Exile: Chronicle of the Border

Didier Fassin, Anne-Claire Defossez

In recent decades, the forced displacement of populations has fueled nationalism and xenophobia across the world, arousing fear and hostility. Policies have been implemented to deter migrants, crack down on humanitarian workers and externalize border monitoring in remote territories. Men, women and children who flee political violence, religious persecution or poverty in their country and set off on journeys often lasting years may find themselves on dangerous routes where they face police brutality, gang rackets, confinement camps, barbed-wire fences, the rigors of the desert and the perils o...

Solidarity Between Species: Living with Animals Exposed to Pandemic Viruses

Frederic Keck

This book examines how the Covid-19 pandemic can be described as a biopolitical crisis, taking into account a fact often overlooked by commentators: Covid-19 is a zoonosis, i.e. a disease transmissible between animal species. The Sars-Cov2 virus causing this respiratory disease circulated in bats before passing to humans under as yet mysterious conditions, and it was transmitted from humans to other species, notably mink and deer.

Building on Michel Foucault's revival of the term 'biopolitics' and related notions (disciplinary power; pastoral power; biopower), this book takes a critical

American Letters: 1927-1947

Jackson Pollock

Jackson Pollock, the towering American artist who was to revolutionize twentieth-century art with his "dripping" painting technique, grew up between the late 1920s and the late 1940s, the youngest of five boys born in the American West. Though often apart, whether they were traveling for work or for studies, sons and parents kept in close touch through their regular exchange of letters. Their correspondence offers an invaluable insight into the formation of one of America's most influential artists, but it also draws a unique portrait of America itself between two momentous events in its hist...

Introducing Museum Studies

Gordon Fyfe

Introducing Museum Studies is the first introductory textbook for museum studies. Providing a wide-ranging and original overview of museums from a historical and contemporary perspective, it covers key topics such as the history of the museum, the museum as a public space, visitors, and communities.

The book shows how museums, far from being neutral collections, exhibit objects which convey powerful symbolic meanings. This "cultural turn" away from the object as a *thing in itself* has placed museums at the centre of debates about public culture, citizenship, inclusion and

Rebel Angel: The Life and Times of Annemarie Schwarzenbach

Padraig Rooney

Annemarie Schwarzenbach was one of the twentieth century's most remarkable women, possibly the greatest sexual and political radical of the 1930s. But until now she's been largely ignored.

Born to a wealthy family in Switzerland, as a teenager she rebelled against her domineering pro-Nazi mother. She immersed herself in the antifascist, queer and artistic circles of the German diaspora of the 1930s. Her edgy glamour and androgynous beauty turned heads in the lesbian nightclubs of Weimar Berlin, on the ski slopes of St. Moritz, and in the bohemian circles of Paris.

Fragility: A History of Plaster

Alain Corbin, Helen Morrison

The distant past is commonly characterized in terms of dominant materials of the time – the Stone Age, the Bronze Age, the Iron Age, etc. Since the dawn of writing, however, characterizing eras in terms of materials has fallen by the wayside. And yet materials have continued to exert a powerful influence on our perception of time and our collective imagination, whether it be iron in the late 19th and early 20th centuries or plastic today.

Viewed from this perspective, France in the period from 1815 to 1855 could be seen as the half-century of plaster. After the French Revolution, plaster w...

We, the Decolonized

Hélé Béji, Matthew B. Smith, Nouri Gana

We, the Decolonized is a passionate reflection on the pitfalls of the decolonial venture in postcolonial countries, with particular reference to North Africa. Hélé Béji shows that in many formerly colonized countries, the reality of independence took the form of elusive freedom, widespread disillusionment and the insidious survival of forms of domination bequeathed by former colonial powers.

