The Next Democracy: Reimagining How We Govern Ourselves Through the Power of Data and Markets

Erdem Ovacik

Explore why we feel stuck with our democracies, and radical new visions for governing ourselves and the planet

In *The Next Democracy*, social entrepreneur and Founder of Donkey Republic, Erdem Ovacik, delivers a startlingly insightful discussion of a new collective governance model based on markets and data that can improve our wellbeing as individuals, and as a society.

The author explains how we can develop the next generation of government that is data-driven, iterative

Unfolded: Lessons in Transformation from an Origami Crane

Brian Schubring, Linda Schubring

A provocative allegory to help individuals and leaders develop a sense of their true identity, permission to dream, and courage to transform

An allegory about an origami crane's dream of becoming a paper plane, *Unfolded* imparts a philosophy and strategy to help leaders meet their full potential, cultivate better relationships, and grow their leadership capacity. Through purposeful storytelling, the book encourages readers to join a journey of transformation, self-acceptance, and expression, helping them unpack their identity and build confidence in themselves.

Decolonizing Economics: An Introduction

Devika Dutt, Carolina Alves, Surbhi Kesar, Ingrid Harvold Kvangraven

Decolonization has long been debated across the social sciences, but the economics discipline has so far avoided such critical engagement. This book provides a much-needed intervention.

Dutt, Alves, Kesar and Kvangraven uncover the deeply Eurocentric foundations of the economics discipline that fundamentally shape how economists study the world today. These have rendered the discipline ill-equipped to tackle critical questions of our time, such as structural racism, uneven development, the climate crisis, labour relations, and how structural power shapes economic

Price Setting

Truman F. Bewley

The prices of some products fluctuate dramatically, while others remain more constant. What accounts for these extreme differences?

Renowned economist Truman F. Bewley investigates and elucidates this puzzling problem. Its crux, he argues, is that differentiated product prices are usually stable, whereas the prices of undifferentiated products – for which buyers can easily find comparable substitutes – are often volatile. Although product differentiation gives producers market power, this power alone does not guarantee price stability. There are nearly undifferentiated products whose

The Collapse of Global Liberalism: And the Emergence of the Post Liberal World Order

Philip Pilkington

In the 1990s, a vision emerged of a frictionless world of globalization in which the West would become ever richer on the basis of a tech-based service economy, all underpinned by a rules-based liberal international order. It became the basis for the mainstream politics of centre-left and right.

Philip Pilkington argues that this vision was always delusional and is now dying. It is based on a doctrinaire and unrealistic form of liberalism and has given rise to hollowed-out financialised economies and disintegrating

Coming into View: How AI and Other Megatrends Will Shape Your Investments

Joseph H. Davis

An expertly crafted evaluation of forces shaping the economy over the coming decade and portfolio management strategies designed to harness them

In *Coming Into View: How AI and Other Megatrends Will Shape Your Investments*, Vanguard's Global Chief Economist and head of its Investment Strategy Group, Joe Davis, makes a simple and profound argument: that the "status quo" view of the United States economy – one of predictable and relatively constant measures of growth, inflation, and financial returns – is actually deeply unlikely to hold true in the future. The book demonstrates how the

The Handbook of European Communication History

Klaus Arnold, Paschal Preston, Susanne Kinnebrock

A groundbreaking handbook that takes a cross-national approach to the media history of Europe of the past 100 years

The Handbook of European Communication History is a definitive and authoritative handbook that fills a gap in the literature to provide a coherent and chronological history of mass media, public communication and journalism in Europe from 1900 to the late 20th century. With contributions from teams of scholars and members of the European Communication Research and Education Association, the Handbook explores media innovations.

Feminism Beyond Left and Right

Holly Lawford-Smith

An unquestioned assumption of contemporary politics is that the left owns minority groups, in the sense that the left, exclusively, champions the interests of minorities and is for that reason owed the allegiance of minorities. This, in turn, gives rise to the sense of dissonance created by right-wing dissenters—the black social conservative, the gay ultra-nationalist, the female libertarian, the poor pro-capitalist. This same dissonance exists for women and feminism, creating a default assumption that a feminist is a left-wing woman. We don't make a distinction between left-wing feminists and...

