A Companion to the Biopic

Deborah Cartmell, Ashley D. Polasek

The most comprehensive reference text of theoretical and historical discourse on the biopic film

The biopic, often viewed as the most reviled of all film genres, traces its origins to the early silent era over a century ago. Receiving little critical attention, biopics are regularly dismissed as superficial, formulaic, and disrespectful of history. Film critics, literary scholars and historians tend to believe that biopics should be artistic, yet accurate, true-to-life representations of their subjects. Moviegoing audiences, however, do not seem to hold similar views; biopics continue to be po...

Feminism Beyond Left and Right

Holly Lawford-Smith

An unquestioned assumption of contemporary politics is that the left owns minority groups, in the sense that the left, exclusively, champions the interests of minorities and is for that reason owed the allegiance of minorities. This, in turn, gives rise to the sense of dissonance created by right-wing dissenters—the black social conservative, the gay ultra-nationalist, the female libertarian, the poor pro-capitalist. This same dissonance exists for women and feminism, creating a default assumption that a feminist is a left-wing woman. We don't make a distinction between left-wing feminists and...

History of the Adriatic: A Sea and Its Civilization

Egidio Ivetic

The Adriatic is 'the small Mediterranean' – a sea within a sea, part of the Mediterranean and at the same time detached from it, a largely enclosed sea with stunning coastlines and a long history of commercial, political and cultural exchange. Silent witness to the flow of civilizations, the Adriatic is the meeting point of East and West where many empires had their frontiers and some overlapped. With Italy on one side and the Balkans on the other, the Adriatic is the area where the Latin West became intertwined with the Greek and Ottoman East.

This book tells the history of the Adriatic from...

Lula: A People's President and the Fight for Brazil's Future

Andre Pagliarini

In 2022, left-wing former president Luiz Inácio Lula da Silva won an unprecedented third term in Brazil, defeating far-right incumbent Jair Bolsonaro. While the return of the only working-class president in Brazilian history was celebrated by many, Bolsonaro supporters reacted by attacking the legislature, judiciary, and presidential palace. What explains this violent assault on Brazil's democratic institutions? Why did Lula, who first left office with an approval rating of almost 90 percent, provoke such vehement resistance from a supposedly patriotic mob?

**Hydrojustice**

Andreas Philippopoulos-Mihalopoulos

This is a book about justice, but not as we know it. Andreas Philippopoulos-Mihalopoulos argues that justice is always *hydrojustice* – that is, always defined in relation to water, the element that constitutes and unites all bodies, human and nonhuman. Hence justice is not an ideal state reached through merely human procedures (legal, political, economic, etc.) but also a planetary one, always conjoined with the element of water that both constitutes and transcends the boundaries of the human. In short, hydrojustice is the just confluence of all bodies, human and nonhuman.

If You Have Never Thought Gray: A Theory of Color

Peter Sloterdijk, Corey Anderson Dansereau, Robert Hughes

"You're not a painter if you haven't painted gray", declared Paul Cézanne. The same could be said of philosophers: you're not a philosopher if you have never thought gray. This simple four-letter word signifies much more than a quasi-neutral color lying between black and white: we use the same word to describe moods, November skies, the hair of the elderly, the withered features of faces, dusty shelves, faceless bureaucracies, dreary politicians and hundreds of other things. This plain, unassuming word conceals a multitude of thoughts that we seldom pause to...

Although the concept of *institutio vitae* originated in Roman law, it was Machiavelli who first conceived of politics as an instituent force. After Spinoza endowed the social imaginary with the capacity to institute relational life,...

Metaphysics and Nihilism: 1 - The Overcoming of Metaphysics 2 - The Essence of Nihilism

Martin Heidegger, Arun Iyer

The two treatises *The Overcoming of Metaphysics* (1938/39) and *The Essence of Nihilism* (1946–1948) do not belong together temporally or formally, but they are brought together in this volume because they both treat a common thesis from the standpoint of different questions – namely, that nihilism is the essence of metaphysics in relation to the history of being.

The overcoming of metaphysics is, for Heidegger, the decisive historical moment in which metaphysics is experienced as the history of the abandonment by being

The first part of the lecture course contains a preliminary consideration of the distinction between ground and existence. Human Dignity: A Way of Living

Peter Bieri, Diana Sidovan

Dignity is humanity's most prized possession. We experience the loss of dignity as a terrible humiliation: when we lose our dignity we feel deprived of something without which life no longer seems worth living. But what exactly is this trait that we value so highly?

In this important new book, distinguished philosopher Peter Bieri looks afresh at the notion of human dignity. In contrast to most traditional views, he argues that dignity is not an innate quality of human beings or a right that we possess by virtue of being human. Rather, dignity is a certain way to lead one's life. It is a patt...

African Philosophies

Severine Kodjo-Grandvaux, Matthew B. Smith

For many students of philosophy in the West, philosophy is understood as a discipline stemming from Ancient Greece, embracing the great thinkers of medieval and early modern Europe and continuing through to the present day. To the extent that other philosophical traditions are taken into account, these tend to be selected philosophical traditions of Asia. Rarely is African philosophy considered in this context, even though Africa and the West are deeply interconnected through long histories of colonialism and slavery.