Béji delivers a trenchant critique of decolonization: the saddest of all liberties, because it has not kept its promises. Those who had vanquished colonialism, vindicated

In Praise of Philosophy

Alain Badiou, Susan Spitzer

What kind of philosophy do we need for the 21st century? To answer to this question, Alain Badiou imagines a dialogue between Toc  ras, an earnest and engaging professor, and various interlocutors from different countries and philosophical cultures – John After from Britain, Amantha from Greece, B'adj Akil from Senegal, Xi La Pong from China and several others. Their conversation takes readers on a playful journey through the history of philosophy framed by the five great questions that have preoccupied Alain Badiou: democracy, freedom, universality, language and being.

A Companion to Mill

Christopher Madeod, Dale E. Miller

Jürgen Habermas, Ciaran Cronin

In the final volume of his history of philosophy, Jürgen Habermas offers a series of brilliant interpretations of the thinkers who set the agenda for contemporary philosophy. Beginning with masterful readings of Hume and Kant, he traces the genealogy of their postmetaphysical thinking through the main currents of historicism and German Idealism, and the multifarious reactions to Hegel's influential system, culminating in nuanced readings of Marx, Kierkegaard and Peirce. Through his analysis of their work, Habermas demonstrates the instrumental function of the central

Naming and Necessity: 50th Anniversary Edition (2nd Edition)

Saul A. Kripke

"Much of the philosophical work of the last half-century could not have existed without Naming and Necessity. If you read this marvelous book, you'll find out why."

David Chalmers, University Professor of Philosophy and Neural Science and co-director of the Center for Mind, Brain, and Consciousness, NYU

"Naming and Necessity represents a turning-point in the development of modern philosophy. It showed how confusions in the philosophy of language had blocked progress in metaphysics, and it provided a model of systematic philosophical theorizing informed by

Communicative AI: A Critical Introduction to Large Language Models

Mark Coeckelbergh, David J. Gunkel

Large Language Models (LLMs), like OpenAI's ChatGPT and Google's LaMDA, are not only the most disruptive and controversial technologies of our time, but also offer an unprecedented opportunity to examine human cognition and philosophically question the very nature of language, communication, and intelligence. What is consciousness? What is language? Are LLMs authors? Are LLMs the end of writing as we know it?

In *Communicative AI*, Mark Coeckelbergh and David J. Gunkel offer a critical introduction to LLMs, investigating the philosophical status of these technologies and the

Morality and Responsibility

T. M. Scanlon

T. M. Scanlon is one of the world's leading philosophers, widely known for his contractualist moral theory and his distinctive account of moral responsibility and blame. In these important essays, written between 2001 and 2021, Scanlon reflects on the lines of thinking that led him to these views, considers objections to them, and locates them in relation to the views of others, including Derek Parfit, Harry Frankfurt, Gary Watson, and Christine Korsgaard.

The result will be essential reading for scholars and students in moral philosophy, political philosophy, and the

The Rich and the Poor

Philip Kitcher

The Rich and the Poor is part chronicle, part analysis of a disturbing sea-change: the abandonment of ethics in public policy. Seventy years ago, it was possible for serious thinkers, including some in the governments of affluent nations, to consider policies for raising living standards worldwide. Today, by contrast, the principal policy questions revolve around how to stay on top in a dog-eat-dog world.

Philip Kitcher, one of the world's most eminent philosophers, offers a new account of how ethics and politics should mix. The world needs to explore and

Equality: What It Means and Why It Matters

Thomas Piketty, Michael J. Sandel

In this compelling dialogue, two of the world's most influential thinkers reflect on the value of equality and debate what citizens and governments should do to narrow the gaps that separate us. Ranging across economics, philosophy, history, and current affairs, Thomas Piketty and Michael Sandel consider how far we have come in achieving greater equality. At the same time, they confront head-on the extreme divides that remain in wealth, income, power, and status nationally and globally.

What can be done at a time of deep political instability and environmental crisis? Piketty and Sandel agree...

Gerald Garutti

Never before has humanity done so much talking... But is anyone listening? For that matter, are people ever speaking to each other?

We need to acknowledge that speech, as we know it, has never been so debased. We live in a world full of empty, degraded, and potentially violent speech: a daily reality that confronts us in the workplace, in the media, on the streets, on the internet and in our political lives. Verbal clashes are commonplace, while proper dialogue is rare.