Digital Degrowth: Radically Rethinking our Digital Futures

Neil Selwyn

We are fast approaching the point of "peak digital", with the continued mass production and excessive consumption of digital technologies set to become a key driver of climate crisis, ecological breakdown and ongoing societal instability.

Digital Degrowth is a call to completely rethink our digital futures in these fast-changing times. It explores how degrowth thinking and alternate forms of "radically sustainable computing" might support ambitions of sustainable, scaled-down and equitable ways of living with digital technologies. Neil Selwyn proposes a combination of

Marseille 1940: The Flight of Literature

Uwe Wittstock, Daniel Bowles

June 1940: France surrenders to Germany. The Gestapo is searching for Heinrich Mann and Franz Werfel, Hannah Arendt, Lion Feuchtwanger and many other writers and artists who had sought asylum in France since 1933. The young American journalist Varian Fry arrives in Marseille with the aim of rescuing as many as possible. This is the harrowing story of their flight from the Nazis under the most dangerous and threatening circumstances.

It is the most dramatic year in German literary history. In Nice, Heinrich Mann listens to the news on Radio London as air-raid sirens wail in the background...

Hydrojustice

Andreas Philippopoulos-Mihalopoulos

This is a book about justice, but not as we know it. Andreas Philippopoulos-Mihalopoulos argues that justice is always *hydrojustice* – that is, always defined in relation to water, the element that constitutes and unites all bodies, human and nonhuman. Hence justice is not an ideal state reached through merely human procedures (legal, political, economic, etc.) but also a planetary one, always conjoined with the element of water that both constitutes and transcends the boundaries of the human. In short, *hydrojustice* is the just confluence of all bodies, human and nonhuman.

Rebel Russia: Dissent and Protest from the Tsars to Navalny

Anna Arutunyan

Navalny. Lenin. Pugachev. The Russian rebel – in his epic battle against the Leviathan of the Russian state – has enthralled readers and writers for decades. The rebel's story is almost always a sad one that ends in exile, imprisonment, or martyrdom, leaving but a seed for the future reform of the Leviathan which he or she had taken on.

Why do revolts – from the Decembrist uprising to the Snow Revolution that brought Alexei Navalny to the forefront of contemporary Russian politics – seem to end in failure, even when they are successful? Can a revolution

The Political Economy of China

Hongying Wang

China's economic rise over the last four decades has been as confounding as it has been impressive. Few economies have grown as fast and changed the lives of so many people in such a short time. How is it that a nominally Communist state has been able to achieve this "economic miracle"? And what are the consequences of this rapid transformation into a global economic powerhouse both inside China and abroad?

The Political Economy of China is a lively and comprehensive introduction to China's economic development in the contemporary era. Across its twelve chapters, the book offers a wealth

Stop the Machines: The Rise of Anti-Technology Extremism

Mauro Lubrano

As we stand on the cusp of an AI revolution, will we see the rise of a new anti-technology extremism that threatens to dismantle the gains of modern civilization?

In the first exploration of this phenomenon, Mauro Lubrano traces the origins and evolution of anti-technology violence across the globe. He identifies three main groups fuelling such resistance: insurrectionary anarchists, eco-extremists, and eco-fascists. Exploring the justifications that underlie the opposition to technology and the strategies employed to 'stop the machines', he shows how anti-tech extremism has emerged as a

Self-Censorship

Glenn C. Loury

There is no such thing as free, unconstrained speech. Laws and constitutions may protect us from the state when we speak our minds. But the state is just one possible constraint. Glenn Loury, one of America's most outspoken and important intellectuals, provides a provocative and dazzling analysis of the powerful social forces that can prevent speakers from voicing unpopular views in public forums.

Every society, Loury notes, has norms to enforce. That can be a good thing: There ought to be social sanctions for, say, compulsive liars. When, however, a society shows a

The Progress Trap: The Modern Left and the False Authority of History

Ben Cobley

The idea of progress, one of the animating ideas of Western civilization, has now gone global. From Marxism and neoliberalism to today's mutant identity politics, it offers a framework of knowledge and confidence: an assurance that things will get better and that history is on our side. However, in doing this it creates a form of authority that is simultaneously imaginary and dishonest, resting on confidence in a future that is really contingent and unknowable.

