2005-2022 brings together works from exhibition catalogs and museum publications to provide a comprehensive and timely view of the modern approach to feminist curating. Offering insights into how curators from around the world engage with different feminisms and select and exhibit feminist art, this one-of-a-kind anthology exemplifies the diversity of feminist thinking and curatorial...

Mobile Media Methods

Larissa Hjorth, Gerard Goggin

Mobile media such as smartphones, apps, and social media are an integral part of everyday life, used by billions of people around the world. For students and researchers, mobile media also offer a treasure trove of new concepts, methods, and techniques to do research — representing a new phase in digital methods. Across disciplines, researchers rely upon mobile media for quantitative and qualitative projects, to gather data and document sound and images, engage with participants, and disseminate findings.

This is the first textbook devoted to explaining these

Twitch

Mark R. Johnson

Twitch is the leading live streaming platform in most of the world and an integral part of contemporary digital gaming. Millions of people broadcast their digital game play (as well as other activities) to over a hundred million people who regularly visit the site.

In this accessible book, Mark R. Johnson offers both a synthesis of existing Twitch research and a new way to understand Twitch as a public forum for gaming. Drawing on ideas of the ancient Greek "agora" or public forum, Johnson demonstrates how Twitch has become the key location for digital game players looking to understand

Sexed: A History of British Feminism

Susanna Rustin

Susanna Rustin's *Sexed* is a radical retelling of the story of British feminism.

Starting in the revolutionary 1790s and ending in the present day, she introduces the 1830s radicals who demanded "LIBERTY FOR EVER!", Victorian petitioners who expected to be dead before women won the vote, and rival camps of suffragists who embraced and rejected violence. She considers the contributions of the first female MPs, as well as activists including the Greenham peace protesters and the black and Asian women's groups of the 1970s and 1980s.

The Writing Revolution: A Guide to Advancing Thinking Through Writing in All Subjects and Grades (2nd Edition)

Judith C. Hochman, Natalie Wexler

Lead a writing revolution in your classroom with the proven Hochman Method

Teachers at all grade levels are expected to bring students' writing ability up to rigorous state standards, but there is little reliable guidance on how to do that. Teachers need a road map for teaching writing, and *The Writing Revolution* offers just that. This bestseller shows K-12 educators how they can incorporate The Hochman Method of writing instruction in their instruction, no matter what subject they're teaching or the grade or ability level of their

New Teacher Mindset: Practical and Innovative Strategies to Be Different from Day One

Trevor Muir, John Spencer

A refreshing and hopeful guide to help new and veteran teachers thrive in our ever-changing world

New Teacher Mindset is all about creating successful systems, practices, and protocols that make sense for today's teachers. To be the best teacher you can be, you need to understand how new technologies and a changing societal landscape have altered the needs of students—and how to modify your teaching approach accordingly. This book gives you a fresh take on topics like classroom management, project-based learning, group collaboration, increasing buy-in, and partnering with

A History of Rest

Alain Corbin, Helen Morrison

Rest occupies a space outside of sleep and alertness: it is a form of recuperation but also of preparation for what is to come, and is a need felt by human and animal alike. Through the centuries, different and conflicting definitions and forms of rest have blossomed, ranging from heavenly repose to what is prescribed for the modern affliction of burn-out. What has remained constant is its importance: long the subject of art and literature, everyone understands the need not to disturb the aimless, languishing, daydreaming Lotus-eater.

Not viewed simply as an antidote for fatigue, for a long ...

The Truth About English Grammar

Geoffrey K. Pullum

Do you worry that your understanding of English grammar isn't what it should be? It may not be your fault. For hundreds of years, vague and confused ideas about how to state the rules have been passed down from one generation to the next. The available books for the general reader – thousands of them, shamelessly plagiarizing each other – repeat the same misguided definitions and generalizations that appeared in the schoolbooks used by your great-great-grandparents.

Geoff Pullum thinks you deserve better. In this book he breaks away from the tradition. Presupposing no prior knowledge or techni...