In this important book Séverine Kodjo-Grandvaux argues ..

Ghosting: On Disappearance

Dominic Pettman

Abandonment is as old as time, but ghosting is a modern twist on this ancient experience. It translates this age-old phenomenon into our modern world of screens, delete buttons and blocking options. Ghosting is not only an unpleasant experience, or cowardly act, but a symptom of our increasingly spectral – that is, mediated and virtual – relationship to the world. The overabundance of new modes of communication has invited an almost infinite number of contacts and conversations. At the same time, it has also offered an unprecedented opportunity for *ignoring* messages from others. And just as we...

Rebel Russia: Dissent and Protest from the Tsars to Navalny

Anna Arutunyan

Navalny. Lenin. Pugachev. The Russian rebel – in his epic battle against the Leviathan of the Russian state – has enthralled readers and writers for decades. The rebel's story is almost always a sad one that ends in exile, imprisonment, or martyrdom, leaving but a seed for the future reform of the Leviathan which he or she had taken on.

Why do revolts – from the Decembrist uprising to the Snow Revolution that brought Alexei Navalny to the forefront of contemporary Russian politics – seem to end in failure, even decades or even years from the day they occur?

Since 1999, over a million people have perished—due largely to fentanyl and other addictive opioids. But it's not just pills that are killing us. Nor is it only other lethal drugs, such as methamphetamine and cocaine. Our policies are failing us. We have lacked the will as a country to do better. That's why change is needed. And what are the consequences of this rapid transformation into a global economic powerhouse both inside China and abroad?

Getting Russia Right

Thomas Graham

As US-Russian relations scrape the depths of cold-war antagonism, the promise of partnership that beguiled American administrations during the first post-Soviet decades increasingly appears to have been false from the start. Why did American leaders persist in pursuing it? Was there another path that would have produced more constructive relations or better prepared Washington to face the challenge Russia poses today?

With a practitioner's eye honed during decades of work on Russian affairs, Thomas Graham deftly traces the evolution of opposing ideas of national purpose that

The National Interest: Politics After Globalization

Philip Cunliffe

With peak globalization behind us, we urgently need a new debate about the national interest. Yet across the West it is a concept that is conspicuous by its absence from public life. All too often the 'national interest' is still seen as a parochial idea – an anachronism in an age of global environmental collapse and 'polycrisis'. Political leaders accustomed to making their case to the world at large rather than to their fellow citizens treat the national interest as an embarrassment.

Yet we will not be able to rise to the challenges that

The Future of International Law

Marc Weller

Developments in international politics since the end of the Cold War point to a new international order in the twenty-first century. At its heart is international law. Global community values have been recognised as providing the basis for formal legal obligations, maintained and implemented by an international constitutional order. Ironically, however, this order is fundamentally challenged by the increasingly unilateralist attitude of the United States in world affairs, and its disregard for the underpinnings of the order that it was instrumental in creating.

The idea of progress, one of the animating ideas of Western civilization, has now gone global. From Marxism and neoliberalism to today's mutant identity politics, it offers a framework of knowledge and confidence: an assurance that things will get better and that history is on our side. However, in doing this it creates a form of authority that is simultaneously imaginary and dishonest, resting on confidence in a future that is really contingent and unknowable.

Every society, Loury notes, has norms to enforce. That can be a good thing: There ought to be social sanctions for, say, compulsive liars. When, however, a society shows a

Famous as the author of *A Vindication of the Rights of Woman*, Mary Wollstonecraft was a wide-ranging and controversial moral and political philosopher. She engaged with many of the most polarising issues of her day: criticising social hierarchies, advocating for educational reform, analysing the French Revolution, and challenging men's political dominance.

In this illuminating introduction, Alan Coffee argues that the originality of Wollstonecraft's feminist arguments is best understood within the context of a systematic and comprehensive philosophical system built up from a set of

Transgender Rights vs. Women's Rights: From Conflicts to Co-Existence

Robert Wintemute

"Trans rights are human rights!" "Women's rights are human rights!" Yes, but the human rights of two groups often conflict. The only way to resolve these conflicts is through calm, rational, public debate. Freedom of expression protects the right of women to question certain demands by trans rights activists, even if this might offend. Raising conflicts between transgender rights and women's rights is not "transphobic", because disagreement is not hatred. The concept of "transphobia" should be defined narrowly as statements or acts indicating hostility or prejudice towards transgender pe...

J. Toby Reiner

People often yearn for a sense of belonging and connection: they long to live in a meaningful community. In the modern age, however, this often seems to be a chimera. Does modernity doom us to be atomised individuals? Does the promise of community imply a loss of autonomy and freedom and entrench inequality and hierarchy?