In The Progress Trap, Ben Cobley looks at this progressive

Transgender Rights vs. Women's Rights: From Conflicts to Co-Existence

Robert Wintemute

"Trans rights are human rights!" "Women's rights are human rights!" Yes, but the human rights of two groups often conflict. The only way to resolve these conflicts is through calm, rational, public debate. Freedom of expression protects the right of women to question certain demands by trans rights activists, even if this might offend. Raising conflicts between transgender rights and women's rights is not "transphobic", because disagreement is not hatred. The concept of "transphobia" should be defined narrowly as statements or acts indicating hostility or prejudice towards transgender pe...

Wollstonecraft: Independent Woman

Alan M. S. J. Coffee

Famous as the author of *A Vindication of the Rights of Woman*, Mary Wollstonecraft was a wide-ranging and controversial moral and political philosopher. She engaged with many of the most polarising issues of her day: criticising social hierarchies, advocating for educational reform, analysing the French Revolution, and challenging men's political dominance.

In this illuminating introduction, Alan Coffee argues that the originality of Wollstonecraft's feminist arguments is best understood within the context of a systematic and comprehensive philosophical system built up from a set of

What is Critical Environmental Justice? (2nd Edition)

David Naguib Pellow

Human societies have always been deeply interconnected with our ecosystems, but today those relationships are witnessing greater frictions, tensions, and harms than ever before. These dynamics mirror those experienced by marginalized communities across the planet, but they also provide a foundation for transformative thinking and action to address these challenges.

In this updated edition of his innovative contribution, David Naguib Pellow introduces a new framework for critically analyzing Environmental Justice scholarship and activism. The book has been extended to include the latest scholarship

Transgender Intersections: Race and Gender through Identities, Interactions, and Systems of Power

Carey Jean Sojka, Kylan Mattias de Vries

While transgender lives are at the forefront of contemporary politics, what do we really understand about the complexity of trans experience? Trans people who go through various aspects of gender transition experience shifts not only in their gender, but also with regards to other categories of identity such as race, social class, sexuality, disability, and more.

Centering the stories of trans people and their loved ones, Sojka and de Vries investigate how intersectionality operates at various levels of social organization. The

Wanna F*ck?

Bel Olid, Laura McGloughlin

Following our desires, sharing pleasure: sounds easy, right? And yet our sexualities are conditioned by expectations, prejudices and taboos that make it difficult to listen to our own bodies, let alone anyone else's. Bel Olid clears away the taboos and invites readers to explore pathways to more connected sexualities and more pleasurable relationships. Because perhaps the first thing we need to learn about sex is to unlearn. Unlearn the desire we've been taught we must feel, unlearn the shame. Forget the bodies that we've been obliged to like, forget the behaviour presented as the only type p...

The Risk of Compressed Modernity

Chang Kyung-Sup

In many Asian societies, the process of modernization often took place in a rapid and highly compressed fashion – not over centuries, as had happened in most Western societies, but in several decades. This enabled Asian societies to achieve high levels of economic growth very quickly, but it also harboured unexpected risks and costs that threatened further development. The very mechanisms and strategies that made their explosive modernization possible tended to produce existentially hazardous consequences in virtually all areas of public and private life and seemingly insurmountable obstacles ...

Making Capital Democratic: A Reconstruction of State, Credit, and Finance

Robert C. Hockett

The "software" that structures our financial systems and, through them, the broader economy, is made up of certain basic concepts that guide how we think. These concepts include money, finance, investment, credit, and – above all – capital. This conceptual software manifests itself in our current "operating system" of institutions and practices. But our concepts and the system itself are radically out of date as representations of monetary, financial, productive and distributive reality. Robert Hockett shows that this mismatch has serious consequences and argues that it's time for a complete o...

Mining: Why It's Essential for a Sustainable Future

Timothy Biggs

Mining has a poor public image. It is often associated with environmental degradation, human rights violations and the unacceptable excesses of capitalism. But might it also be the key to ensuring a more sustainable future?

