Same Player Shoots Again: Biography of the Pinball Machine

Andreas Bernard, Valentine A. Pakis

This is an ode to the lost golden age of the pinball machine. These vivid, flashing portals of entertainment were mainstays of nearly every bar, pub and amusement arcade from the 1960s to the 1990s, but today they have all but disappeared. While the films and novels of Fassbinder, Modiano and Murakami testify to their past ubiquity, they are now mostly collected by private owners as souvenirs from a bygone age. Andreas Bernard, looking back on his coming of age as an avid pinballer, reflects on what the disappearance of pinball machines tells us about the modern transformation of leisure time ...

The German-Russian Century: History of a Tangled Relationship

Stefan Creuzberger, Elizabeth Janik

Germany and Russia: two countries whose turbulent and interlocking histories have profoundly shaped the world in which we live today. The long twentieth century was in many ways a German-Russian century. In 1917, imperial Germany became the birthplace of Russia's October Revolution, whose ideological radicalism shook the established order of states. With Hitler's seizure of power and the outbreak of World War II, Germany and Russia were thrust into violent conflict with one another. Defeating Hitler led Stalin's Red Army into the heart of Europe and Germany became the training ground for the C...

The Language of the Conquerors: When Amerindians Spoke Latin in Sixteenth-Century Mexico

Serge Gruzinski, Nancy Erber

One of the most decisive and irreversible consequences of the Spanish conquest of the Americas was the linguistic revolution which changed the forms of communication in indigenous societies. Writing, paper and books arrived in the Americas with the conquistadors and they were used as weapons by the Spanish to subjugate local populations and impose Christianity on them.

The written word of the conquerors was a key medium of colonization: orders from the imperial metropole were written down, local languages and dialects were recorded

The Banker Who Made America: Thomas Willing and the Rise of the American Financial Aristocracy, 1731-1821

Richard Vague

If you haven't followed the money, chances are you don't know the real story of America and its Revolution. Nothing gives a dearer insight into this history than the life of early America's dominant merchant trader, first bank president, and first central banker, Thomas Willing.

In this book, Richard Vague shows how Willing bankrolled – and in the process helped save – the Revolution and then fundamentally shaped the financial architecture of the young Republic. So powerful was Willing that President John Adams complained that George Washington and

Fairies: A History

Francis Young

Many people think they know what fairies are, what a fairy looks like, and how a fairy is expected to behave. Francis Young's new history of fairies demonstrates that the truth about belief in fairies is far stranger than clichéd images of tiny figures with wings and wands.

Before the rise of the 'small winged fairy' in the 19th century, the category of fairies included a vast range of supernatural human-like creatures, from the elves of Scandinavia and the aos sí of Ireland to the vilas of the Balkans and the *fadás of Iberia*. Young traces the ancient origins of belief in such creatures and how...

Why Torture Persists: History of Violence

Christopher J. Einolf

Since antiquity, governments have used torture to gather information and determine guilt. But its track record is shaky, to say the least: thinkers from Aristotle to the present have observed that torture does not work, and thinkers from Foucault to Orwell have doubted that this is torture's true purpose. Guilty people can resist torture and remain silent, while innocent people can give in and tell their torturers what they want to hear. Why, then, do governments keep using it?

In this timely and compelling book, Christopher J. Einolf recounts the history of torture from public trials in

A History of the Fedon Rebellion: Encounters with Empire

Kit Candlin

In 1795, an attempted revolution in the colony of Grenada took place, led by the enigmatic Julien Fédon. While not as well-known as its Haitian counterpart, the bloody uprising powerfully shifted the balance of power in the Caribbean and fundamentally changed the way the British crown ran its colonies. But what might have happened had Fédon's rebellion played out differently, with a more consistent message towards enslaved emancipation and mixed-race empowerment?

In this compelling new book, historian Kit Candlin retells the forgotten and essential story of Fedon's rebellion and

Immigration: How the Past Shapes the Present

Nancy Foner

American history is, in part, a history of immigration – of waves of people from other lands making their way to America's shores. That extraordinary history is at the heart of this book by Nancy Foner, one of America's leading immigration scholars.

Immigration: How the Past Shapes the Present argues that the past is critical in understanding current immigration; that a new historical perspective offers important insights into what is happening today. Foner examines both the facts of immigration in the past and how they are perceived – the stories, myths, and memories that color how we think o...

The Postcolonial Volk

Benjamin Zachariah

Postcolonial theory and its bedfellow, decolonial theory, are the most flourishing products of academia in recent times. Transcending their origins in universities and literary criticism, and clustering around what is coming to be known as 'theory from the Global South', their guiding assumptions have leaked into the public domain and become shibboleths with which to acknowledge historically victimised communities. With this success has come a disturbing trend: political activity operates based on clumsy victimhood analogies, and much of its rhetoric is deliberately anti-rational, reproducing ...

