Introduction to the Masticatory System and Dental Occlusion

Dinesh Rokaya

A comprehensive introduction to the masticatory system and its relation to dental occlusion

Introduction to the Masticatory System and Dental Occlusion meets the need for a rigorous guide to the masticatory system and how it relates to dental occlusion to aid interventions. The text offers a sound understanding of functioning dental anatomy and the biomechanics that are essential to understanding dental occlusion. It covers all structures required for chewing: jaws and jaw muscles, teeth, joints, and tongue as well as other significant areas including the vascular and nervous systems that supp...

Dentofacial and Occlusal Asymmetries

Birte Melsen, Athanasios E. Athanasiou

Comprehensive and accessible resource that covers all crucial aspects of dentofacial and occlusal asymmetries

Dentofacial and Occlusal Asymmetries covers all crucial aspects of asymmetries encountered in the stomatognathic region regarding diagnosis, treatment planning, management, and prognosis. Divided into three core sections, the first part focuses on the etiology of asymmetry and whether it is congenital or acquired through disease or trauma. The second and third sections go on to discuss localization and management, providing information on topics such as interception, correction, and

Smart Food Packaging Systems: Innovations and Technology Applications

Avik Mukherjee, Santosh Kumar, Manjusri Misra, Amar Mohanty

Understand the future of food packaging with this timely guide

Food packaging is a vital part of the food industry. It contributes to food safety and quality throughout the supply chain, reduced product loss, allows high-quality goods to be shipped safely to underserved regions, and more. Smart food packaging systems, which can sense or detect changes in the product or packaging, are at the forefront of this field, and show potentially revolutionary promise.

Sustainable Food Schemes and Labels

Amarjit Sahota

Sustainable Food Schemes and Labels provides a comprehensive discussion of the most popular sustainability schemes and eco-labels in the food industry. Details are given of the most popular (widely adopted) schemes: organic and fair trade, as well as schemes for ingredients, such as Roundtable on Sustainable Palm Oil, as well as emerging schemes for plant-based foods. Using case studies, the impacts of popular schemes will be discussed. What impact do sustainability schemes have on soil fertility, biodiversity and local communities? How are such impacts measured and communicated to consumers?

People-Centred Pharmacy: Ethical Challenges in Everyday Practice

David Seedhouse

Discover people-centred decision-making for pharmacists in this clear and practical volume

Pharmacy ethics and decision-making are a critical part of pharmaceutical care. Pharmacists are routinely faced with decisions that impact the immediate and long-term health of patients and must exercise professional judgement when the best choices are uncertain.

Current guides to ethical decision making in healthcare are generally written for doctors or nurses, overlooking the distinctive needs in this crucial area of practice.

Symptoms in the Pharmacy: A Guide to the Management of Common Illnesses and Disease Prevention (10th Edition)

Alison Blenkinsopp, Martin Duerden, John Blenkinsopp

Community pharmacies are often the first source for information and advice when health problems arise. Increasingly patients are being referred to pharmacists by other health care professionals through Pharmacy First and similar schemes.

This book presents a decision-making framework along with 'red flags', 'when to refer' and evidence-based treatment recommendations. A unique feature is that case studies appear throughout, in which pharmacists, doctors, nurses and patients describe assessment and treatment of

Surviving and Thriving in Midwifery

Sally Pezaro, Karen Maher

A practical, evidence-based approach to psychological and professional well-being for midwives

Midwifery is an essential profession with a life-saving role in perinatal care. However, studies show that midwives experience remarkably high levels of work-related psychological distress, leading to equally high levels of attrition from the profession. If these issues are not addressed, the loss of qualified midwives may seriously impact the profession's ability to fight perinatal and infant mortality worldwide.

Surviving and Thriving in Midwifery offers a practical

Patty's Toxicology

7th Edition

Edited by Dennis J. Paustenbach, McLaren Environmental Engineering, Alameda, California; William H. Farland; James Klaunig; Len Levy and Helmut Greim

Patty's Toxicology has long been recognized as the premier reference for toxicological information on a large number of industrial chemicals that pose potential health hazards for workers and consumers. The new edition provides updates for 90 chapters and features 20 new chapters. New Editors-in-Chief, and for the first time a group of Associates editors, bring a diverse new perspective and a more international focus.

The 7th edition reorganizes the book to place the key introductory topics in Volume 1. The first volume provides the basic concepts, approaches and vocabulary that recur throughout the rest of the book. There are several new sections to the introductory volume including biotransformation of xenobiotics, toxicokinetics, mitochondrial toxicology, genetic toxicology, cancer risk assessment reproductive and developmental, and the setting of occupational exposure levels.

Other topics added to subsequent volumes include fluorinated compounds used in food packaging such as for non-stick pans as well as for making upholstered furniture, carpets, shoes, mattresses and clothing that are resistant to soil, stains, and water. Other new chapters include flavoring chemicals, flame retardants and engine lubricants. The 7th edition also contains information on plasticizers/phthalates, and exhaust from diesel engines. The section in *Patty's* pertaining to agricultural chemicals is reorganized and expanded, including more coverage of pesticides. Topics where there is substantial new research, such as nanomaterials, are significantly enhanced.