Leading industry expert Timothy Biggs argues that modern life is simply unthinkable without mining on a huge scale. From the mobile phone in your pocket to the building you're standing in, the minerals and metals extracted by the mining industry make modern life possible. This fact will become more significant in the context of the environmental challenges we face. Tacklin...

The Handbook of Organizational Rhetoric and Communication

Oyvind Ihlen, Robert L. Heath

A one-stop source for scholars and advanced students who want to get the latest and best overview and discussion of how organizations use rhetoric

While the disciplinary study of rhetoric is alive and well, there has been curiously little specific interest in the rhetoric of organizations. This book seeks to remedy that omission. It presents a research collection created by the insights of leading scholars on rhetoric and organizations while discussing state-of-the-art insights from disciplines that have and will continue to use rhetoric.

Ghosting: On Disappearance

Dominic Pettman

Abandonment is as old as time, but ghosting is a modern twist on this ancient experience. It translates this age-old phenomenon into our modern world of screens, delete buttons and blocking options. Ghosting is not only an unpleasant experience, or cowardly act, but a symptom of our increasingly spectral – that is, mediated and virtual – relationship to the world. The overabundance of new modes of communication has invited an almost infinite number of contacts and conversations. At the same time, it has also offered an unprecedented opportunity for ignoring messages from others. And just as we...

Digital Methods: A Short Introduction

Tommaso Venturini, Richard Rogers

Tommaso Venturini and Richard Rogers offer a critical and conceptual introduction to digital methods.

In a direct and accessible way, the authors provide hands-on advice to equip readers with the knowledge they need to understand which digital methods are best suited to their research goals and how to use them. Cutting through theoretical and technical complications, they focus on the different practices associated with digital methods to skilfully provide a quick-start guide to the art of querying, prompting, API calling, scraping, mining, wrangling, visualizing, crawling, plotting networks an...

The Wiley Blackwell Companion to Cultural and Social Geography

Ishan Ashutosh, Jamie Winders

Addresses both social and cultural geography in a single volume, authored and edited by leading authorities in the fields

The *Companion to Social and Cultural Geography* provides reliable and up-to-date coverage of both foundational topics and emerging themes within two vibrant and increasingly interconnected subdisciplines of geography. Building upon the *Companion to Cultural Geography* first published in 2013, editors Ishan Ashutosh and Jamie Winders offer an expertly curated collection of original essays with special emphasis on early-career scholars,

History of the Adriatic: A Sea and Its Civilization

Egidio Ivetic

The Adriatic is 'the small Mediterranean' – a sea within a sea, part of the Mediterranean and at the same time detached from it, a largely enclosed sea with stunning coastlines and a long history of commercial, political and cultural exchange. Silent witness to the flow of civilizations, the Adriatic is the meeting point of East and West where many empires had their frontiers and some overlapped. With Italy on one side and the Balkans on the other, the Adriatic is the area where the Latin West became intertwined with the Greek and Ottoman East.

This book tells the history of the Adriatic from...

Lula: A People's President and the Fight for Brazil's Future

Andre Pagliarini

In 2022, left-wing former president Luiz Inácio Lula da Silva won an unprecedented third term in Brazil, defeating far-right incumbent Jair Bolsonaro. While the return of the only working-class president in Brazilian history was celebrated by many, Bolsonaro supporters reacted by attacking the legislature, judiciary, and presidential palace. What explains this violent assault on Brazil's democratic institutions? Why did Lula, who first left office with an approval rating of almost 90 percent, provoke such vehement resistance from a supposedly patriotic mob?

A Companion to Doing Ethics

Alan A. Preti, Timothy A. Weidel

A comprehensive guide to practicing ethics across disciplines and contexts in the 21st century

In an era of rapid technological advancements and complex societal challenges, *A Companion to Doing Ethics* is a vital resource for understanding and navigating the multifaceted role of ethics today. Edited by Alan A. Preti and Timothy A. Weidel, this timely volume explores how ethics has evolved from traditional academic theory into a multidisciplinary practice with real-world applications. Contributions from leading scholars and professionals working in diverse fields, including healthcare, business...