Byung-Chul Han: A Critical Introduction

Steven Knepper, Ethan Stoneman, Robert Wyllie

Byung-Chul Han is one of the most important living philosophers, renowned for his critiques of the digital age. In response to the idea that new technological devices expand our freedom, he argues that they lead to burnout and self-absorption and that we must redevelop contemplative practices which slow us down and open us up. He has brought to his thought forms of deep cosmopolitanism developed from both Zen Buddhism and a renewed Romanticism.

This book is the first critical introduction to Han's body of work. Wyllie, Stoneman, and Knepper explore Han's rich

Carbon: A Biography

Bernadette Bensauve-Vincent, Sacha Loeve, Stephen Muecke

Carbon is much more than a chemical element: it is a polymorphic entity with many faces, at once natural, cultural and social. Ranging across 10 million different compounds, carbon has as many personas in nature as it has roles in human life on Earth. And yet it rarely makes the headlines as anything other than the villain of our fossil-based economy, feeding an addiction which is driving dangerous levels of consumption and international conflict and which, left unchecked, could lead to our demise as a species. But the impact of CO₂ on climate change only tells part of the story, and to demoni...

The Assault on the State: How the Global Attack on Modern Government Endangers Our Future

Stephen E Hanson, Jeffrey Kopstein

What if the state as we know it didn't exist? Our air would be poisonous, our votes uncounted, and our markets dysfunctional. Yet across the world, in countries as diverse as Hungary, Israel, the U.K., and the U.S., attacks on the modern state and its workforce are intensifying. They are morphing into power grabs by self-aggrandizing politicians who attempt to seize control of the state for themselves and their cronies. What replaces the modern state once it is fatally undermined is not the free market and the flowering of personal liberty. Instead, the death of...

Reconstruct Your Faith: Ancient Ways to Make Your Relationship with God Whole Again

Kevin Young

Navigate the deepest questions of faith with the compassionate guidance of a pastor whose faith nearly fell apart

This book is a must have for anyone facing a crisis of faith. When our hearts begin to question faith, we often fear voicing our concerns and confusions aloud. But questioning is inherent in the journey as we seek truth faith, as author and pastor Kevin M. Young has learned firsthand. At a time when many lack trust in clergy—and clergy members themselves are facing burnout and disillusionment—we need an honest and accountable

Nations, States and Empires

John A. Hall

This book traces the interactions between nations, states and empires in the making of the modern world.

It is commonly assumed that nation states succeeded and replaced empires, relegating empires to the past: Hall argues that this is not the case. Empires have continued alongside nation states, shadowing them and overseeing them in the industrial era. The two world wars were imperial wars, rather than wars between nation states. Even after rapid decolonization in the 1950s and 1960s, empires persisted in the USA and the USSR. Furthermore, empires are not finished: the USA retains enormous...

Integrity: The Rise of a Distinctive Western Idea and Its Destiny

Martin Albrow

Public life is dominated from time to time by media storms around integrity. The behaviour of elected politicians like Donald Trump and Boris Johnson has led many to decry the deterioration in standards and the lack of integrity in public life. But what is integrity, and where does our concern with integrity in public life come from?

In this book Martin Albrow argues that integrity has been an essential component of the rise of the West and a key feature that distinguishes the West from other civilizations. He traces the idea of integrity back to its roots in Ancient Greece and Rome, and...

What is Health?

Ruth Cross

What is health? What does health mean to people? How do we make sense of health and experience it?

There are no simple answers to these questions. Health is complex, subjective and varied. Drawing on theory, research and contemporary debates, Ruth Cross explores the nature of health in depth and challenges our thinking about it. Moving beyond taken-for-granted assumptions, she gives the meaning of 'health' its due attention, exploring everyday perspectives as well as 'expert' medical, academic and policy understandings and approaches. In doing so, the book brings together different...

Critical Systems Thinking: Responsible Leadership for a Complex World

Michael C. Jackson

Understand the full range of systems approaches and how to use them with this innovative overview.

Leaders and managers face increasing complexity and uncertainty because technical, organizational, socio-cultural, political, and environmental issues have become intensely interconnected. Systems thinking is recognized as the essential competence for managing complexity. As the demand for systems thinking grows, however, the fragmentation of the field into different methodologies has become a potential liability. Critical systems thinking (CST)