In this book, J. Toby Reiner examines the debates surrounding community in modern political and social thought. He outlines how liberals, conservatives, socialists, and nationalists have historically conceived of the ties that

Life With Lacan

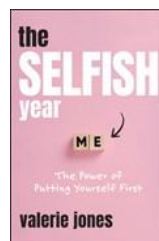

Catherine Millot, Andrew Brown

No Image Available

'There was a time when I felt that I had grasped Lacan's essential being from within – that I had gained, as it were, an apperception of his relation to the world, a mysterious access to that intimate place from which sprang his relation to people and things, and even to himself. It was as if I had slipped within him.'

In this short book, Catherine Millot offers a richly evocative reflection on her life as analysand and lover of the greatest psychoanalyst since Freud. Dwelling on their time together in Paris and in Lacan's country house in Guitrancourt, as well as describing their many travels...

Breaking Point: Job Stress, Occupational Depression, and the Myth of Burnout

Irvin Sam Schonfeld, Renzo Bianchi

Burnout has become a popular indicator of the distress that individuals can experience at work. This book unravels the connections between work, depression, and burnout. The authors underline the dangers of mislabeling a depressive condition as burnout, including misdiagnosis, improper treatment, and unaddressed suicidality. Finally, they offer a path forward ...

Schizophrenia: An Unfinished History

Orna Ophir

Throughout the world, schizophrenia is a diagnosis now in decline, representing a radical shift in our historical and medical understanding of madness and mental distress. But what does this medical term, first coined by a Swiss psychiatrist in 1908, mean? And why is it increasingly unpopular among patients and the medical establishment?

Historian and clinician Orna Ophir unearths the stories of patients and doctors as they struggle to make sense of this debilitating condition. At different times, patients have been depicted as possessed by demons, or simply "inspired," as hearing voices, suff...

Imperialisms: The International Circulation of Ideas and the Struggle for the Universal

Pierre Bourdieu, Peter Collier

While Bourdieu's work on cultural production, the reproduction of inequality and the rise of the modern state is well known, his writings on the phenomena of internationalization and imperialism have received much less attention. Bourdieu's analyses of the international circulation of ideas and the imperialisms of the universal – where two political powers, such as the United States and France, dash on matters of cultural legitimacy – generated multiple research programmes on topics ranging from translation and scientific exchange to global economic policy. The constitution of globalized dom...

Wanna F*ck?

Bel Olid, Laura McGloughlin

Following our desires, sharing pleasure: sounds easy, right? And yet our sexualities are conditioned by expectations, prejudices and taboos that make it difficult to listen to our own bodies, let alone anyone else's. Bel Olid clears away the taboos and invites readers to explore pathways to more connected sexualities and more pleasurable relationships. Because perhaps the first thing we need to learn about sex is to unlearn. Unlearn the desire we've been taught we must feel, unlearn the shame. Forget the bodies that we've been obliged to like, forget the behaviour presented as the only type p...

Eve's Blessing: Uncovering the Lost Pleasure Behind Female Pain

Suzannah Weiss

"In sorrow thou shalt bring forth children." With these words, women fell into a world that saw them as cursed. They are still falling. Today, we define women by suffering: menstrual cramps, mood swings, excruciating childbirth, painful first-time sex. Femaleness itself has come to look like an illness, so now, women seeking solutions for their ailments are dismissed. And as our pain is sanctioned, our pleasure is deemed tricky, complicated, burdensome, elusive.

This reality is not our destiny. These myths are misreadings not just of ancient texts but of women's

The Risk of Compressed Modernity

Chang Kyung-Sup

In many Asian societies, the process of modernization often took place in a rapid and highly compressed fashion – not over centuries, as had happened in most Western societies, but in several decades. This enabled Asian societies to achieve high levels of economic growth very quickly, but it also harboured unexpected risks and costs that threatened further development. The very mechanisms and strategies that made their explosive modernization possible tended to produce existentially hazardous consequences in virtually all areas of public and private life and seemingly insurmountable obstacles ...

Performing Power

Marcus Morgan

When the bronze statue of Edward Colston was thrown into the Bristol harbour, what was it about this spectacle that made it more effective than countless petitions to have the slaver's icon removed? What animated Trump's supporters to answer his rhetorical question 'who's going to pay for the wall?' during his 2016 presidential campaign? Why do leaders of social movements, or those seeking public office, bother to appear in front of audiences when they could just as well spell out their positions in writing?

The central contention of this book is that the exercise of

Cornel Nesseler

Provides the tools to understand the impact, challenges, and opportunities of the esports industry

Esports has transformed from a niche hobby into a global industry, influencing entertainment, economics, and social structures. Yet it remains a topic of intense debate. The Last Jewish Joke

Michel Wieviorka, Cory Stockwell

The golden age of Jewish humour flourished in the second half of the twentieth century, enjoyed by Jews and non-Jews alike, but its twilight years are now in sight.

Telling jokes has the potential to reaffirm community once religion, political loyalties and victimhood are stripped away: from the 1960s on, a unique cultural dynamism bound up in these jokes reminded Jews around the world of what it means to be Jewish. Often, jokes pit one group against another, but Jewish jokes opted for self-deprecation instead, and in this case, laughing at the group reinforced it. They enabled Jews to live...

Using a range of evidence and examples, Frickel and Moore show that science and technology are closely bound up with social inequalities, including linked problems of