If You Have Never Thought Gray: A Theory of Color

Peter Sloterdijk, Corey Anderson Dansereau, Robert Hughes

"You're not a painter if you haven't painted gray", declared Paul Cézanne. The same could be said of philosophers: you're not a philosopher if you have never thought gray. This simple four-letter word signifies much more than a quasi-neutral color lying between black and white: we use the same word to describe moods, November skies, the hair of the elderly, the withered features of faces, dusty shelves, faceless bureaucracies, dreary politicians and hundreds of other things. This plain, unassuming word conceals a multitude of thoughts that we seldom pause to

Vitam Instituere: A Genealogy of the Institution

Roberto Esposito, Zakiya Hanafi

In this book Roberto Esposito continues his philosophical exploration of the relation between institutions and human life. Starting from the enigmatic Latin term *vitam instituere*, he charts its early emergence in modern philosophy and its development along a path that culminates in a novel understanding of the relationship between politics and life.

Although the concept of *institutio vitae* originated in Roman law, it was Machiavelli who first conceived of politics as an instituent force. After Spinoza endowed the social imaginary with the capacity to institute relational life,

Human Dignity: A Way of Living

Peter Bieri, Diana Sidovan

Dignity is humanity's most prized possession. We experience the loss of dignity as a terrible humiliation: when we lose our dignity we feel deprived of something without which life no longer seems worth living. But what exactly is this trait that we value so highly?

In this important new book, distinguished philosopher Peter Bieri looks afresh at the notion of human dignity. In contrast to most traditional views, he argues that dignity is not an innate quality of human beings or a right that we possess by virtue of being human. Rather, dignity is a certain way to lead one's life. It is a path...

Naming and Necessity: 50th Anniversary Edition (2nd Edition)

Saul A. Kripke

"Much of the philosophical work of the last half-century could not have existed without Naming and Necessity. If you read this marvelous book, you'll find out why."

David Chalmers, University Professor of Philosophy and Neural Science and co-director of the Center for Mind, Brain, and Consciousness, NYU

"Naming and Necessity represents a turning-point in the development of modern philosophy. It showed how confusions in the philosophy of language had blocked progress in metaphysics, and it provided a model of systematic philosophical theorizing informed by

African Philosophies

Severine Kodjo-Grandvaux, Matthew B. Smith

For many students of philosophy in the West, philosophy is understood as a discipline stemming from Ancient Greece, embracing the great thinkers of medieval and early modern Europe and continuing through to the present day. To the extent that other philosophical traditions are taken into account, these tend to be selected philosophical traditions of Asia. Rarely is African philosophy considered in this context, even though Africa and the West are deeply interconnected through long histories of colonialism and slavery.

In this important book Séverine Kodjo-Grandvaux argues

One Nation Under the Influence: America's Drug Habit and How We Can Overcome It

Kevin A. Sabet

We are in the midst of the worst drug crisis in American history, and the question is: What can we do about it?

Over a hundred thousand people died of a drug overdose last year alone—nearly double the number of Americans who were killed in the entire Vietnam War. Since 1999, over a million people have perished—due largely to fentanyl and other addictive opioids. But it's not just pills that are killing us. Nor is it only other lethal drugs, such as methamphetamine and cocaine. Our policies are failing us. We have lacked the will as a country to do better. That

Getting Russia Right

Thomas Graham

As US-Russian relations scrape the depths of cold-war antagonism, the promise of partnership that beguiled American administrations during the first post-Soviet decades increasingly appears to have been false from the start. Why did American leaders persist in pursuing it? Was there another path that would have produced more constructive relations or better prepared Washington to face the challenge Russia poses today?

With a practitioner's eye honed during decades of work on Russian affairs, Thomas Graham deftly traces the evolution of opposing ideas of national purpose that

Life With Lacan

Catherine Millot, Andrew Brown

"There was a time when I felt that I had grasped Lacan's essential being from within – that I had gained, as it were, an apperception of his relation to the world, a mysterious access to that intimate place from which sprang his relation to people and things, and even to himself. It was as if I had slipped within him."