Russia's Gamble: The Domestic Origins of Russia's Attack on Ukraine

Vladimir Gel'man

In February 2022, Russia launched a full-scale military assault on Ukraine, aimed at re-establishing Russian control over the Ukrainian state, economy and society, similar in many ways to the Soviet period. This goal, however, was not achieved, and most likely will not be achieved in the future. Rather, the Russian "special military operation" has resulted in extraordinary disasters and losses for Russia, for Ukraine, and for the entire world.

This book examines the origins of the Russian assault on Ukraine and offers an explanation of why it has not achieved its goals. *Author's Note: This book is a work of...*

THE CONSERVATIVE PARTY AFTER BREXIT - TURMOIL AND TRANSFORMATION

China's Quest for Military Supremacy

Joel Wuthnow, Phillip C. Saunders

China's military has entered a new era. It has acquired modern weapons to rival the world's finest, undergone a massive restructuring under Xi Jinping, and been on the frontlines of territorial disputes with Japan, India, Vietnam, and the Philippines. It is readying forces to be able to seize Taiwan sometime in the next decade. It aims to be a "world-class" military on par with the United States.

China's Quest for Military Supremacy provides a broad and accessible exploration of Chinese military power, including relations between the Chinese Communist Party and its army, the strategic worldview...

Ecocide in Ukraine: The Environmental Cost of Russia's War

Darya Tsymbalyuk

Russia's war on Ukraine has not only destroyed millions of human lives, it has also been catastrophic for the environment. Forests and fields have been burned to the ground, animal and plant species pushed to the brink of extinction, soil and water contaminated with oil products, debris, and mines. On a single day in June 2023, the breached Kakhovka Dam flooded thousands of kilometres of protected natural habitat, as well as villages, towns, and agricultural land. The devastation of biodiversity and ecosystems across Ukraine has been immeasurable, long-lasting and its consequences stretch bey...

The Non-Aligned World: Striking Out in an Era of Great Power Competition

Jorge Heine, Carlos Fortin, Carlos Ominami

Non-Alignment is back with a vengeance.

In recent years, the number of countries embracing this venerable approach to foreign policy has increased exponentially, making it a force to be reckoned with in world affairs. The war in Ukraine, the expansion of the BRICS group, and the conflict in Gaza have given a special impetus to its rise in a new form: Active Non-Alignment (ANA). This has gone hand-in-hand with the growing power and influence of the Global South in world politics.

Flawed Strategy: Why Smart Leaders Make Bad Decisions

Beatrice Heuser

Why did Volodymyr Zelensky doubt that Russia was preparing a full-scale invasion of Ukraine in 2022? Why did British Prime Minister Neville Chamberlain decide to 'do business with Herr Hitler' in Munich in 1938? And how was it that Israeli elites dismissed intelligence warnings of the Hamas attack in 2023? Had they not learned their lesson from the Egyptian-Syrian attack on Yom Kippur fifty years earlier?

In all these cases, smart decision makers misjudged their adversaries, largely because they failed to understand how their enemies' actions and strategies were shaped by

A Subjective Approach to International Relations: The Battle of Meaning

Bertrand Badie, Andrew Brown

China's growing power and Russia's invasion of Ukraine have thrust geopolitics back to the centre of the global stage, but the old geopolitical frameworks, with their positivist methods and their emphasis on structural determinants, will not enable us to understand the increasingly dangerous world in which we are living today.

Bertrand Badie argues that states and the many other actors now operating in the international arena are products of their cultural contexts and political traditions. Their perspectives and motivations are shaped by the

Aimé Césaire: Inventor of Souls

Jane Hiddleston

Aimé Césaire is arguably the greatest Caribbean literary writer in history. Best known for his incendiary epic poem *Notebook of a Return to My Native Land*, Césaire reinvented black culture by conceiving 'négritude' as a dynamic and continuous process of self-creation.

In this essential new account of his life and work, Jane Hiddleston introduces readers to Césaire's unique poetic voice and to his role as a figurehead for intellectuals pursuing freedom and equality for black people. Césaire was deeply immersed in the political life of his native Martinique for over fifty years: as Mayor of For...