The Life of the Author: Geoffrey Chaucer

Simone Marshall

Explores how generations of biographers shaped, reinvented, and fabricated the life of Geoffrey Chaucer

Very little is known with certainty about Geoffrey Chaucer's life, yet he has long been enshrined as the "Father of English Poetry." Over six centuries, biographers have sought to craft a version of Chaucer that meets the needs of their own time, culture, and readers. In doing so, they have often blurred the boundaries between evidence and invention. In *Life of the Author: Geoffrey Chaucer*, Simone Celine Marshall takes a distinctive approach that examines not just Chaucer himself but the way

Distant Freedom: Essay on Chekhov

Jacques Ranciere, Steven Corcoran

Chekhov's short stories offer a subtle yet powerful message: that there is potential for change in our lives. Contrary to the image of a desolate soul, they reveal Chekhov as a beacon of hope and freedom. His narratives delve into the very essence of time, juxtaposing the relentless monotony of servitude with the glimmering moments that fracture this cycle, hinting at the existence of a different, more liberated existence. This is the way to approach all these brief tales of lost lives, nights filled with tears and joy, landscapes, or love, against the cynicism of those who believe time is des...

The Faces of the Adversary: The Enigma of Jacob and the Angel

Roberto Esposito, Zakiya Hanati

Roberto Esposito's poetic and historically layered new book draws on a famous, and famously opaque, passage from the Old Testament to shed light on the vision of self and domination that has profoundly shaped Western identity and left its mark on Western culture. These ten lines from Genesis tell the tale of Jacob wrestling with a mysterious adversary on a riverbank. But who exactly is Jacob wrestling with – the divine? Evil personified? Absolute otherness? Or the deepest, most subconscious self? Who, in other words, is the adversary? The angel's identity is shrouded in mystery until we realis...

Doing Good: How Ethical Capitalism Can Save Liberal Democracy

Markus Gabriel

Doing Good is a bold call for a new social contract in a world buckling under the weight of multiple crises—geopolitical tension, ecological collapse, technological disruption, growing inequality and the slow erosion of liberal democracy. The promises of modernity, once rooted in the convergence of technoscientific progress and liberal capitalism, have failed to deliver widespread peace and prosperity. Instead, we face an uncertain future that demands radical rethinking.

The Tonality of Thought

Byung-Chul Han, Daniel Steuer

In a lecture given in 2023, Byung-Chul Han likened his thinking to music: his books present variations on themes, like the Goldberg Variations, though in his case the variations are articulated in the form of fundamental concepts. He also explained that his thinking is rooted in German Romanticism and Far Eastern thought. 'If I may compare my thinking with a fruit, then its skin and flesh are deeply romantic. The seed, in contrast, is Far Eastern.'

In the three lectures that make up this book, Han invites readers into his world, discusses some of the artists and thinkers who have shaped his t...

Tracks in Chaos: Philosophical Orientation and Political Reflection

Raymond Geuss

When political action is imperative, we can be tempted to look to philosophy for guiding principles. This project, however, has been historically doomed to fail. Throughout *Tracks in Chaos*, philosopher Raymond Geuss closely examines the consequences of this failure. In crisp and lucid prose, he ranges over topics including political realism, reflection in politics, universalism, solidarity, our utopian aspirations, and the role of fear in motivating censorship. Geuss ultimately paints a picture which is both rich and uncompromising, as is his conclusion: that we must learn to accept incomplete...

There Was No Revolution: Reflections on Property, Power and the Servile Condition

Catherine Malabou, Carolyn Shread

In her new book, Catherine Malabou argues that the French Revolution existed in name only, not in reality - privileges disappeared only on the surface and the old forms of domination persisted in structuring everyday life. And sure enough, French citizens soon came to ask: how is it that we are falling back into the same patterns of servitude and privilege?

Ubuntu dissolves tribalism, leaving in its stead an embrace of the plural within universality. In this book, Diagne recounts how Ubuntu become a dynamic philosophical concept whose humanist potential would rise ...

For that to happen, science needs to become part of our common culture. Science is not just for scientists: if it were, it could never save us from the multiple crises we face. Alienation and Acceleration: Towards a Critical Theory of Late-Modern Temporality

Hartmut Rosa

Modern life is speeding-up, constantly. While the art of saving time reaches unprecedented heights through the introduction of ever-new technologies of communication and production, it nevertheless feels like we are running out of time. In all western societies, time scarcity is increasing and individuals report the impression of having to run faster and faster every year – not in order to get somewhere, but just to stay where they are.

In this short book Hartmut Rosa outlines his theory of social acceleration and uses it to analyse the causes and consequences of the temporal processes that ch...

The Unknowable Body

Lisa Jean Moore

In *The Unknowable Body*, leading medical sociologist Lisa Jean Moore explores the profound disconnect between how we experience our bodies and how medical science interprets them. Pharma Monopoly: The Battle for the Future of Medicines

Tahir Amin, Rohit Malpani

It is no secret that millions of people across the world lack the freedom to access life-saving medicines as and when they need them. For decades, people have fought to put this right, though as the Covid-19 pandemic made sickeningly clear, vast swathes of humanity are still left without. The reason: billions of people are actively denied access to affordable medicines by outdated patent rules and economic policies dominated by neoliberalism. It is no accident, and it is not due to the pharmaceutical industry alone.