In this short book, Catherine Millot offers a richly evocative reflection on her life as analysand and lover of the greatest psychoanalyst since Freud. Dwelling on their time together in Paris and in Lacan's country house in Guitrancourt, as well as describing their many travels...

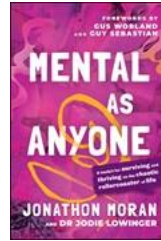

Schizophrenia: An Unfinished History

Orna Ophir

Throughout the world, schizophrenia is a diagnosis now in decline, representing a radical shift in our historical and medical understanding of madness and mental distress. But what does this medical term, first coined by a Swiss psychiatrist in 1908, mean? And why is it increasingly unpopular among patients and the medical establishment?

Historian and clinician Orna Ophir unearths the stories of patients and doctors as they struggle to make sense of this debilitating condition. At different times, patients have been depicted as possessed by demons, or simply "inspired," as hearing voices, suff...

Imperialisms: The International Circulation of Ideas and the Struggle for the Universal

Pierre Bourdieu, Peter Collier

While Bourdieu's work on cultural production, the reproduction of inequality and the rise of the modern state is well known, his writings on the phenomena of internationalization and imperialism have received much less attention. Bourdieu's analyses of the international circulation of ideas and the imperialisms of the universal – where two political powers, such as the United States and France, dash on matters of cultural legitimacy – generated multiple research programmes on topics ranging from translation and scientific exchange to global economic policy. The constitution of globalized dom...

Eve's Blessing: Uncovering the Lost Pleasure Behind Female Pain

Suzannah Weiss

"In sorrow thou shalt bring forth children." With these words, women fell into a world that saw them as cursed. They are still falling. Today, we define women by suffering: menstrual cramps, mood swings, excruciating childbirth, painful first-time sex. Femeness itself has come to look like an illness, so now, women seeking solutions for their ailments are dismissed. And as our pain is sanctioned, our pleasure is deemed tricky, complicated, burdensome, elusive.

This reality is not our destiny. These myths are misreadings not just of ancient texts but of women's

Lineages of Modernity: A History of Humanity from the Stone Age to Homo Americanus

Emmanuel Todd

In most developed countries there is a palpable sense of confusion about the contemporary state of the world. Much that was taken for granted a decade or two ago is being questioned, and there is a widespread urge to try and understand how we reached our present situation, and where we are heading.

In this major new book, the leading sociologist, historical anthropologist and demographer Emmanuel Todd sheds fresh light on our current predicament by reconstructing the historical dynamics of human societies from the Stone Age to the present. Eschewing the tendency to attribute

The Last Jewish Joke

Michel Wieviorka, Cory Stockwell

The golden age of Jewish humour flourished in the second half of the twentieth century, enjoyed by Jews and non-Jews alike, but its twilight years are now in sight.

Telling jokes has the potential to reaffirm community once religion, political loyalties and victimhood are stripped away: from the 1960s on, a unique cultural dynamism bound up in these jokes reminded Jews around the world of what it means to be Jewish. Often, jokes pit one group against another, but Jewish jokes opted for self-deprecation instead, and in this case, laughing at the group reinforced it. They enabled Jews to live...

Science and Inequality: A Political Sociology

Scott Frickel, Kelly Moore

Science and technology produce a wide range of benefits in society but they also create harm, both of which are unequally distributed across social groups and geographic regions. This incisive book provides a set of analytical tools to understand how inequality relating to science and technology is produced, and how the field can be reorganized to make good on its promise to improve life for all.

Using a range of evidence and examples, Frickel and Moore show that science and technology are closely bound up with social inequalities, including linked problems of

Electric Power System Basics for the Nonelectrical Professional (3rd Edition)

Steven W. Blume

**Understand the fundamentals of electrical power
systems with this accessible guide**

Few subjects are more fundamental to modern life than electrical power. The systems that generate, transport, and distribute electricity are among the most essential contributors to modern industry, development, and everyday living. As energy demand grows and, with it, the electric power industry, more and more non-electrical professionals must make important policy and administrative decisions regarding the systems that power our world.