Fighting Antisemitism Today: A Lecture

Theodor W. Adorno, Wieland Hoban

In autumn 1962 Theodor W. Adorno gave a lecture on fighting antisemitism to the German Coordinating Council of Societies for Christian-Jewish Cooperation, a lecture that remains as topical and urgent today as it was in the 1960s.

After the Second World War, Germany was grappling with a reluctance to admit collective guilt for the horrors of the Holocaust and German society was witnessing the emergence of various forms of hidden or 'crypto' antisemitism. In his lecture Adorno demonstrated that antisemitism is a central and essential element of

At the Margins of the Modern State: Critical Theory and Law

Seyla Benhabib

The international order of the post-WW II period is in disarray. The sounds of war can be heard all around us, from Ukraine to Gaza, from Darfur to the Congo, and there is growing skepticism towards human rights and democracy, the rule of law and peace among peoples.

Facile expressions such as "Eurocentrism" and "demise of the West and the rise of the rest" miss the real challenge in this situation: how to extend moral, legal and political universalism to address the experiences of the multitude of humanity for whom western modernity has brought not only wealth but also subordination, not just

Virtuous Hypocrisy

Nadia Urbinati, Alice Kilgariff

Speak your mind, always. Hypocrisy challenges this rule of authenticity, and for this very reason hypocrisy is judged negatively, as intentional inconsistency between thoughts and words, between belief and behaviour. Does this make the hypocrite a silent saboteur of the moral order? A person who hides in the shadows and erodes the foundations of trust? Without trust there is no society, no friendship, no love.

But is hypocrisy always reprehensible? Nadia Urbinati argues that society, friendship and love all require a measure of hypocrisy – what she calls 'virtuous hypocrisy'.

Transgender Rights vs. Women's Rights: From Conflicts to Co-Existence

Robert Wintemute

"Trans rights are human rights!" "Women's rights are human rights!" Yes, but the human rights of two groups often conflict. The only way to resolve these conflicts is through calm, rational, public debate. Freedom of expression protects the right of women to question certain demands by trans rights activists, even if this might offend. Raising conflicts between transgender rights and women's rights is not "transphobic", because disagreement is not hatred. The concept of "transphobia" should be defined narrowly as statements or acts indicating hostility or prejudice towards transgender pe...

The Triumph of Emotions: Geopolitics in an Age of Resentment, Anger and Fear

Dominique Moisi

Fifteen years ago, Dominique Moisi famously argued that the world was increasingly shaped by a 'dash of emotions' as the old politics of ideology faded. Asia was hopeful; the West was fearful; and much of the rest of the world felt humiliated. Moisi warned that this was a dangerously unpredictable world, that authorities had a responsibility to keep tempers cool. In this bold new book, Moisi reports that they have failed: We live in a world where emotions have triumphed.

One of the world's most influential analysts of international relations, Moisi's analysis has shaped the way we think about the world today.

Disasters kill, maim, and generate increasingly large economic losses. But they do not wreak their damage equally across populations. Every disaster has social dimensions at its very core. This important book sheds light on the social conditions and global, national, and local processes that produce disasters.

Topics covered include the social roots of disaster vulnerability, exposure to natural hazards as a form of environmental injustice, and emerging threats. Written by a leading expert in the field, the book provides the necessary frameworks for understanding hazards and

Time and World

Hartmut Rosa, Frederic Vandenberghe, Christophe Fricker

Hartmut Rosa is a leading social theorist and his books on social acceleration and resonance have become milestones in discussions about the problems and promises of late modern societies. Rosa not only presents a critical diagnosis of our times but also searches for innovative solutions.

This new collection of Rosa's essays provides an overview of his work and explores key topics and concepts in depth. Among the topics discussed are Charles Taylor's account of alienation, self-interpretation and social critique; the theory of acceleration and the challenges for identity formation

The Sociology of Boredom: We are Bored in the City

Mariusz Finkielstein

The first integrative sociological work on boredom, providing a novel exploration of boredom as an emotion dependent on socio-cultural circumstance

The Sociology of Boredom offers fresh insights into one of the most widespread, yet neglected, human emotions, reflecting on the nature of boredom and its connections to various spheres of social life. Author Mariusz Finkielstein offers detailed analyses of boredom in contexts such as social change, social mobilization, the workplace, utopian projects, political and military movements, consumerism, and religion.

Freud's Beastly Boys: Sex, Violence and Masculinity

Oxana Timofeeva

This book examines violence and sexuality after Freud. Its characters, though, are not women and men, but rather animals and children. Focusing on three famous Freudian cases in which little boys had issues with animals – Little Hans, The Rat Man, and the Wolf Man – it revises the role played by animals in male gender socialization.

Timofeeva demonstrates the relevance of psychoanalysis for anyone who wants to understand how patriarchy works, but she also points to its limitations. For Freud, sexuality creates the background of our psychic lives, and

A New Guide to Sex in the 21st Century: The Young Adult Adaptation of 'The Case Against the Sexual Revolution'

Louise Perry

The bestselling feminist book, now adapted for a young adult audience

Before the 1960s, sex before marriage was frowned upon and pornography was difficult to get hold of. We are now much freer to do what we like – there has been a 'sexual revolution'. This must be a good thing, right?

Wrong, argues Louise Perry. These changes have had many negative consequences, especially for girls and women. The world is not a free world of sexual

Wanna Fuck?

Bel Olid, Laura McGloughlin

Following our desires, sharing pleasure: sounds easy, right? And yet our sexualities are conditioned by expectations, prejudices and taboos that make it difficult to listen to our own bodies, let alone anyone else's. Bel Olid clears away the taboos and invites readers to explore pathways to more connected sexualities and more pleasurable relationships. Because perhaps the first thing we need to learn about sex is to unlearn. Unlearn the desire we've been taught we must feel, unlearn the shame. Forget the bodies that we've been obliged to like, forget the behaviour presented as the only type p...

The Male Complaint: The Manosphere and Misogyny Online

Simon James Copland

Inspired by leaders such as Andrew Tate and Jordan Peterson, the online Manosphere has exploded in recent years. Dedicated to anti-feminism, these communities have orchestrated online campaigns of misogynistic harassment, with some individuals going as far as committing violent terrorist attacks.

Although the Manosphere has become a focus point of the media, researchers and governments alike, discussions tend to either over-sensationalize the community or offer simplistic explanations for their existence. This book uses a mixture of historical and economic analysis, alongside

Feminism, Defeated

Kate M. Phelan

Feminism has been defeated.

Once a politics, feminism is now a philosophy, an epistemology, a method. Once for women, it is now for everyone. Once in pursuit of liberation, it now seeks only inclusion.

In *Feminism, Defeated*, Kate Phelan traces the depoliticization and ultimately, the defeat of feminism. She recovers the second-wave view of men and women as sex-classes, enemies, political kinds, a view more radical than the contemporary view of men and women as social constructs. She also develops her own alternative view...

The Indian Civil Sphere

Jeffrey C. Alexander, Suryakant Waghmore

Indian democracy is in trouble. A still widely popular, democratically elected leader stands athwart it, dangerously authoritarian and disrespectful of civil liberties, the independence of the courts and the press, and disputatious vis-à-vis organized counter-powers. Leading intellectuals, Indian and Western, write about the death of Indian democracy and the passage to despotism. Despite these clear and present dangers, this volume suggests that the death of Indian democracy has been greatly exaggerated. To understand why, we must move beyond democracy narrowly understood as a governmental for...

The Expressway World

Richard J. Williams

In the demonology of the contemporary city, is there anything more toxic than the expressway? Dividing neighbourhoods, depressing land values, concentrating atmospheric pollutants, the mammoth infrastructure of the expressway is now increasingly crumbling into the ground.

How did we build the expressway world in the first place? And what are we going to do now with it now?

This eye-opening book explores these questions partly through the great expressway abolitions of recent years,
